Sensory Room Social Story

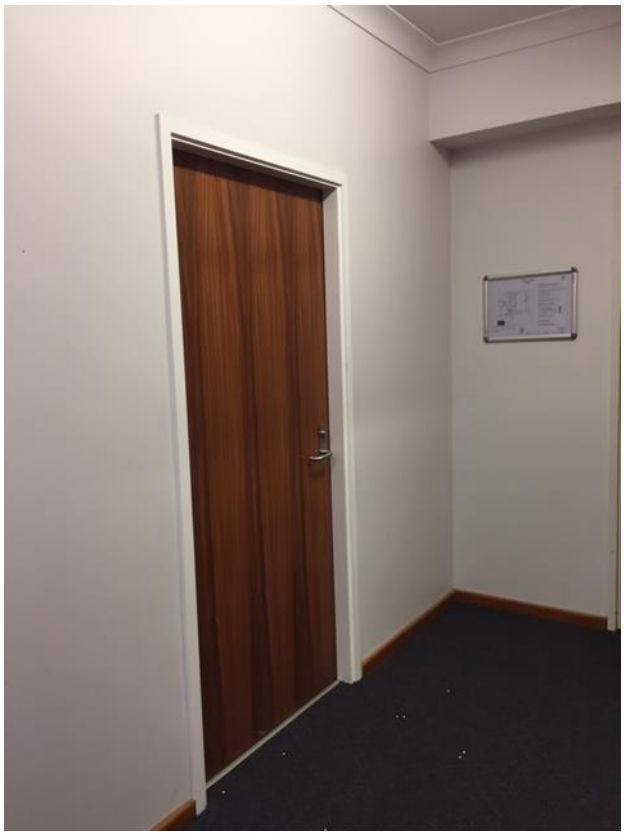
Welcome to the CareWays Community Sensory Room. The sensory room is inside Horsley Community Centre. The sensory room is a space for calm.

This is Horsley Community Centre.

You will enter the community centre through these doors.

Your mum/dad/support worker will unlock the doors and take you inside.

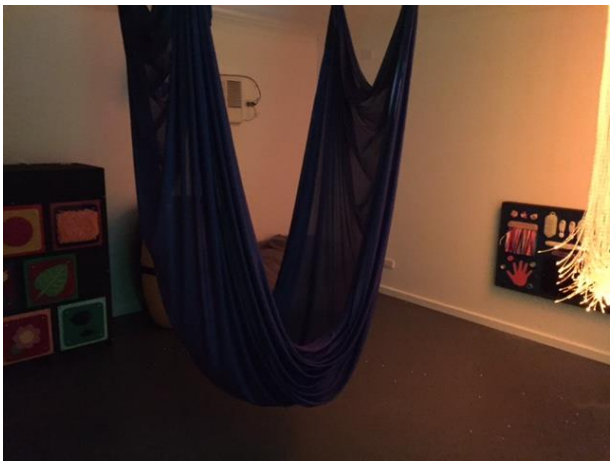
They will turn off the alarm and take you down the hallway to the front of the sensory room.



They will open the door for you and you can go inside. You can take your shoes off if you like.

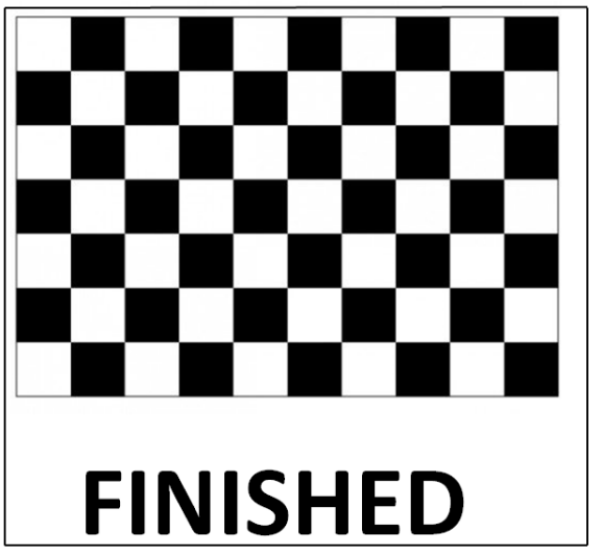
You will see equipment that lights up, that makes sounds, that you can touch and that you can lie on or sit on.

You can choose what you would like to use and how you would like to use it.



Please be very gentle with our equipment.

Your mum/dad/support worker will let you know when it’s almost time to leave the room. They might give you a timer or show you the finished sign. They will clean the equipment, put everything away and turn all the equipment off.



They will lock the door, turn the alarm off and take you back outside to go home.
