

THE HYGIENIC TOILET BRUSH

Dip-San® The Hygienic Toilet Brush

The Dip-San® patented Self Cleaning Brush System has been developed to provide a totally hygienic alternative to the traditional toilet brush. Our product platform has been designed for both 'at home' and a diverse range of 'away from home' toilet environments such as hospitals, care homes, hotels, offices and schools.

With floor standing, wall mounted and portable variations to choose from, Dip-San® provides a flexible and cost effective system to suit all cleaning regimes. Manufactured in the UK to the highest standards, Dip-San® is designed to provide many years of hygienic service, backed by our Lifetime Guarantee.

Hygiene Made Simple

Simple to Use

- After use, place brush in holder and depress handle
- Brush head is then lowered into cleaning reservoir
- Rotate handle in down position to agitate bristles against internal ribs
- Remove hand and brush head returns to drying position
- Simple

Simple to Refresh

- Remove Brush, flush used solution in toilet
- Add water to top of internal ribs
- Add 20ml Dip-San Cleaning Fluid
- Replace brush - refresh complete
- Simple

Recommended Refresh Rates

- In cubicle Dip-San® – weekly change
- Portable Dip-San® – change every 20 toilet cleans

The Benefits

Raise hygiene standards and save money!

A filthy toilet brush sends out poor signals to washroom users, reflecting badly on both facility and service provider. Worse still, risk of infection spread is introduced into our hospitals, care homes, offices and hotels. Toilet Brushes are replaced when they start to look unhygienic, the fact is they are bacteria laden after the very first use.

Hygiene - common sense approach

The lack of guidance available to Facilities Managers on how to keep toilet brushes in a hygienic state has led to their ban in many facilities. Dip-San® can be simply added to any environment, providing much needed protection to both toilet user and cleaning staff alike.

Savings - help for cleaning budgets and our environment

A facility with 50 cubicles replacing toilet brushes every 6 months equates to 500 over a 5 year period! After 5 years, we guarantee Dip-San® will still be delivering a hygienic solution for years to come. This represents a 90% reduction of toilet brushes being recycled, incinerated or sent to landfill.

Our only condition is that Dip-San® Cleaning Fluid is used, proven to be tough on germs but kind to our environment.
