

EXPERTS IN STAINLESS

Custom is in our name because our ability to fabricate unique items sets us apart from other shops. CMPI can fabricate finished parts or partial assemblies per your drawings and specifications--and although we are primarily a stainless steel fabricator, we often fabricate with aluminum and we have a secondary shop for carbon steel fabrications. **CMPI does not sell or fabricate to compete with our customers;** we help them make their products, deadlines and costs in order to satisfy their clients. We have a combined shop size of 100,000 sq. feet, packed with an impressive variety of machines and skilled craftsmen, and we want to put our shop to work for *you*.

DIVERSE CAPABILITIES

Beyond our world-class stainless polishing, CMPI delivers a wide range of fabrication and material processing abilities. Our clients work in many industries, including architectural contractors, food services, & pharmaceutical manufacturers.

- Polishing
- Dimple Jacket / Heat Transfer
- CNC Punching
- Forming
- Sawing
- ASME Code Work
- AWS Certified Welding
- Rolling
- Shearing & Brake Work
- Waterjet Cutting
- Tank Components
