

# EXTRACT + STORE SAGE INTACCT DATA

**Data Sync AnyWare** | Automated Data Back Ups and Reporting

Data Sync AnyWare is a utility developed by AnyWare Apps that allows you to extract your Sage Intacct data and store it in a Microsoft SQL database for the purposes of reporting, local data back up, or creating business intelligence functions

## Key Features

Through Data Sync AnyWare you can tailor the data you extract to meet your needs. You can extract all the data tables or only the ones that interest you. Once you have selected the relevant data tables, you can create a schedule to automatically sync the Sage Intacct data to the SQL database. Once you have the data in SQL, you are able to use any industry reporting or BI tools to deliver the analysis you need to manage your business.
