GingeSOL[®]

ZINGIBER OFFICINALIS 5% GINGEROLS
DRY EXTRACT & GRANULATED

GINGESOL® Zingiber officinalis 5% Gingerols

Origin of the drug: Asia
Origin of the extract: Italy
Solvent: water/ethanol

Full traceability: from beginning to end

DOSAGE:

Food grade extract: 250 mg/die

Food grade extract:

Uses described in pharmacopoeias and in traditional systems of medicine : treatment of dyspepsia, flatulence, colic, vomiting, diarrhoea, spasms, and other stomach complaints. Powdered ginger is further employed in the treatment of colds and flu, to stimulate the appetite, as a narcotic antagonist and as an anti-inflammatory agent in the treatment of migraine headache and rheumatic and muscular disorders. In addition to providing relief from nausea and vomiting, ginger extract has long been used in traditional medical practices to decrease inflammation. In fact, many herbalists today use ginger to help treat health problems associated with inflammation, such as arthritis, bronchitis, and ulcerative colitis. In a recent study of 261 people with osteoarthritis (OA) of the knee, those who received a ginger extract twice daily experienced less pain and required fewer pain-killing medications compared to those who received placebo.

GINGESOL® is available in POWDER and GRANULATED form
