

## Microblading Eyebrows FAQ

### **How long does the procedure last?**

It's an estimation of 12-18 months, however I recommend a correction every 12 months.

### **How long does the treatment take?**

It's an estimation of a two hour treatment, involving the decision making of the perfect shape and the colour.

### **Will you drawn the shape first?**

Yes. The shape will be drawn and a decision will be made when the client is completely happy with the look.

### **Does it hurt?**

Everyone's pain threshold is different, for most it can be uncomfortable, however I use two anaesthetics to comfort your needs.

### **Will I experience pain after the treatment?**

The area can feel a little bit sore, however it will subside in a few hours post treatment.

### **Am I able to have Microblading during pregnancy or breastfeeding?**

It's not recommended

### **What type of pigments do you use?**

The pigments that I use are of high quality pharmaceutical pigments, specialised and produced in Germany. All pigments meet the high standard criteria for health and cosmetic regulations.

### **How long will it takes to heal?**

Around one week when following the recommended after care.

### **What can I expect from the treatment outcome?**

You can expect to see a little bit redness and minimal swelling. At first the colour will be intensified during the healing process.

### **Am I able to go to work on the same day?**

Yes, you are able to go to work on the same day or be in a public place.

### **What physical activities shall I avoid after treatment?**

It's recommended that for one week all physical activities should be avoided, which involve sweat, moisture, dampness and wetness. It's the best to keep the area dry for 7 days for optimal healing.

### **Is the second appointment necessary?**

It's highly recommended.
