Research Methods

Psychology and Science
Why You Should Care
Science in Your Life
Practice: What is Science to Society?
Research Skills in Your Life
Uses of Research Skills in the Workplace
Mastering the Content: Using Research Skills
The Scientific Method
The Process of The Scientific Method
Practice: What Are the Steps of the Scientific Method?
Mastering the Content: The Process of the Scientific Method
How Research Is Used
Practice: Classifying the Types of Research
Mastering the Content: Research Uses
How Does Science Progress?
Characteristics of Science
Practice: Characteristics of Science
Mastering the Content: Characteristics of Science
Characteristics of Pseudoscience
Practice: Science or Pseudoscience?
Mastering the Content: Comparing Science and Pseudoscience

Getting Started
The Good Research Question
Variables and Relationships
Association Does Not Necessarily Imply Causation
Types of Variables: Predictor, Outcome, Independent, and Dependent
Practice: Types of Variables
Practice: Conveying Associative Relationships
Practice: Conveying Causal Relationships
Mastering the Content: Types of Research Questions and Variables
What Makes a Good Research Question?
Practice: Identifying Good Research Questions
Mastering the Content: Good Research Questions
How Are Theories Developed?
Mastering the Content: Developing Theories
The Quest for Good Research Questions
Cumulative Practice: Types of Relationships and Variables, Good Research Question, and How Theories Are Developed?

**Ethical Practices**

The Essentials of Ethics
Why Research Ethics Is Important
Ethical Guidelines: The Belmont Report
Practice: The Belmont Report
Mastering the Content: Ethical Guidelines
APA Ethical Principles
APA Ethical Standards
Mastering the Content: Ethical Principles and Standards
Informed Consent
Right to Withdraw
Deception and Debriefing
Mastering the Content: Ethical Applications
Institutional Review Boards
Privacy and Confidentiality
Mastering the Content: Ethical Review and Practice
Research with Nonhuman Animals
Mastering the Content: Ethics and Nonhuman Animals
Plagiarism and Fraud
Penalties for Plagiarism or Fraud
Mastering the Content: Applying Ethical Standards
Practice: Ethics in Research
The Milgram Obedience Studies
Adoption Research
Gene Editing
Mastering the Content: Ethical Decision Making Examples
Timeline of Ethics in Research

**Reviewing the Literature**
Reviewing the Research
Starting your Literature Review
Scholarly Sources
Mastering the Content: Scholarly Sources
Types of Journal Articles
Practice: Journal Article Terminology
Practice: Determine the Type of Journal Article
Mastering the Content: Types of Journal Articles
Government Research Reports
Mastering the Content: Government Research Reports
Nonscholarly Sources
Nongovernmental Organization Reports: Scholarly or Nonscholarly?
Mastering the Content: Nonscholarly Information
Practice: Scholarly or Nonscholarly?
How Do You Find Scholarly Sources of Information?
Practice: Five Ways to Find Scholarly Sources
Practice: Identify the Method for Finding Scholarly Sources
Accessing Sources of Information
Managing Sources of Information
Mastering the Content: Finding Scholarly Sources
Reading and Extracting Information from Empirical Articles
Worked Example: Extracting Information From an Empirical Article
Practice: Extracting Information From an Empirical Article
Analyzing and Comparing Research Articles
Mastering the Content: Reading and Analyzing Empirical Articles

Research Questions and Designs
Exploring Research Designs
The Research Question Indicates the Type of Design
Descriptive Research
Mastering the Content: Descriptive Research
Correlational Research
Mastering the Content: Correlational Research
Experimental Research
Mastering the Content: Experimental Research
Quasi-Experimental Research
Mastering the Content: Quasi-Experimental Research
Practice: Identify the Research Design
Research Designs and Claims
Mastering the Content: Research Designs
Mill’s Criteria: Covariance, Temporal Precedence, and Alternative Explanations
Practice: What Type of Research Claim Can We Make?
Mastering the Content: Research Claims and Mill’s Criteria
Forms of Validity
Practice: Identify the Form of Validity
Mastering the Content: Forms of Validity
Shouldn’t All Published Research Be Valid?
Practice: Identify the Validity Issues Acknowledged as Limitations
Evaluating Validity
Mastering the Content: Validity

**Sampling and External Validity**
Proper Sampling Assures External Validity
Choosing a Sampling Method
Probability and Nonprobability Sampling
Probability Sampling Techniques
Practice: Probability Sampling Techniques
Mastering the Content: Probability Sampling
Nonprobability Sampling Techniques
Practice: Nonprobability Sampling Techniques
Mastering the Content: Nonprobability Sampling
Ensuring External Validity
External Validity and Claim Type
Mastering the Content: External Validity and Claim Type
Population Validity
Population Validity Versus Internal Validity
Mastering the Content: Population Validity
External Validity and Authenticity
Mastering the Content: Authenticity

**Correlational Design and Construct Validity**
Measuring Variables
What Variables Do Researchers Measure?
Correlational Research
Mastering the Content: Correlational Designs
Constructs: Variables That Cannot Be Directly Measured
Mastering the Content: Constructs
Aspects of Construct Validity
Mastering the Content: Aspects of Construct Validity
Determining Validity
Mastering the Content: Determining Validity
Practice: Aspects of Construct Validity
Valid Measures Are Reliable
Mastering the Content: Reliability
Gathering Observational Data
Construct Validity and Observational Measures
Mastering the Content: Observational Data
 Interrater Reliability
The Observer-Expectancy Effect
The Hawthorne Effect
Practice: Validity and Reliability
Practice: Construct Validity in Observational Research
Mastering the Content: Observational Measures

