

You will need to check with your local council re the installation of solar if in a heritage area or if there are covenants on your property re the installation of solar systems

Send energy bill to us noting the name and address, nmi, meter number and usage

We determine the size of the system that will be best for you by your usage, roof space, shading etc.

We will check with Powercor to determine the size of the system that would be approved at your address

We provide an estimate for the supply and installation of the solar system

Pricing of our installation is accepted by the consumer.

If eligible you would need to apply to Solar Victoria for the Solar PV Rebate. We supply Solar Provider Statement for your application

Deposit is paid for the system and stock ordered

Installation takes place.

Balance of funds to be paid on day of installation

Electrical Inspection takes place

Certificate of Electrical Safety is provided, CR and paperwork for the Vic Solar Rebate claim

STC rebates are emailed to be assigned to Smart Options

Your energy retailer will contact you regarding any metering changes and contracts

Enjoy many years of saving money from your new solar power system
