Do you want to achieve natural-looking hair color at home? Try Garnier's Nutrisse Ultra Crème permanent hair dye, which offers a no-drip formula enriched with five fruit oils. This nourishing hair color provides up to 100% grey coverage and leaves your locks intensely moisturized. With our Virtual Try-On service, you can discover how different shades will look on you before making a purchase. Follow these easy steps: decide on the lightness or darkness of your desired shade, then choose the level of reflect (cool, warm, or no reflect). Make sure to select a shade that's not more than two levels from your natural base color. For optimal results, use our Shade Boards to find the perfect Base Color and Reflect for you. Nutrisse is formulated with five fruit oils, ensuring up to 2x shinier hair after coloring. Always apply our 97% natural origin conditioner after dyeing for intensely nourished locks. Remember to always perform a patch test at least 48 hours in advance of using any colorant products. Check for any reaction or irritation and discontinue use if you notice anything unusual. For more information, visit our site. Want to try before you buy? Use our Virtual Try-On service to see how different shades will look on you. Take our 1-minute quiz to ensure the chosen shade works with your hair type and condition. Always do your patch test - www.becoloursafe.com. TRY ON OLIA Check out our How To's and Top Tips on using our at-home permanent hair colors. Always do your patch test - www.becoloursafe.com. TRY On Nutrisse Garnier's Nutrisse permanent hair dye kits deliver rich, vibrant colours that leave you feeling confident with your new locks. However, it's essential to know how to maintain the colour over time, as even permanent dyes can fade with repeated washing. This is because hair dyes are water-soluble, meaning they can dissolve when exposed to water. But don't worry, there are ways to keep vibrant hair colours intact - you just need to learn how to care for your locks properly. To achieve the perfect DIY hair colour result, understanding colour theory and the hair colour wheel is key. The colour wheel shows how warm and cool tones interact with each other, allowing you to neutralize unwanted tones and create stunning combinations. By grasping these concepts, you'll be well on your way to achieving gorgeous at-home hair colours. And if you're feeling overwhelmed, don't worry - it's not necessary to have extensive knowledge of colour theory to get a great outcome. Simply choose the right box colour from Garnier Nutrisse's range, which spans from black and red to light blonde, and follow the instructions for a stunning transformation. Your next great hair color can be fun and easy with some basic knowledge. For instance, consider Garnier's Nutrisse Ultra Crème permanent hair color in Deep Chestnut Brown (434). The packaging has levels and tones that can help you choose the right shade. The level represents how dark or light your hair will be, serving as a base value. Choosing the correct level is key to determining where on the light-to-dark scale you'll fall. Understanding levels helps you figure out your natural color level and decide on a target level for your desired hair color. To determine your level, take a section of hair from your crown and compare it to the chart below. Levels range from 1 (darkest) to 10 (lightest). Keep in mind that the farther your chosen number is from your natural level, the sooner you'll see roots. Conversely, choosing a color close to your natural level will result in a more subtle change with less noticeable regrowth. The tone on your hair color box may contain multiple numbers, indicating one or more tones. With many options available, you're bound to find a tone you love. Consulting the hair color wheel and our Hair Color Decoded Chart can help you achieve your desired permanent hair color result by allowing you to identify how to neutralize or intensify undertones. For example, 9.0 is a light blonde with a natural tone, while 6.1 is a light ash brown. You can choose from various shades like light golden blonde, medium golden blonde or brown, and even bronze brown, such as our Medium Golden Brown (level 5, tone 3).