**Measuring and Reliability**
Measuring Reliable Data
Gathering Self-Report Data
Mastering the Content: Self-Report Data
Types of Closed-Ended Questions
Practice: Self-Report Questions
Mastering the Content: Closed-Ended Questions
Mistakes to Avoid in Gathering Self-Report Data
Practice: Mistakes to Avoid in Gathering Self-Report Data
Mastering the Content: Mistakes to Avoid
Response Sets
Practice: Response Sets
Mastering the Content: Response Sets
Determining Reliability
Practice: Determining Reliability
Mastering the Content: Determining Reliability
Gathering Self-Observation Data
Gathering Participant Observation Data
Mastering the Content: Gathering Observational Data
Gathering Physiological Data
Gathering Archival Data
Mastering the Content: Other Methods of Gathering Data

Between Groups and Within Group Research Design
Designing Experiments
Experimental Manipulation
Mastering the Content: Experimental Manipulation
Between-Groups Research Designs
Practice: Types of Between-Groups Designs
Practice: Identify the Between-Groups Research Design
Mastering the Content: Between-Groups Designs
Within-Group Research Designs
Mastering the Content: Within-Group Research Designs
Counterbalancing
Practice: Interpreting Counterbalanced Results
Partial Counterbalancing
Practice: Partial Counterbalancing
Mastering the Content: Counterbalancing
Single Factor Designs
Multiple Factor Designs
Mastering the Content: Factorial Designs
Regression Designs
Mastering the Content: Regression Designs
Manipulating Variables
Recognizing Threats to Internal Validity
Confounds and Internal Validity
Practice: Recognizing Confounds
Mastering the Content: Confounds
Participant Variables
Controlling for Participant Variables
Practice: Controlling for Participant Variables
Mastering the Content: Participant Variables
Controlling Other Variables Between Groups
Mastering the Content: Controlling Other Variables Between Groups
Controlling for Outside Experiences
Mastering the Content: Controlling for Outside Experiences
Controlling for Change Over Time
Mastering the Content: Controlling for Change Over Time
Additional Threats to Internal Validity
Mastering the Content: Additional Threats to Internal Validity
Practice: Internal Validity
Within-Groups Research and Internal Validity
Mastering the Content: Within-Groups Research and Internal Validity

Analyzing and Interpreting Data
Making Sense of Statistics
Descriptive Statistics and Inferential Statistics
Mastering the Content: Descriptive Statistics
Levels of Data Measurement
Practice: Levels of Data Measurement
Mastering the Content: Levels of Data Measurement
Central Tendency: Mean, Median, and Mode
Central Tendency and Levels of Measurement
Practice: Central Tendency and Levels of Measurement
Mastering the Content: Central Tendency
Measures of Dispersion (Spread)
Practice: Measures of Dispersion (Spread)
Practice: Descriptive Statistics
Mastering the Content: Measures of Dispersion
Correlation Coefficient
Practice: Correlation Coefficient
Mastering the Content: Correlation Coefficient
Inferential Statistics: Tests, Effect Size, and Confidence Interval
Practice: Statistical Tests, Effect Size, and Confidence Interval
Mastering the Content: Inferential Statistics
Inferential Statistics: Parametric Versus Nonparametric Tests
Practice: Parametric Versus Nonparametric Tests
Mastering the Content: Parametric Versus Nonparametric Tests
Choosing a Statistical Test
Practice: Inferential Statistics
Null Hypothesis and Alternative Hypothesis
Mastering the Content: Null Hypothesis and Alternative Hypothesis
Type I and Type II Errors
Mastering the Content: Type I and Type II Errors
The Power of a Statistical Test
Mastering the Content: Power
Why Don’t Scientists Accept the Null Hypothesis?
Practice: Testing Hypotheses

**Reporting Results**
Sharing Scientific Findings
Reporting Research
Scientific Writing: APA Style
Mastering the Content: Reporting Research and Scientific Writing
Reducing Bias in Language
Mastering the Content: Reducing Bias in Language
Avoiding Plagiarism
Mastering the Content: Avoiding Plagiarism
Use of Citations and References
Mastering the Content: Use of Citations and References Scientific Writing
Practice: Scientific Writing
Written Research Papers
Formatting Research Papers
Formatting Tables and Figures
Practice: Formatting Research Papers
Mastering the Content: Written Research Papers and Formatting
Sections of Research Papers
Practice: Sections of a Research Paper
Mastering the Content: Written Research Papers
Poster Presentations
Mastering the Content: Poster Presentations
Oral Presentations
Practice: Presentations
Mastering the Content: Oral Presentations

Getting More Research Experience
Becoming a Citizen Scientist
The Many Roads to Research
Practice: Why Real-World Research Experience Matters
What Tasks Might You Do If You Get Involved With Research?
Practice: Ways to Contribute to a Research Project
Kinds of Research Opportunities
How to Find Research Opportunities
| 11 | Table of Contents |

Gathering Your Research-Related Campus Resources  
Developing Your Personal Research Plan  
Writing Your Résumé and Cover Letter
