

DESKTOP TICKET DISPENSER BOXX

High-Speed Ticketing

Print an entry ticket. Print an exit ticket.
From the convenience of your desk.

OVERVIEW

- Controller, printer and push button provide fast ticket printing and on-line real-time ticketing data.
- Customer Interface Display: LCD with customized instructions.
- Intelligent thermal ticket with multiple lines of text, barcode, date & time, ticket number, lane number & custom header.
- Issues approximately 1,000 tickets per thermal paper roll. Larger paper roll option available.
- Saves transactions for syncing upon reconnect (On-line version only).
- Space saving: only the printer needs to be on the desktop.
- Off-line version (DTB-100) or On-line version (DTB-200).

OPTIONS

- Integrate with the [Cashier BOXX](#) for full-featured integration with [EASE](#), the Parking Management Software (PMS).
- UPS backup protects electronics, provides stable current, and provides surge suppression.

SAMPLE USE

- For pre-paid parking events, cashiers may accept payments and provide a receipt & exit ticket. Press button (not required with [Cashier BOXX](#) integration, which uses programmed touch screen button), printed ticket given to parker, barrier gate opens (in laneway option only).
- Add to a POS System or [Cashier BOXX](#) that is NOT in the laneway.
- Use as an [Entry BOXX](#) back-up ticket printer.
- Issue exit passes, such as to delivery truck drivers who have unloaded shipments and completed the proper paperwork.
