

STABILmate™

Hydraulic Stabilising System for Caravans

THE EASY WAY TO STABILISE YOUR CARAVAN!

- Replace those binding, tight, hard-to-wind corner stabilisers.
- No more kneeling and bending.
- Easy to use - operated from a central control.
- Can be fitted by a handyman, caravan repairer or adequate workshop.

<p>The pump box is Cold Dipped Galvanised on the inside and outside, as well as on all four legs.</p>	<p>Having the surface of the pump box and legs Cold Dipped Galvanised will help to prevent rust and minimize corrosion on the inside, caused by condensation, which could damage the o-rings.</p>
<p>Two piece pump handle</p>	<p>Allows handle to be removed and stored. It fits easily into the pump box.</p>
<p>Pump has a latch down weather proof lid</p>	<p>Prevents pump mechanism and valves from being tampered with or vandalised. Reduces dust, corrosion and damage to valves and pump mechanism.</p>
<p>All hydraulic cylinders are finely machined</p>	<p>Increases O-Ring life and so reduces maintenance.</p>
<p>Hydraulic rams are made from high tensile steel</p>	<p>Prevents surface rust in corrosive environments when the legs are in the down position.</p>
<p>High quality dust seal in ram cap</p>	<p>When stabilisers are being raised, the seal wipes off surface dust, thus protecting the O-Rings.</p>
<p>All O-Rings are standard sizes</p>	<p>Can be purchased from most hydraulic outlets Australia-wide.</p>
