

For the foreseeable future, all meetings with Dr. Moller have shifted to a HIPAA Compliant (confidential) telemedicine (audio/video) format. We will assist you in any way necessary with this process.

A few straightforward steps are required to begin a telemedicine session:

1. Just prior to the time your meeting is scheduled to start, locate a quiet space where you are unlikely to be interrupted. *In reference to meetings with children, it would be helpful if they could have Legos or drawing materials to use since children tend to feel more comfortable in sessions with such materials.*
2. Using your computer or your phone (Android or iPhone), enter the web address: <https://doxy.me/drmikemoller> on your **Chrome** or **Safari** browser; **Firefox** also works if using the most up to date version.
3. Enter your name and click check in.
4. If asked, allow your browser to use your webcam and microphone

This places you in my “virtual” waiting room. That is all you need to do

At the time our meeting is scheduled to start I will be notified that you are in the “waiting room” and are ready to meet. I click a button on my end, and we will start the session.

You are also welcome to visit <https://doxy.me/> to make yourself familiar with the format prior to your next meeting with me.

For those of you who would prefer to meet via phone and not video, that is also an option.
