Our Ref: UBP 481 - Electric Rickshaw Trike
A lightly-used, fully refurbished rear steer tandem from Dutch specialists Van Raam designed for an adult and older child. The low frame design makes it easy for riders to get on and off, and the front riding position is easily adjusted for maximum comfort. A harness and adjustable handlebars make this a very safe option for the front rider too, while the upright rear position makes for a clear view of the road ahead. We love the way the ‘stoker’ can get on and off with double prop-stand in place and the way that the seat back distributes weight comfortably and lets the rider put their back into pedalling. The ‘captain’ is in charge of the gears and brakes, and on this model can operate the clutch that connects the stoker’s pedalling efforts to the transmission. Relaxing, freewheeling ride or non-stop pedalling – you decide.
Bicycles made for two...

Frame: Steel powdercoated
Wheels: 20” (406)

Tyres: Schwalbe Big Apple puncture resistant.

Gears: Shimano Nexus 8

Brakes: Magura HS33 hydraulic

Includes chainguard, mudguards, pannier rack and lights!

This is a very nicely made Dutch steer-from-the-rear tandem for two adults, or one adult and older child. It’s been professionally refurbished in our workshop and benefits from brand new hand-built wheels, tyres, tubes and brake pads, chain, cranks and pedals. It rides very nicely and, like all rear steers, gives the ‘stoker’ a clear view of the road ahead while the ‘captain’ retains control of steering, braking and the gears. Tandems like this are a great option for the school run as they’re great load carriers, low maintenance and fun to ride.

Our Ref: UBP 464 – Huka Co Pilot 24” Low Step Rear Steer Tandem
Van Raam Tandem – Only £699 (inc VAT)

Van Raam's cycles are all good. Their tandems in particular are amongst the best in their class and are the most comfortable and easy-to-ride available. We like the way this one has a very low frame, making it easy to get on and off and giving both riders a sense of security that isn’t found on tandems with high cross bars. Steered from the front, ‘captain’ and ‘stoker’ enjoy upright riding positions giving clear views of the road ahead. Hub gears, drum brakes and fully enclosed chains plus puncture resistant tyres mean that you’ll spend more time on the road and very little in the workshop. The Sram 7 Speed hub offers a useful spread of gears for flat terrain. This example has had very little use, the paintwork is exceptionally good and the condition of all the components suggest that it’s barely been used. Suitable for two adults, frame size 52cm/52cm.

- Frame material: steel
- Colour: metallic green/ blue
- Wheel size: 700c
- Rims: Alloy
- Brakes: Sram drums
- Gears: Sram S7
- Lights: Dynamo front, LED battery rear
- Saddles: gel sprung
