AFS-1000B 1000 CFM Air Filtration System 3 Speed with Remote Control

Two-Filter System with Air Diffuser disperses outgoing air into a broader pattern
Disposable Electrostatic Outer Filter attracts more dust particles than standard filters
Inner Pocket Filter is removable for easy cleaning
Easy Grip Handles allow easy portability of unit
Four Eye Bolts let you hang unit from shop ceiling

Part #	Cycles per Hour(20' x 20' x 8')	Inner Filter Efficiency	Speeds	Timer Settings	Motor

AFS-2000 1700CFM Air Filtration System 3-Speed with Remote Control

Three-Filter System with Air Diffuser disperses outgoing air into a broader pattern
Disposable Electrostatic Outer Filter attracts more dust particles than standard filters
Inner Pocket Filter is removable for easy cleaning
Adjustable Exhaust directs the air where you want it for optimal circulation
Easy Grip Handles allow easy portability of unit

PM1200 Air Filtration System 1/4HP 1Ph 115V

- Two-filter system traps particles as small as 1 micron
- Remote control operates on radio frequency for wider range of effectiveness
- Timer has nine settings, for up to nine hours of continuous operation
- Inner filter has fine mesh pockets for high efficiency, can be blown clean
- Electrostatic outer filter is disposable
- Diffusion filter disperses exhausted air
- Four eye bolts allow suspension from shop ceiling
- Indicator lights up after 200 hours to remind user to replace filters
- Three blower speeds to modify air flow
- Filter guards install and remove easily without tools for quick access to filters
- Two carry handles for portability
- Fully enclosed motor has overload protection for long service life.

Dust Collector

General International

Down Draft Table 1/2HP 1Ph 110V

- Rubber grommets to hold and protect the workpiece.
- Provides a higher level of safety and convenience by collecting dust at the source.
- Special design for heavy and finish sanding, routing and chop saw applications.
- Collects dust that would otherwise stay in the work area.
- Low noise level.
- Industrial strength steel cabinet with three foldable dust curtains.
- A shop vacuum or dust collector can be used to clean out the dust collection tray

Part #	CFM	Filtration Cap.	Overall Dimensions
G10-700 M1	1250	5 Micron	34" x20" x 34-1/8"

Dust Collector 1-1/2HP 1Ph 110/220V

- Totally enclosed, fan cooled, permanently lubricated motor. Designed for industrial applications with a continuous duty rating.
- Heavy-duty construction,mounted on four swivel casters, allowing total mobility and stability.
- Safety switch with key. Unit cannot be started when key is removed from the switch.
- Precision spin-balanced impeller for smooth operation and minimal noise.
- Reusable clear plastic collector bag for improved dust collection efficiency.
- 5” heavy-duty PVC hose between body of fan and collector.
- Collector body mounted on 3 heavy-duty rods.
- Equipped with 2 micron filter bag. (Not included on “CF” canister filter model).
- Quick-release bag clamps with metal straps.
- Intake screen prevents larger pieces from jamming in the impeller.

Part #	Inlet Dia.	# of Ports	Bag Dia.
G10-105A M1	6"	1	20"

Dust Collector 2 Stage 3HP 1Ph 220V

- Efficient collection and separation of large chips which drop into the collector drum before reaching the impeller.
- The filter bag filters out the remaining dust to 5 microns.
- With the cyclone fitted to your own standard drums there is no need to empty from a collection bag into a disposal container. Simply set the drum, with a lid, out for disposal
- (where permitted).
- Equipped with a 5 micron filter bag (not included with “CF” canister filter model).
- 118? (3000 mm) overall height.

Two piece caster mounted 50 gallon (60 U.S. gallon) drums
sold separately (item #10-820).
Model 10-810CF only
Canister filter equipped with crank handle / internal shaker for easy filter cleaning without removing bag.

Part #	Airflow Cap.	Inlet dia.	Bag Dia.

G10-810 M2	2800 CFM	1@8" or 4@4"	24" x 71"

Dust collector 5HP 1Ph 220V

- Heavy-duty design with a continuous duty rating, for industrial applications.
- Totally enclosed, fan cooled, permanently lubricated motor.
- Heavy-duty base with eight swivel casters for smooth movement around the shop.
- Magnetic safety switch.
- Equipped with heavy-duty collection bags made from extra thick, transparent, recyclable plastic and 2 micron filter bags to trap fine sawdust (not included on “CF” canister filter model).
- Extremely durable heavy-duty steel impeller.
- Quick-release bag clamps for fast and easy bag changes.

Part #	Inlet Dia.	CFM	Bag Dia.
G10-510 M1	1@9" or 4@4"	3980	24"

Portable Down Draft Table

- 4? dust port connects to your shop dust collector to capture sanding dust right on your bench top.
- Internal baffles for stable maximum
- capacity airflow.
- Includes six adjustable stops to secure your workpiece to the table.
- Sturdy steel frame and lightweight design for easy storage and portability.

Recommended dust collector requirements: Use a minimum
3/4 HP /700 CFM dust collector.
Results may vary based on usage and the amount/type of dust generated by the operation being performed.

PM1900TX-BK1 Dust Collector 3HP 1Ph 230V 30 Micron Bag Filter Kit

- TurboCone improves chip separation and collector bag packing efficiency
- The cone eliminates premature filter clogging for sustained performance
- Remote-controlled digital timer can be programmed for up to 99 minutes
- All-metal duct construction for rigidity and improved air flow
- 30-micron filter bags for improved capture of fine dust particles
- The large impeller is powered by a 3HP motor for peak performance
- Triple 4” dust ports allow for several hoses to be attached at the same time
- Cloth collection bags with view window use a snap ring for rapid installation/removal
- 10 cubic feet collection bag capacity reduces number of bag changes.
- Tall filter bags require less cleaning due to the larger surface area
- Four swivel casters for easy maneuverability

Hoverpad Pneumatic Mobile Base

The HoverPad pneumatic mobile base is a general-purpose flat base (less than one inch thick) onto which any load can be placed and easily moved.

- Customizable - May be cut to fit almost any size exactly.
- Effortless motion - Heavy objects move freely on a cushion of air.
- Zero rollback - Stays exactly where parked.
- Safe - Greater footprint and stability than wheels – No tipping.
- Requirements - Standard com-pressed air and a smooth floor.

To prevent rocking when parked, the Hoverpad is itself pliant and also has four pliant rubber feet which compress and prevent rocking for the vast majority of cases.

The flow control allows adjustable lift from 1/8? to 1/2?. The load is movable as soon as it lifts.

The HoverPad will fly over smooth, hard, airtight surfaces. Flatness doesn't matter, but smoothness is critical. Test by applying a suction cup to the floor – if it sticks even slightly, it will work.
