MASTERTEMP®

MASTERTEMP® HIGH PERFORMANCE HEATER

pentairpool.com

NO MATTER WHAT YOUR CRITERIA FOR TOP PERFORMANCE AND VALUE, THE MASTERTEMP® HIGH PERFORMANCE HEATER MEETS THEM ALL

FAST, EFFICIENT, COMPACT, QUIET, SAFE AND ECO-FRIENDLY

No matter what you're seeking in your swimming pool heater, the MasterTemp heater measures up. Compare this list of features to any other and you'll see why MasterTemp heaters are setting a new standard for total value.

- Very compact design for such a high performance heater, allows for smaller overall equipment pads that won't intrude on your poolscape.
- A fully pre-mixed system with a highly efficient air and gas mixture lets the MasterTemp heater heat up fast. No long waits before enjoying your pool or spa.
- Compare energy efficiency ratings and you'll find MasterTemp heaters at the top of the list. Comfort and economy can go together.
- With a hot surface ignition (no pilot light) and pushbutton, digital controls, the MasterTemp heater is as easy to operate as your home heating system. Plus, user-friendly indicator lights make system operation and monitoring a snap.
- The easy-to-view, rotating digital display places controls front and center, no matter how the MasterTemp heater is positioned on your equipment pad.
- MasterTemp heaters are engineered for super-quiet operation and won't intrude on your poolside leisure time.
- A tough, rustproof composite exterior handles the heat and weathers the elements.
- Eco-friendly, the MasterTemp heater is certified for low NO_x emissions and outperforms industry standards.

- Safe operation through a series of features, including: a water pressure switch that senses the pump is running to prevent overheating, high limit switches assure the heater turns off if water temperature exceeds factory-set limits, manual gas shut-off when service is required, stack flue sensor also guards against overheating.
- Approved for installation on combustible surfaces.

Don't be left out in the cold with heaters that don't measure up to today's longer list of must-have features. Insist on MasterTemp heaters and you're insisting on better performance and lifetime value.

*ASME models available. See your Pentair representative for details.

The MasterTemp heater's easy-to-read controls make system operation and monitoring simple. Pool and spa temperatures can be pre-set and controlled with the push of a button. A digital display indicates the water temperature, and five LED lights give you system status and let you know if the heater needs service.

Rotating digital display means more installation options and easier access to view operating information

Easy to install or retrofit in even the tightest space — models from 175M to 400M BTUs — all measure 21"L x 21"W x 28"H

Rustproof, tough composite exterior for long life

Available in natural gas and propane models

MASTERTEMP® HIGH PERFORMANCE HEATER

WHY MASTERTEMP HEATERS ARE THE "GREENEST" CHOICE

AN ECO SELECT® BRAND PRODUCT

MasterTemp heaters offer best-in-class energy efficiency. Plus, they are certified for low NO_x emissions, making them eco-friendly favorites. That's why the MasterTemp heater is an Eco Select brand product.

The Eco Select brand identifies our "greenest" and most efficient equipment choices. These products save energy, conserve water, eliminate noise, or otherwise contribute to a more environmentally responsible equipment system.

As the global leader in pool and spa equipment manufacturing, we strive to provide greener choices to our customers. We hope you'll join us in embracing more eco-friendly poolscape by choosing Eco Select branded products for your swimming pool.

AVAILABLE FROM:

BEST-IN-CLASS ENERGY EFFICIENCY

- High efficiency** rating makes these heaters extremely economical to operate. If your pool heater is more than 5 years old, chances are a MasterTemp heater could quickly pay for itself in utility bill savings.
- Optimized fuel/air mix provides superior efficiency and faster heat up.

CERTIFIED FOR LOW NO_x EMISSIONS

- In fact, our heaters outperform current industry standards for air pollution exhaust.

SUPER-QUIET OPERATION

BUILT TO LAST LONGER

- Tough composite exterior won't corrode; stands up to both heat and weather.

**Standard and ASME Copper Heat Exchangers 86% efficient. Heavy-Duty (HDI) Cupro-Nickel Heat Exchangers 82% efficient.

AquaQuik® Eco Solar Solutions

NEW

SolarPro Solar Heater

Go GREEN to heat your above ground pool.

