Zero Entry Paddle Sweep For Unloading Grain Bins

RUN SWEEP REMOTELY!

Using Your Smart Phone Or Tablet

AMBIT

- **12,000**
Bushels Per Hour
Maximum Capacity
- **ZERO
ENTRY**
Grain Bin Unload
- **72'-105'**
Grain Bin Diameters

Paddle Sweep Features:

- **HEAVY DUTY** paddle chain, motor & gearboxes.
- **ZERO ENTRY** – no jacks or supports.
- **45 DEGREE** paddle orientation allows for better cleanout into sump.
- Designed to be **FULLY SUBMERSED IN GRAIN** and can unbury itself from a grain avalanche.
- Tractor drives are separate from paddle chain. Able to run paddle chain without driving the sweep forward. This is beneficial at startup allowing the sweep to unbury itself before engaging tractor drives.
- The motor/gearbox is not positioned within the grain path of the sump, thus eliminating the possibility that these components will bend and break.
