

HD WIRELESS N ADAPTER

**Plug this USB Adapter into any
device in your home and be
connected wirelessly**

FEATURES

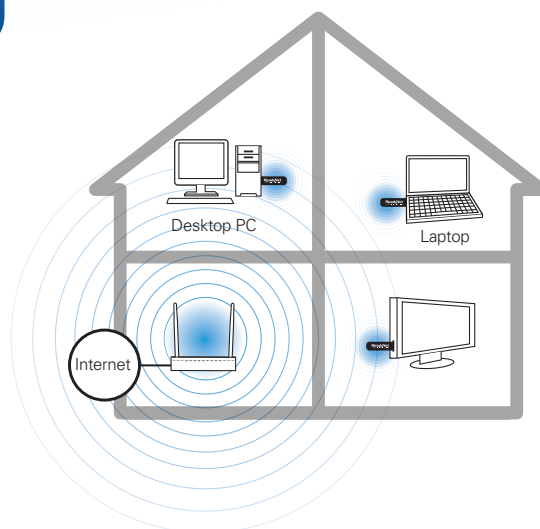

Simple to install - Just Plug It In!

No larger than a USB Flash Drive — small size
lets you take it anywhere.

64 and 128 bit WEP, WPA and AES encryption.

The HD Wireless n Adapter makes it quick and easy to set up a wireless home network when used with a wireless router or access point. The Wireless n Adapter provides high speed transmission for streaming software, HD Video, Data, Voice, and Audio between 802.11x enabled devices. Great for applications such as slow downloads, streaming audio and video, online gaming, file sharing and allowing your laptop wireless network access.

The Wireless n Adapter can provide data rates up to 150 Mbps when used with an 802.11n wireless router while maintaining backwards compatibility with earlier 802.11b and devices. Requiring only a USB connecton, the Wireless n Adapter may be attached to a Windows™ based computer or an approved appliance with embedded Windows or Linux. This makes the Wireless n Adapter an ideal solution for IPTV, Internet Telephone, slow downloads, general and multimedia file sharing and distribution.
