CaffTOP
BLEND OF GUARANA’, MATE’ AND COLA
**CAFFTOP® 20% Caffeine**  
Blend of Guaranà, Matè and Cola  

**Origin of the drug:** South America  
**Origin of the extract:** Italy  
**Solvent:** water  
**Full traceability:** from beginning to end

**DOSAGE:**  
Food grade extract: 250 mg/die  
Cosmetic grade extract: 1%-2%

**Food grade extract:**  
CAFFTOP® is a dry extract that comes from the extraction simultaneous and balanced of three exclusive and carefully selected South American raw materials: Guaranà seeds (Paullinia cupana Kunt), Mate leaf (Ilex paraguariensis A. St. Hill) and Cola seed (Cola acuminata Schott et Endl.).

- **Guaranà** contains Caffeine, which helps the body to burn fat stored primarily in the subcutaneous adipose tissue and can therefore be useful in the process of slimming. This plant is used in the treatment of mental fatigue, as an adjuvant in slimming regimes and to facilitate water renal elimination.

- **Yerba mate** was used as a beverage since the time of the ancient Indians of Brazil and Paraguay. It is used as a tonic, diuretic and as a stimulant to reduce fatigue, suppress appetite and aid gastric function. It’s also used as a depurative (to promote cleansing and excretion of waste), to stimulate the nervous and muscular systems and for digestive problems, for weight loss, physical and mental fatigue.

- **Cola acuminata** contains xanthes, the same type of alkaloids found in tea and coffee. Common among these xanthines derivatives are caffeine, theophylline and theobromine. These xanthes are known to stimulate gastric acid secretion and to improve utilization of fatty acids as a fuel source. Thermogenic ingredients may be considered as functional agents that could help in preventing obesity.

**Cosmetic grade extract:**  
Anti-cellulite, slimming and termogenic products