Get a head start on the swim season and extend it a few weeks longer with this solar heater for above ground pools.

- Designed for any size above ground pool
- Increases pool temperature up to 5° in one week
- Easy to install
- No electric or gas connections
- Includes protective cover to stop heat transfer
- 1 year limited warranty

Item 4512

Product: 23.0" L x 23.0" W x 9.75" H

Package: 23.0" L x 23.0" W x 11.25" H

Protective cover

Solar Shower Base

Light-weight and portable, you can place your outdoor shower anywhere, even on the grass.

- No in ground installation required
- Easy to assemble
- Durable, weather resistant
- Snap-fit assembly

Item 4377

Product: 19.625" W x 19.625" L x 1.5" H (assembled)

Package: 11.5" W x 10.5" L x 6.5" H

NEW

Outdoor Solar Shower™ with Base

Rinse off before and after a swim. Place it anywhere in the backyard for a sun warmed shower.

- Easy to assemble
- Hot and cold temperature adjustment
- Swivel showerhead
- Base included
- Connects to a standard garden hose
- Free standing or mounts to most surfaces
- Mounting hardware included
- Non-corrosive PVC construction

Item 4376

Product: 4.3" Diameter x 72.0" H (assembled)

Product w/ Base 20.0" x 20.0" x 79.5" (assembled)

Package: 44.0" L x 15.0" W x 9.0" H

Unique, Two Piece Construction for Easy Shipping

SUNHEATER

SUNHEATER

For Aboveground and Inground Pools

FREE HEAT FOR YOUR POOL!

Hundreds of thousands of pool owners use solar heating systems to heat their swimming pools. In fact, over 20% of all pool heaters used today are solar heaters. More solar collectors have been made for heating swimming pools than for all other uses of solar energy combined!

BETTER THAN FUEL-GENERATED HEAT

The SunHeater™ solar pool heating system can achieve the same results for your pool as a gas heater, but without the dangerous gas lines or the huge fuel bills. Gas heaters not only cost more to buy than SunHeater™ solar heating systems, they also cost a lot more to operate. In many cases gas heaters are simply shut off after the first fuel bill arrives! On the other hand, a solar-heated pool stays warm, because heat is constantly added for free. All it takes are a few warm sunny days. In fact, the SunHeater™ costs virtually nothing to operate.

DIFFERENT FROM A SOLAR BLANKET

The SunHeater™ solar pool heating system is different from a solar blanket. While a solar blanket helps your pool retain heat, the SunHeater™ actually adds heat to your pool. Unlike a solar blanket, the SunHeater™ does not lie on top of the water; so, it does not need to be taken off when you swim or put back on afterwards. Just place your SunHeater™ in an area that gets full sun for at least six hours per day. Your system can be placed on the ground, mounted to a roof or a rack, or even hung from a fence. For roof, rack or fence mounting, optional mounting kit, SK43, is available.

WHAT ELSE YOU'LL NEED TO INSTALL YOUR SYSTEM

For Aboveground Pools:

- Hose or PVC pipe - one to go from the pool to the system and a second to go from the system back to the pool. The length of hose required will depend on the distance of the system from the pool.
- An optional mounting kit is available (#SK33). Ask your dealer.
- An optional Diverter Valve kit is available (#SK35). Ask your dealer.

For Inground Pools:

- Hose or PVC pipe - one to go from the pool to the system and a second to go from the system back to the pool. The length will depend on the distance of the system from the pool.
- One SunHeater™ Systems Kit (#SK21) is required for all inground pool solar installations of up to four collectors. It contains all of the necessary valves and hardware to complete the mounting and installation.

SharkVAC XL™ by HAYWARD®

ROBOTIC POOL CLEANER

NEW! Cleans Pool
Floor *and* Walls with
Computer Efficiency.

Hayward's SharkVAC XL is the newest addition to the TigerShark® family of cleaners. SharkVAC XL is built with proven TigerShark technology and the highest quality components. A sleek, low-profile design and easy top-access filter cartridges are a few of the great features that give the new SharkVAC XL added bite.

CLEANERS

Total System: Pumps | Filters | Heating | **Cleaners** | Sanitization | Automation | Lighting | Safety | White Goods

Top access allows for quick debris removal and easy cleanup.

