

Telecommunications

Mayflower, as part of the UniGroup family of companies, is a leader in transporting the many sizes and types of telecommunication equipment. Cellular sites introduce complex situations from congested metropolitan areas to remote locations. Whether you have a base transceiver station (BTS) equipment, generators used at the initial cell site installation or service parts for ongoing support, we handle your product with special care. We understand your needs for secure, safe and on-time service. Our success is because of our experience, reliability and solutions. We will help you determine which transportation options in your domestic and international market will provide the most appropriate service with the best value.

Services include:

- Air and ocean freight
- Blanket wrap transportation
- Consolidation services
- Customs clearance
- Inside pickup or final placement
- Installation
- Lift gate equipment
- Optimized distribution
- Project management
- Time or date sensitive services
- Transportation management
- Unpack and debris removal
- Warehousing

Mayflower can also provide specialized equipment and rigging to ensure every item is handled with the greatest care. Our team understands the critical nature of installations and asset location in the telecommunication field.

When you choose us, you can always count on us for cost-effective answers and a level of quality that you simply won't find anywhere else.
