

QUAIL

Quail prefer to walk on the ground rather than fly, but if startled they can explode into flight at a speed of up to 40 miles per hour.

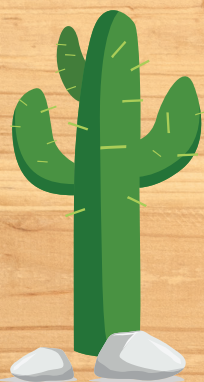

SKUNK

Skunks have glands on their bottom that spray their stinky smell. Skunks can spray up to 12 feet away. The smell can last for up to four months!

CACTI

Cacti can hold a lot of water in their stems. It is drinkable and has been known to save many peoples lives in the desert.

COATI

The coati is closely related to the raccoon. And like its cousin, this mammal is the size of a large house cat, has a ringed tail, and hangs out in trees.

CENTIPEDE

Centipedes are not insects, because they have more than six legs. The largest centipedes in the United States live in Arizona, and they can become 6 inches in length.

RATTLE SNAKE

Rattles are made of the same material as your fingernails. Rattlesnakes grow one rattle each time they shed their skin.