SharkVAC XL™ by Hayward® is your pool's most valuable asset.

SharkVAC XL uses up to 94% less energy than most pressure cleaners. The energy used by a standard light bulb is all that's needed to power this innovative cleaner! Hayward's SharkVAC XL is a floor and wall cleaner that delivers performance and price in a uniquely robust design.

SharkVAC XL's high-quality floor and wall cleaner features and benefits:

- Top-access filter allows quick debris removal and easy cleanup. Just remove and rinse with a garden hose.
- Calculates the size of the pool and programs itself for the most time and energy efficient cleaning path.
- Saves you money. Runs separately from the pool's pump and filter system.
- Cleans all residential pool surfaces, gunite, vinyl or fiberglass up to 20 x 40 ft.

SharkVAC XL	
Work Cycle	3 hours
Motor Unit	24 V/3.5 amps

1- FRONT LOADING COUNTERWEIGHT SYSTEM tm

This simple, removable, counterweight offsets floatation. Step Cups provide stability keeping the product in place in the pool. This system will also help prevent liner stress, print or abrasion. Easy removable counterweight system for winterizing.

2- ALGAE CONTROL BOOSTER SYSTEM tm

The step's mounting pads lift bottom of step away from the liner to allow true, complete water flow. The most effective system to avoid potential algae formation for drop in steps!

3-STEP CUP SYSTEM

Combined with the counterweight system the Step Cups will PROTECT YOUR LINER while keeping the step in position at the bottom of your pool by a suction concept. Its unique soft material allows the ultimate in liner protection.

INTELLICHLOR®

INTELLICHLOR® SALT CHLORINE GENERATOR

For Aboveground Pools

pentairpool.com

THE INTELLIGENT ALTERNATIVE TO HANDLING CHLORINE

SPARKLING POOL WATER HAS NEVER BEEN SO EASY

Electrolytic chlorine generation is the easiest, most effective and convenient way to keep pool water safer and crystal clear. The IntelliChlor® IC15 Salt Chlorine Generator uses table salt to produce all the chlorine your aboveground pool needs.

- Same sanitization performance as manual chlorine addition without the drawbacks.
- No more odor, stinging eyes, irritated skin and bleached-out swimsuits.
- No need to buy, transport and store expensive chlorine compounds.
- Intelligent controls and easy-to-read displays tell you what to do and when to do it to maintain perfect pool water.

SIMPLE DESIGN IS EASY TO INSTALL

Install Horizontally or Vertically—the 2" threaded couplings make plumbing connections quick and easy

Clear, sliding cover protects settings and permits easy system status viewing

The cell and control panel are combined in one assembly, so there's no need for a separate control box

Sealed mini power center mounts to the wall at pump/equipment pad for easy AC wiring

TAKING ELECTROLYTIC CHLORINE GENERATION TO A HIGHER LEVEL OF CONVENIENCE

The IntelliChlor IC15 generator is the standard in chlorine generator technology, giving you the ultimate in convenience, reliability and safety. To understand why the IntelliChlor IC15 generator is better, it helps to first understand how it works.

Table salt (sodium chloride) is added to the pool water...less than a teaspoon of salt per gallon of pool water is all that's required. As the dissolved salt flows through the generator cell, it is electrolytically converted to pure chlorine, which is then distributed throughout the pool, sanitizing the water, keeping it fresh, clearer and safer.

Unlike conventional chlorine additives that must be constantly replenished, the salt is recycled continuously, day after day, to further reduce pool maintenance requirements. The generator even has an automatic reverse cycling feature that minimizes the need to clean the cell and prevents scale build-up for longer life.

SIMPLER, SAFER OPERATION

Monitoring chlorine production is easier with the IntelliChlor IC15 generator. It's the only one with all controls and displays built into the cell—and the only one providing so much helpful feedback to you. Just select from one of five sanitizing levels to easily manage chlorine addition.

- Easy-to-view displays enable fast checking of salt levels, cell cleanliness, sanitizer output and water flow.
- Adjustment is as easy as pressing two buttons.
- All performance data—production settings, hours of operation, chlorine output, cell cleaning cycles, salt readings and water temperature averages—are captured daily, making it easy to maintain perfect water.
- Cell use tracking feature communicates remaining hours of cell life in real-time.
- Integrated sensors in the generator cell ensure that water flow is adequate for safer chlorine generation; under low water temperature conditions, automatic shut-off feature helps protect the unit and prolongs cell life.
- IntelliChlor IC15 generators only operate when your pool pump is running, ensuring system efficiency and safety.

