FOOD & COSMETIC

## **RosmarEX**<sup>®</sup>

ROSMARINUS OFFICINALIS 20% TOTAL DITERPENES CALC AS CARNOSIC ACID

## ROSMAREX® Rosmarinus officinalis 20% Total diterpenes calc as Carnosic Acid

Origin of the drug: Italy  
Origin of the extract: Italy  
Solvent: water

**Full traceability: from beginning to end**

### DOSAGE:

Food grade extract: 200-250 mg/die

Cosmetic grade extract: 0,5-2%

### Food grade extract:

🌿 The efficacy of Rosemary leaves and their derivatives as natural food-preserving ingredient is demonstrated and this effect is mainly due to total diterpenes (phenolic compounds). Carnosol and Carnosic Acid are Rosemary most representative terpenes.

Rosmarex® is available in dry form, for application in both food industry as natural food-preserving product and as functional healthy ingredient in Food Supplements.

Rosmarex® is obtained performing a sequential basic extraction using supercritical carbon dioxide as solvent (Co-solvents water / ethanol). Basic sequential extraction involves several specific extractive steps and includes precise tests of compliance on every single step.

### Cosmetic grade extract :

🌿 Traditionally it's used as supportive therapy to help relieve muscle and joint pain associated with rheumatism

**ROSMAREX® is 100% Made in Italy from beginning ( RAW MATERIAL ) to end ( DRY EXTRACT )**
