

ACCESS CONTROL PEDESTALS

Software, Readers, Pin Codes, Barcodes, Intercom

CARDEASE SOFTWARE

- CardEASE is the fully automated card access module of EASE, the Parking Management Software (PMS) that controls vehicle ingress and egress based on card permissions.
- Quickly & easily add new card types, cards and cardholders.
- Configure complex access rules based on access level, card type, pathway, date & time, holidays and timed or strict passback.
- View real-time reader & gate operational status.
- Real-time connection to CardEASE – continues to operate in off-line mode in case of connectivity loss.
- Credential options: see bottom of Access Control Readers product sheet.

ACCESS CONTROL PEDESTAL (ACP)

- 2-line LCD.
- Access Control Reader or Reader/Keypad Combo.
- Powder coated, security lock and concealed hinges.

UPGRADE OPTIONS

- Add an intercom (VoIP or analog).
- Add a scanner to read barcode passes or a 2D scanner to read QR codes and phone screens.
- Branding faceplate and/or wrap: enhance corporate branding with colors, logo and customized text.
- Security cameras.

DUAL-HEIGHT ACCESS CONTROL PEDESTAL (DHP)

- Accommodates vehicle and delivery truck heights.
- Same options as Access Control Pedestal (above).

LONG RANGE (AVI) READER PEDESTAL (LRR)

- Read Range: 12' to 17' (3.7 to 5.2m)
- Transmit Frequency: 915 MHz

For mounting readers directly on parking machines, see Entry & Exit lane options.

ACP Dual-Height LRR
