Setting up and Crediting a WavesLiteApp Account.

1. Open Google Chrome (If you don't have Google Chrome you will need to install it first as the WavesLiteApp is a plugin to Chrome)
2. Go to www.wavesplatform.com, Click on "Get Client" and you will see the screen below:

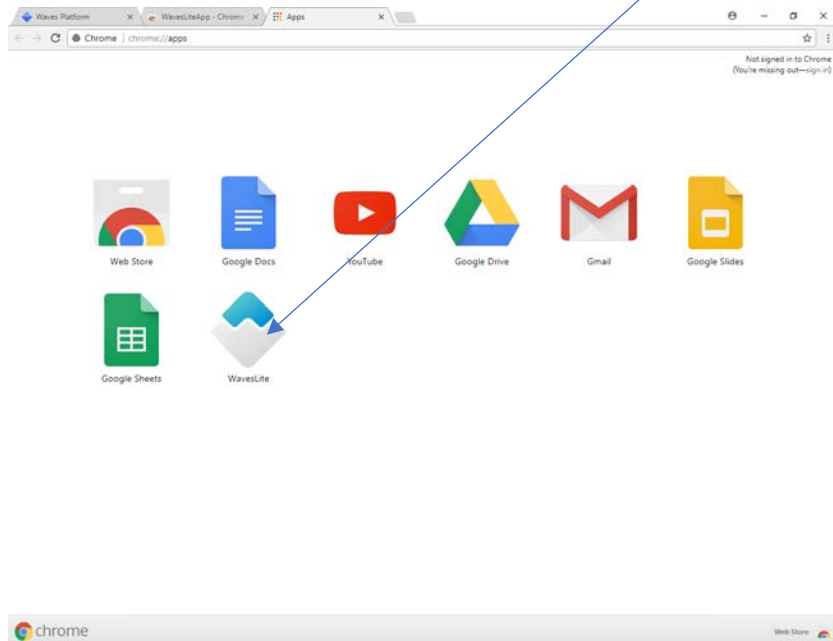

3. Then Click "ADD TO CHROME"

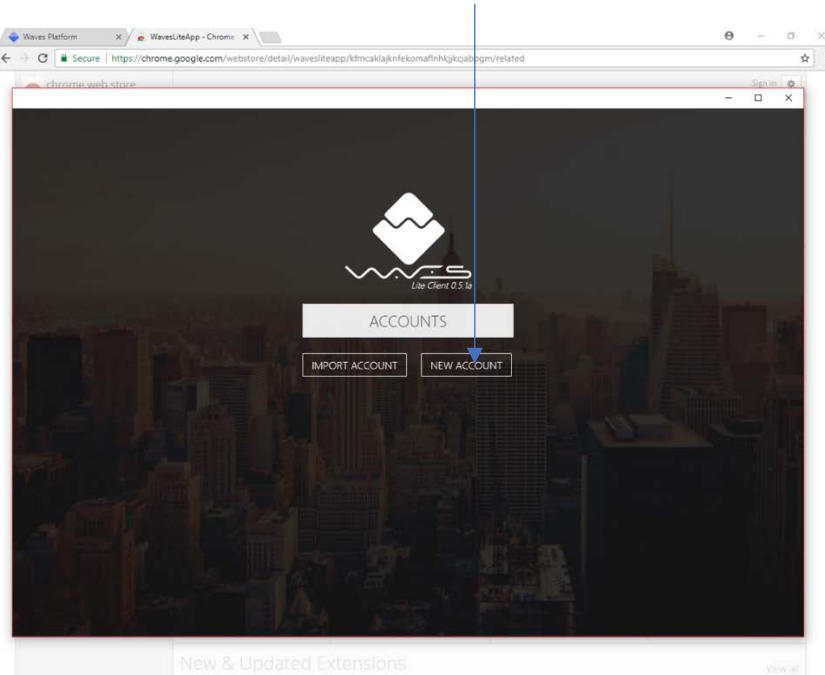

