Duties and Responsibilities of the Job

- Align roofing materials with edges of roofs
- Apply alternate layers of hot asphalt or tar and roofing paper to roofs
- Apply plastic coatings, membranes, fiberglass, or felt over sloped roofs before applying shingles
- Cement or nail flashing strips of metal or shingle over joints to make them watertight

- Clean and maintain equipment
- Cover exposed nail heads with roofing cement or caulking to prevent water leakage or rust
- Cover roofs or exterior walls of structures with slate, asphalt, aluminum, wood, gravel, gypsum, or related materials using brushes, knives, punches, hammers, or other tools
- Cut felt, shingles, or strips of flashing to fit angles formed by walls, vents, or intersecting roof surfaces
- Cut roofing paper to size using knives; and nail or staple roofing paper to roofs in overlapping strips to form bases for other materials
- Estimate roofing materials and labor required to complete jobs, and provide price quotes
- Inspect problem roofs to determine the best repair procedures
- Install attic ventilation systems, such as turbine vents, gable or ridge vents, or conventional or solar-powered exhaust fans
- Install partially overlapping layers of material over roof insulation surfaces, using chalk lines, gauges on shingling hatchets, or lines on shingles
- Install skylights on roofs to increase natural light inside structures or to reduce energy costs
- Install vapor barriers or layers of insulation on flat roofs
- Install, repair, or replace single-ply roofing systems, using waterproof sheet materials such as modified plastics, elastomeric, or other asphaltic compositions
- Remove snow, water, or debris from roofs prior to applying roofing materials
- Set up scaffolding to provide safe access to roofs
