HTP<sup>®</sup> FENCING SYSTEMS  
The Horse-Friendly Fence<sup>®</sup>

**Horse-Friendly® , Strong, Durable, Maintenance Free,  
Great Appearance & Amazing Value!**

# WHITE LIGHTNING™

**White Lightning™** is a unique co-polymer coated 12.5 guage galvanized high-tensile steel wire. Similar to ordinary high-tensile electric fence wire, yet superior in quality and safety due to its horse-friendly co-polymer coating. White Lightning™ incorporates highly visible white polymer and highly charged black polymer in four shock points to help create the perfect fence for containing horses and other livestock.

SPECIFICATIONS	
Roll Length	1000 ft.
Total Diameter	.285"
Steel Wire	12.5 guage
Min. Breaking Strength	1400 lbs
Weight Per Roll	50 lbs

**P**erfect as a stand alone or in combination with other fence types like wire, wood, polymer or rigid PVC. When your animals require electric fencing, protect them and you with White Lightning™ The Horse Friendly Fence®.

# POLYSTRAND™ HTP®

**Polystrand HTP®** is a unique single-strand fence rail using 12.5 guage galvanized high-tensile steel wire embedded in a tough, HTP® Polymer coating. The smooth safety-finished outside diameter is approximately 1/4" and it is available in white, brown or black. It is versatile and can be used as an entire fence exclusively or in combination with other Centaur HTP® Fencing System products.

## PolyStrand™ HTP®

SPECIFICATIONS	
Roll Length	1000 ft.
Total Diameter	.250"
Steel Wire	12.5 guage
Min. Breaking Strength	1400 lbs
Weight Per Roll	45 lbs
Colors	White, Black, Brown

## HTP® Polymer is an exclusive formula

engineered for durability, resistance to wear, resistance to ultra-violet rays and stability throughout the range of summer and winter temperatures.

*The best fence designs for containing and controlling livestock are determined by evaluating factors of safety, congestion, animal weight, visibility, livestock in adjacent areas, animal behavior and so on.*
