

# DUMP TRUCKS

**A**s a leader in Mechanical, Railroad, Maintenance of Way, Track Maintenance, Environmental, Transfer and Load Adjustment, Maintenance and Disaster Response services, Hulcher Services maintains a fleet of heavy equipment including dump trucks.

Hulcher's dump trucks have a capacity of 8-22 cubic yards. They can be deployed independently or in conjunction with other Hulcher equipment, like the excavator, wheel loader, track loader and telehandler.

Some projects our dump trucks are used for include:

- Performing grade stabilization
- Trenching, culvert or ditch work
- Removing driftwood from railroad bridge abutments
- Railroad bridge maintenance
- Railroad backhoe services
- Railroad crossing construction
- Derailment support
- Demolition of structures
- Flood response clean-up
- Snow removal
- Hurricane, tornado and storm response
- Bulk transfer services
- Load transfers and load reductions / adjustments
- Post-spill clean-up services

The dump truck is frequently deployed as part of a backhoe / dump truck combo package. This combination of one operator and two pieces of equipment provides the right capabilities for the project while maximizing value for the customer.

When your Load Transfer / Load Adjustment Services project calls for equipment that is properly equipped, expertly operated and available when you need it, call Hulcher at 800-637-5471.

# BACKHOES

**T**he critical element in choosing the right contractor for railroad work is the operator's expertise.

Hulcher Services' professional backhoe operators are railroad specialists. They have received training in railroad applications, are current in safety and security certification requirements for all Class 1 railroads, and have spent years perfecting their craft in maintenance-of-way environments. As a result, they are experts at projects like:

- Tie replacement
- Track lining
- Cribbing
- Cutting grade
- Carrying / dragging rail
- Tamping up ties
- Moving track materials
- Laying out ties for switches during new track construction

Having the right equipment allows the operators to perform at their best. Each Hulcher Caterpillar® backhoe is equipped with regular and cribbing buckets and an extendable arm with thumb, specifically designed for work on the railroad. The backhoes are maintained through Hulcher's Preventative Mechanical Maintenance Program. This multi-layered, proactive system of inspections and servicing that ensures our backhoes are as trustworthy as the Hulcher professionals who operate them.

For your project to be successful, you need an experienced railroad contractor to provide the service you need, the way you need it. When your project calls for a backhoe contractor you can trust, call Hulcher Services.
