Duties and Responsibilities of the Job

- Smooth and finish surfaces of poured concrete, such as floors, walks, sidewalks, roads, or curbs using a variety of hand and power tools
- Align forms for sidewalks, curbs, or gutters
- Patch voids
- Use saws to cut expansion joints

- Directly coordinate activities of construction or extraction workers
- Arrange for repairs of equipment or machinery
- Assign work to employees based on material or worker requirements of specific jobs
- Confer with managerial or technical personnel, or other departments, or contractors to resolve problems or to coordinate activities
- Estimate material or worker requirements to complete jobs
- Inspect work progress, equipment, or construction sites to verify safety or to ensure that specifications are met
- Locate, measure, and mark site locations or placement of structures or equipment, using measuring and marking equipment
- Provide assistance to workers engaged in construction or extraction activities, using hand tools or other equipment
- Read specifications, such as blueprints, to determine construction requirements or to plan procedures
- Train workers in construction methods, operation of equipment, safety procedures, or company policies
- Analyze worker or production problems and recommend solutions, such as improving production methods or implementing motivational plans
- Apply hardening and sealing compounds to cure surface of concrete, and waterproof or restore surface
- Apply muriatic acid to clean surface, and rinse with water
- Build wooden molds, and clamp molds around area to be repaired, using hand tools
- Check the forms that hold the concrete to see that they are properly constructed
- Chip, scrape, and grind high spots, ridges, and rough projections to finish concrete, using pneumatic chisels, power grinders, or hand tools
- Clean chipped area, using wire brush, and feel and observe surface to determine if it is rough or uneven
- Cut metal division strips, and press them into terrazzo base so that top edges form desired design or pattern
- Cut out damaged areas, drill holes for reinforcing rods, and position reinforcing rods to repair concrete, using power saw and drill
- Install anchor bolts, steel plates, door stops and other fixtures in freshly poured concrete, pattern, or stamp the surface to provide a decorative finish
- Mix cement, sand, and water to produce concrete, grout, or slurry using hoe, trowel, tamper, scraper, or concrete mixing machine
- Mold expansion joints and edges using edging tools, jointers, and straightedge
- Operate power vibrator to compact concrete
- Produce rough concrete surface, using broom
- Push roller over surface to embed chips in surface
- Set the forms that hold concrete to desired pitch and depth, then align them
- Signal truck driver to position the truck to facilitate pouring concrete and move the chute to direct concrete on forms

- Spread, level, and smooth concrete using rake, shovel, hand or power trowel, hand or power screed, and float
- Waterproof or restore concrete surfaces using appropriate compounds
