SRS V9 Requirements

Requirements for the Server: Operating Systems: the following OS's listed below include all versions 32 or 64 bit.

- Windows Vista
- Windows 7
- Windows 8
- Windows 10
- Windows Server 2008
- Windows Server 2011

Hardware requirements: vary based on OS. Storage space would vary based on the volume of data and images.

- Minimum of 2 GB of RAM, 3 GB or more recommended

Requirements for Workstations: Operating Systems: the following OS's listed below include all versions 32 or 64 bit.

- Windows XP (must have service pack 3)
- Windows Vista
- Windows 7
- Windows 8
- Windows 10

Hardware requirements: vary based on OS. Storage space would vary based on the volume of data and images.

- Minimum of 1 GB of RAM

Virtual Server: SRS Cloud Computing

SRS offers a Virtual Server option to their clients who would to be able to do the following:

- Link multiple branches onto the same database and do not want to purchase a server for SRS
- Want the ability to install SRS on their home machines and work from home without having to remote into a computer at the funeral home
- Guaranteed that your SRS database will always be backed up

SRS Cloud Requirements:

Must have the internet with following internet speed:

- We recommend a network connection of at minimum 1 MBit Download / .25 MBit Upload. Most connections are typically faster. The faster your internet connection, the faster your performance.

- You can test your internet speed free by going to Speedtest.net and click Begin Test

*When using SRS Cloud for a server you will still need to follow the same requirements for the workstations as listed above. SRS Cloud is only available to Version 8 clients.
