Please make sure to answer all questions fully to get an accurate quote.

If you have any questions, feel free to give us a call at **360-653-6225**, or come into our office in Marysville.

The completed form can be emailed to **info@premierfenceinc.com**

Photos:

We need:

⇒ **At least two close shots**, showing both sides of the fence line and including the full height of any existing fence.

⇒ **At least two wide shots**, showing both sides of the fence and the full area we would be installing.

⇒ **Any other applicable photos** to show us where we'd be working, especially if there are any utilities or landscaping near the fence lines.

**Continue to next page
for diagram & notes.**

Use the space below to draw a simple diagram of your project, or attach a separate diagram.

Please include:

- ⇒ Each planned fence line, labelled with the length of the planned fence in linear feet.
- ⇒ Any repairs involved in your project.

And,

- ⇒ If multiple styles are involved in the same project, please label each line with the desired fence style.
- ⇒ Label the size of each gate and, for cedar and ornamental, whether the gate should be arc top or flat top. If you have a preference on which direction each gate swings or slides, please mark that as well.

Additional project notes:
