

## AT&E COVID-19 Update

In lieu of the recent COVID-19 Pandemic/Shelter-in-Place Order, Amarillo Testing & Engineering, Inc will continue prioritize the safety and well-being of our employees, clients and the community in which we live and work. We have established protocols in order to comply with current CDC and WHO recommendations. We strongly encourage all employees to practice safe hygiene as well as social distancing, in both the field and in our laboratory. Certain personnel have been asked to work from home in order to limit group sizes at our offices.

In this trying time, we are committed to support local essential business and critical infrastructure projects. We have a great team of engineers, technicians & staff, and I am confident we can continue to provide our clients with the highest level of service. As always, we are just a phone call away should there be anything we can do to help.

We expect the situation will continue to develop and as new challenges emerge, we are prepared to adapt and respond quickly to any new directives issued by state and local authorities. We thank you for your support and partnership. I truly believe we will come out from this a stronger more resilient community.
