GRAPEAll[®]

VITIS VINIFERA DRY EXTRACT 20% PROANTHOCYANIDINS

GRAPEALL® Vitis vinifera dry extract 20% proanthocyanidins

Origin of the drug: Italy
Origin of the extract: Italy
Solvent: water/ethanol

Full traceability: from beginning to end

DOSAGE:

Food grade extract: 250 mg/die
Cosmetic grade extract: 0,5%-2%

Food grade extract:

Standardized extracts of grape seed may be used to treat a range of health problems related to free radical damage, including heart disease and diabetes. Grape seed extract has also been shown to protect against bacterial infections, such as *Staphylococcus aureus*. Some studies, mostly in animals, support these uses.

In chronic venous insufficiency, blood pools in the legs, causing pain, swelling, fatigue, and visible veins. A number of high quality studies have shown that OPCs from grape seed can reduce symptoms. Edema, swelling caused by surgery or an injury, seems to go away faster when people take grape seed extract. Edema is common after breast cancer surgery. Another study found that people who took grape seed extract after experiencing a sports injury had less swelling than those who took placebo.

Cosmetic grade extract :

- Protecting collagen and elastin in skin (anti-aging)
- Treating hemorrhoids
- Protecting against oxidative rancidity and bacterial pathogens

GRAPEALL® is 100% Made in Italy from beginning (RAW MATERIAL) to end (DRY EXTRACT)
