

FLEMISH HERITAGE

herringbone format & system planks

The city of Antwerp in the 16th century: The golden age of Flanders produces an impressive variety of architecture and art. The success story of parquet flooring is running its course here. Parquet flooring developed to become the flooring of the nobility and rich merchants. To this day we can admire there the high art of parquet flooring not only in the palaces and stately homes but also in modern architecture.

The formats of our Flemish Heritage collection allow us to replicate the magnificent laying patterns – for a rich floor architecture with majestic charisma.

RICH FLOOR ARCHITECTURE

A majestic format

The herringbone-pattern is the epitome of the classic engineered hardwood floor. The herringbone pattern is unmistakable in single or double patterns. All ter Hürne herringbone planks have the same profile, so there are no left or right-hand planks as with conventional parquet flooring. It can therefore be laid faster, easier and particularly efficiently due to the minimal wastage.

Unlimited possibilities in floor design

The installation pattern is an important factor in determining both the character of the floor and the effect of a room. Our system planks offer many different installation patterns. The basket weave or chequer pattern is a timeless classic. It is one of the oldest ways of laying engineered hardwood flooring and can often be found in -castles and stately villas. The floor may also shown to good advantage by framing it with a 4-sided border.
