Granite

Do's & Don'ts

Do regularly seal the stone with a high quality water-based penetrating sealer
Do always use coasters and placemats
Do immediately blot up spills with a paper towel
Do towel dry natural stone floors after cleaning
Do squeegee shower walls after each use
Do dust mop floors frequently
Don't use TOO much detergent as it can cause a light film or streaking
Don't use citric cleaners, toilet bowl cleaners, cleaners containing vinegar, or tub & tile cleaners (This may cause etching in the stone) If spills occur, don't wipe the area, wiping spreads the spill
Don't allow water to air dry on natural stone, as chemicals and minerals aer left behind after water evaporates
