

KONINGDAMEN

PLANTERS AND TREE BOXES

Please find detailed below the product information of the program of planters and tree boxes of Koningdamen.

Extensive program of planters and tree boxes, a quality product from The Netherlands

Natural materials, quality in the technical construction and finish and durability. We are specialized in own design and production of planters and tree boxes. From the beginning we have chosen for quality and exclusivity and focus on the environment where durability is key. An indestructible and almost imperishable product, made of durable, natural materials.

The products are primarily meant for outside for on a terrace or square, in a garden or park, or other public space. But they can also come inside, in a courtyard garden, an atrium, an office or an orangery.

The extensive program consists of different models. In different shapes, such as square, conical, rectangular, round and polygonal versions. Next to a large number of more common dimensions, customer-specific customization is key-part of our operation. The planters and tree boxes are produced in The Netherlands, which gives us maximum control over the quality.

Base product and further options for planters and tree boxes

The planters and tree boxes are robust and solid, with a strong construction, needed as the forces on a planter or tree box are significant. In the design itself and in the production of the planters and tree boxes we pay maximum attention to a durable quality product. Designed and produced to remain good for many years and stand inside or outside without problems, under all weather conditions.

We work primarily with hardwood, steel, aluminium and zinc, and combinations of these. We work with very durable hardwood, the most common kinds we work with are (amongst other) Cumaru, Ipé, Sucupira Vermelho, Angelim Vermelho, Iroko and Guariuba. We strongly support the choice of use of hardwood that comes from environmentally responsible forestry (FSC-certification), as care for the environment and proper dealing with nature gets more and more important.

If planters are made of hardwood and this stays untreated, it will become grey in the course of time, also if the planters stand inside, as a result of the light (and outside also in combination with the rain water). This had no consequences for the construction and reliability / durability as such. In that sense this aging is not worse (or better), it is mainly a matter of taste and of liking or disliking and is also dependent of the environment where the planters and tree boxes come standing. To prevent the aging the planters (the hardwood) can be treated and finished with a special durable oil. This oil can easily be applied, is water resistant, does not peel off and fills the hardwood well, making the wood stay good for a longer period. The oil is available in different colour. As an alternative the planters (the hardwood) can be lacquered, in multiple layers with a strong two-components based lacquer, this can be in any colour.

When a planter or tree box (partially) is made of steel, all steel parts are galvanized against rusting and then coated in colour. For some kinds of steel (e.g. Corten steel) the rusting on the surface is desired.

Planters made from aluminium are coated in colour.

Planters and tree boxes that come outside standard are supplied with waterproof cloth on the inside against the side walls, with anti root cloth inside completely. Anti root cloth retains the soil and plant and lets redundant water go through in the bottom of the planter. Alternatively planters and tree boxes can be made fully waterproof (with a special waterproof EPDM cloth inside), if the planters come to stand inside (and also for outdoor planters, possibly with an overflow pipe).

To keep planters wheeled they can be provided with wheels. In case of larger planters and tree boxes, we are not a supporter to put these on wheels. The total weight is so great that the planter or tree box can almost not be moved anymore. We advise therefore larger planters or tree boxes always to be put on heavy beams.

Prijzen en leveringsvoorwaarden

The planters and tree boxes are delivered in The Netherlands and abroad, primarily through a selected network of green companies, gardeners and project plantation companies. We are fully equipped to manufacture and forward all planters and tree boxes. We work on a project base, where it can concern a single custom planter, but also a larger number of planters or tree boxes at the same time. We do delivery as much as possible ourselves, but we also work together with different carriers. In general we agree delivery conditions per project. For projects we have a discount structure. Delivery as per our General Terms of Delivery.

In this catalogue you will find the planters and tree boxes overview, with the different versions and outside / inside dimensions detailed out per model. All products information subject to change.

www.koningdamen.com

We like to refer you to our internet site, where you will find detailed information about our company, our products and the way we work. You will also find there much photo material from the different planters and tree boxes, from projects we have been able to fulfil with our partners. Information and photo material from the different products can be downloaded direct from the website.

In addition to the program of planters and tree boxes we are active with the exclusive collection of country style outdoor furniture of Koningdamen, an absolute top product. For more information we refer you to our website, with an overview of the different series and much photo material examples. And further we are busy with quality steelwork. In most cases projects on customer specification. Fences and gates, stairs, steel inner doors, construction steel, balustrades and railings, horseboxes, windows and doors for stables, park- and street furniture. Feel free to contact us for more information.

Together with the above product information and our catalogue, we hope to have provided you with a complete overview of our company and product range. However, if you should require further information or if you have any specific questions, please feel free to get in touch with us. We would be delighted to be of service to you and help you choose your Koningdamen product.

Best regards,
Koningdamen B.V.

BASEL

Robust modern planters

- Robust square planters and tree boxes
- Fully made of durable hardwood
- Modern design
- Sturdy construction, final assembly with stainless steel fixing materials

EQUATOR

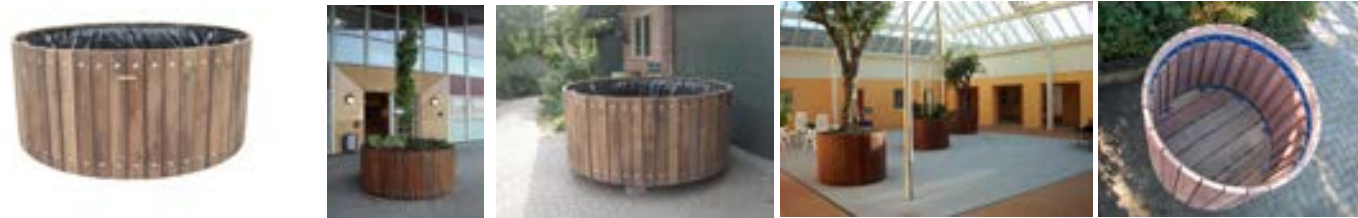

Round planters and tree boxes

- Robust round planters and tree boxes
- Fully made of durable hardwood
- Elegant design, with the wooden shelves placed vertically
- Sturdy construction, with steel rings inside the box and final assembly with stainless steel fixing materials
- Solid beams under the box
- Available in different dimensions (length x width) and height

EQUATOR - Round tree planters

Robust round tree planters in a modern design, available in almost any diameter and height, made entirely from durable hardwood. Stylish design, with the wooden shelves placed vertically with steel rings on the inside of the planter. Solid construction of the bottom on beams, final assembly with stainless steel fixing materials. The wooden shelves a little from each other, which gives a nice depth. Indestructible and almost imperishable. Standard tree planters for outside are provided with anti root cloth inside the planter, with extra waterproof cloth against the side walls. Optional at extra charge additional finishing options as waterproof EPDM cloth, wheels, frost isolation and oil in colour.
