- Repairs and supplies
- New equipment sales

Frank D. Scenna
The Teardrop Camper Company
7/12 Forge Street
Blacktown
NSW 2148

Dear Frank,

Many thanks for delivering our Teardrop Camper on time, it tows like a dream and really lives up to all my expectations. Since we took delivery we have installed the toolbox which now contains our fridge, gas bottle and chairs. This really adds to the available space and with two annexes we have nearly as much space as in our Winnebago.

I was a bit concerned that the galley area which we painted ourselves would wear and absorb moisture in the event of spillage. I found this company called Funky Floors who have coated the whole galley area with an amazing product that looks and performs like chipped marble but weighs about the same as paint. This has completely sealed the galley section which now has no visible joints in the walls or the bench. I've enclosed a couple of photos in case you are interested. With labour the cost is just over \$1000 but they make a kit for around \$500.

We have had a couple of short shakedown trips but come the start of March we will head off in the direction of Tasmania and give the Teardrop a real workout. I'll let you know how we go.

Hope your new business is going well and thanks again for a great camper.

Best regards

Brian Bowker