RELIABILITY IS BUILT IN

The IntelliChlor IC15 generator is engineered to stand up to the toughest pool conditions and provide years of dependable performance.

- Titanium electrode cell blades are coated with Ruthenium oxide.
- Control electronics are isolated in the cell, away from high heat components, for longer cell life.
- Totally waterproofed electronics for maximum reliability.
- Rugged, dependable power supply/transformer is UL Listed and can be mounted vertically on the wall up to 15 feet away from the cell.
- Union inlet and outlet connections make cell replacement fast and easy.

INTELLICHLOR® SALT CHLORINE GENERATOR

Take the guesswork out of sanitization with easy-to-read displays and user-friendly controls

Two LED Salt Level Indicators

Two-color Status Displays

Five Sanitizer Output Levels with Two-button Control

ENGINEERED FOR SAFETY

The IntelliChlor IC15 generator meets important standards for safety.

- The power supply cell and electronics meet the requirements of the UL 1081 Standard—the industry standard for pool salt chlorine generators.
- The power supply itself is UL Listed with a flammability rating of UL 94V0.

THE PERFECT CHOICE FOR ABOVEGROUND POOLS OF 15,000 GALLONS OR LESS

- Produces up to .60 pounds of pure chlorine every 24 hours.
- Cell blades are capable of producing chlorine for at least 7,500 hours.
- Electronics run cool for long, reliable life.

WHY THE INTELLICHLOR SALT CHLORINE GENERATOR IS THE GREENEST CHOICE

Production and transportation energy and waste are reduced

- Less chlorine needs to be produced at chemical processing plants for use in swimming pools and spas. This reduces emissions and energy use from production, packaging and transportation.

Provides effective sanitization performance without the drawbacks of expensive chlorine compounds

- You no longer need to buy, transport, store or handle chlorine products. This reduces the chance of spills or accidental exposure and eliminates cost.
- The IntelliChlor generator's constant chlorine production helps prevent the formation of chloramines that cause odors, irritated skin and stinging eyes.

Engineered to stand up to the toughest pool conditions and provide years of dependable service

- Control electronics are isolated in the cell for longer life.
- Waterproof electronics for maximum reliability.

AN ECO SELECT® BRAND PRODUCT

The Eco Select brand identifies our "greenest" and most efficient equipment choices. Using only table salt, the IntelliChlor IC15 generator creates pure chlorine in your pool and eliminates the need to buy, store and add harsh chlorine products manually. In effect, fewer resources are used in the production, packaging and transportation of these chemical compounds. That's why the IntelliChlor IC15 generator is an Eco Select choice.

As the global leader in pool and spa equipment manufacturing, we strive to provide greener choices to our customers. We hope you'll join us in embracing more eco-friendly pools by choosing Eco Select branded products for your swimming pool.

CHLORINE LASTS
2X
LONGER
WITH FROG MINERAL SYSTEMS*

**25%
MORE**
Water Polishers

Mineral Pool Care That's a LEAP Ahead!

- Sparkling water for pools up to 25,000 gallons.
- Less work with prefilled disposable containers.
- Minerals make a difference you can see and feel.

*FROG Leap Mineral System consists of the FROG minerals silver chloride and carbonate used in conjunction with 8.5 ppm chlorine. The FROG Leap Anti-Bac Mineral Pac must be used in conjunction with the FROG Leap Torpedo Pac (EPA Reg. No. 52725-2), an EPA registered chlorine pool product or a chlorine delivery device.

For Optimal Performance

1. Pool Wake Up Convenience Pack

- **Ready:** Depth Charge removes contaminants to keep water crystal clear
- **Set:** Reveille sets your initial chlorine level
- **Go:** All-Out prevents algae with a 90 day guarantee!

