To whom it may concern:  
Re: Macie LaMar Vision Therapy

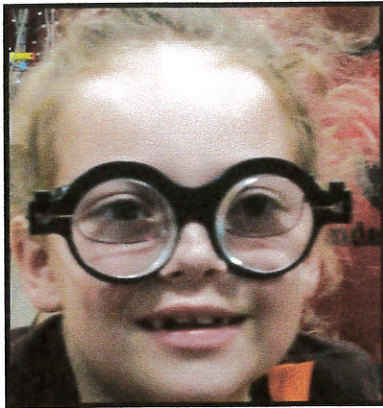

My name is Carol LaMar and I am writing on behalf of my granddaughter, Macie Jacobi LaMar. I am writing to praise your Vision Therapy Program and, more specifically, your therapist, Nancy Inmon.

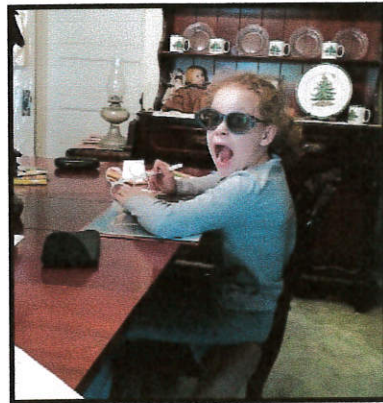

Macie began to have trouble in school during first grade, especially with any activity that required reading. Eye exams at Guymon Vision showed that her visual acuity was fine, so Dr. Brett Furnish referred us to your office for testing. Macie began weekly therapy with "Miss Nancy" on the first of June of 2015. She graduated from the program on May 23 of this year. Macie is a testament to the amazing power of your therapy program. She just completed Second Grade with STRAIGHT A's!! She even placed second in the free throw contest at her school's Playday - something she could have never done before. We and her parents and her teachers are so very proud of her and her hard work. She worked hard in school, but she couldn't have achieved what she did without Miss Nancy (and her husband, Mickey, who assisted in so many ways.) Macie worked hard every Monday at her therapy appointments and she worked hard for us in doing her exercises at home during the week. Depending on whose custody week it was, she worked with mom or dad or her grandpa or me. We all learned plenty in the process.

I feel that one of the most important parts of your practice that contributed to Macie's success was the wonderful welcoming atmosphere that we felt from everyone we dealt with. Had your attitude been different, it might have been difficult to get an 8-year-old to readily agree to a two-hour trip and an hour of hard eye work every Monday for a year. Not to mention the other 5 days of exercises at home each week. Miss Nancy designed the exercises specifically for Macie. This was to be expected, but not to the extent that she made special games and activities and even colors tailored to Macie. Often the exercises were fun rather than being tedious. Some were a challenge for all of us (I'm still awful at bouncing and catching the balls), but overall we had a very positive experience. Miss Nancy and Mickey did so many extra things. The graduation party was, literally, the icing on the cake. It was complete with cupcakes and soda, a present for Macie, games, decorations and even a mortarboard for pictures. Grandpa, Max and I had a great time.

From special presents, stickers and rewards, Macie always felt special here. I know much of the extra effort was Nancy's. Dr. Green is awesome and both ladies were incredibly patient with a wiggly girl who loves to talk...and her little brother who wanted to be included as much as possible.

While there were days and weeks when progress was hard to see, the results from the initial and final eye exams confirm the great improvement in Macie's visual abilities as a result of your program. The financial cost may seem high but your payment options are generous. The program demands much of the child and his/her family and final results are dependent on the amount of effort applied. When you realize the impact that the program could have on *all* of the child's future learning experiences, the actual value of Visual Therapy is priceless. One final result that came from our experience is that Macie is a happier child than when she started. School has become a happy place because the work is easier for her because her eyes are working as they should.

Thank you all for all your efforts on our behalf. Thank you for your patience.

I would recommend your Vision Therapy program to any family.

Sincerely,  
 Carol LaMar