2. Pool Hibernation Convenience Pack

- The **1-2** Winterizing Punch
- **1:** Depth Charge removes contaminants throughout the winter
- **2:** All-Out prevents algae for a smoother spring start up

3. FROG® Brand Test Strips

- Precisely measures the low chlorine levels used with FROG Leap minerals.
- Shows you how to reduce your chlorine use so Torpedo Pacs last longer

AQUALUMINATOR®

AQUALUMINATOR®

LIGHT & WATER RETURN FOR ABOVEGROUND POOLS

ADD BRILLIANT UNDERWATER ILLUMINATION IN JUST MINUTES

There's no easier or safer way to illuminate your pool than with the Pentair® AquaLuminator light and water return. It installs in minutes into your pool's existing water return hole to brilliantly illuminate water and make evening swims a more beautiful and satisfying experience. The water return and light fixture are combined in a single, integrated and highly efficient unit. There's no need to cut new holes and risk violating your pool manufacturer's warranty. You'll wonder why you waited so long to add the entrancing glow of underwater lighting to your pool.

- Advanced, hydro-optic technology produces more light with less energy than others—you light your entire pool affordably.
- The energy-efficient halogen quartz light has a rated life of 4,000 hours to deliver maximum value.
- No expensive wiring is required. Just plug into a normal outlet.
- Comes with two color lenses to create just the right mood for your evening swims.
- Adding the AquaLuminator light and water return to your pool is truly "plug 'n play". You get the brilliance of underwater lighting in just minutes, for lasting pool beauty and enjoyment.

AQUALUMINATOR®

LIGHT & WATER RETURN FOR ABOVEGROUND POOLS

Light and return fitting combination provides improved water circulation and illumination in a single fixture

Truly "plug-'n-play", installs in just minutes

Comes with two color lenses to set different moods for your evening swims

VIBRANT LIGHTING AND ENHANCED WATER FLOW FOR BETTER CLEANING PERFORMANCE

Add the magic of underwater lighting to your pool. But why settle for less when the AquaLuminator light and water return gives you brilliant underwater illumination and easy "plug 'n play" installation? The AquaLuminator light and water return is the right lighting choice for just about any aboveground pool.

HAPPYBOTTOM

HappyBottom® Ultimate Pool Pad

Our Best HappyBottom !

HappyBottom Ultimate Pool Pad

- Made With Premium Cross-linked Foam
- Easy To Install
- Extends Liner Life
- Reduces Heat Loss
- Makes Bottom Cleaning Easier
- High Density/Low Compression
- May Eliminate The Need For Sand
- Helps Protect Pool Liners From Punctures
- Great For Pool Set Up On Concrete Or Asphalt
- Minimizes Corrosion Of Metal Components

NEW ! HappyBottom Ultimate is now available pre-cut to fit your pool.

HappyBottom Ultimate is our premium pool pad. Made of a super premium cross-linked foam, it is the ultimate in swimming pool floor padding. The cross-linking provides extra toughness and resilience. HappyBottom Ultimate resists flattening, even when used under the liners of pools that have extra high walls. It is made with the same material that has been used under the artificial turf in NFL football fields for years.

This pool pad can add years of life to a pool and its liner. Used under a pool, **HappyBottom** creates a puncture resistant barrier that helps protect the liner. The pool pad also acts as a vapor barrier that keeps corrosion causing moisture away from metal pool components and the pool liner.

A soft, smooth, easy to clean pool, with reduced indentations and added insulation are just a few of the many valuable benefits of using **HappyBottom** Pool Pad.

HappyBottom is a registered trademark of the Gladon Company. If it's not Gladon, it's **NOT HappyBottom**!

HappyBottom is **NOT** recommended as a barrier to stop Nut Grass. Select our Perfect Pool Bottom for this application. Click Here for [Perfect Pool Bottom](#).

NOTE: GEOTEXTILE pads **DO NOT** provide cushioning like HappyBottom does. Geotextile pads are flimsy, hard to install felt like products. They are not much thicker than a heavy piece of cloth. Geotextile pads **DO NOT** help prevent footprints in the bottom of your pool like HappyBottom does. Because they come as one big sheet, they are hard to install. It is difficult to get a smooth, wrinkle free pool bottom when using a geotextile product. Geotextile products are porous and hold water much like a sponge does. This trapped water can promote black mold growth which may be visible through the pool liner. Use HappyBottom or our Perfect Pool Bottom instead.