4. A popup window will appear as below, Click "Add app" in the Popup Window and the WavesLiteApp will install.

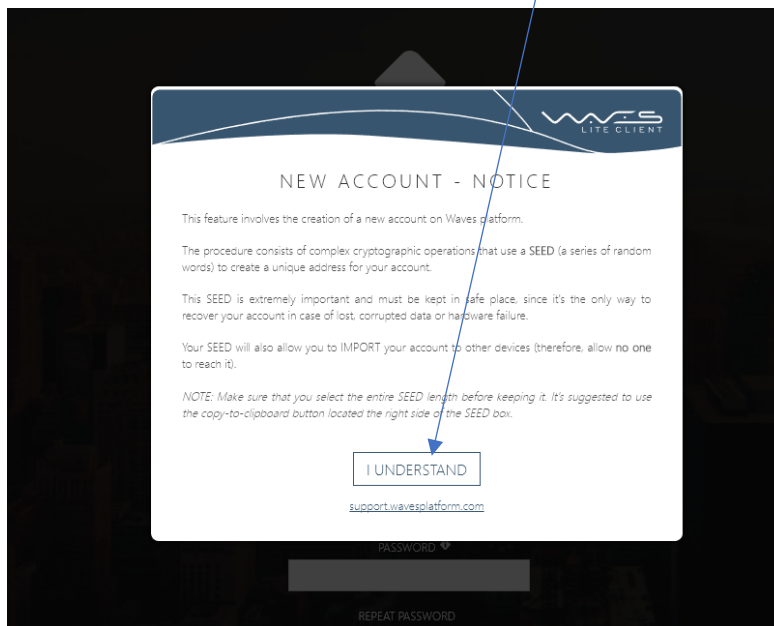

5. Your Apps screen will now have a link for WavesLiteApp as below. Click the WavesLiteApp Icon

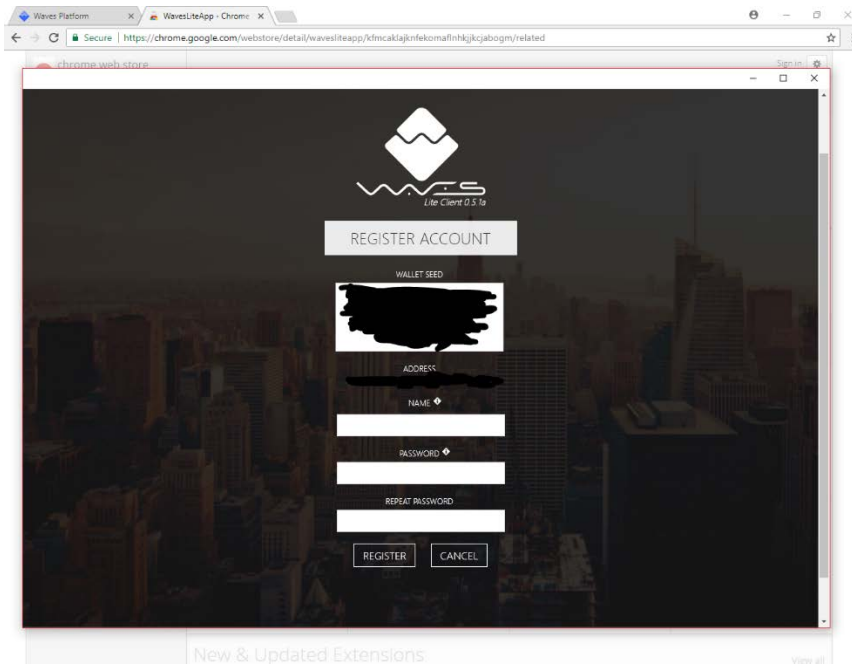

6. You will see the below screen appear: Click “NEW ACCOUNT”

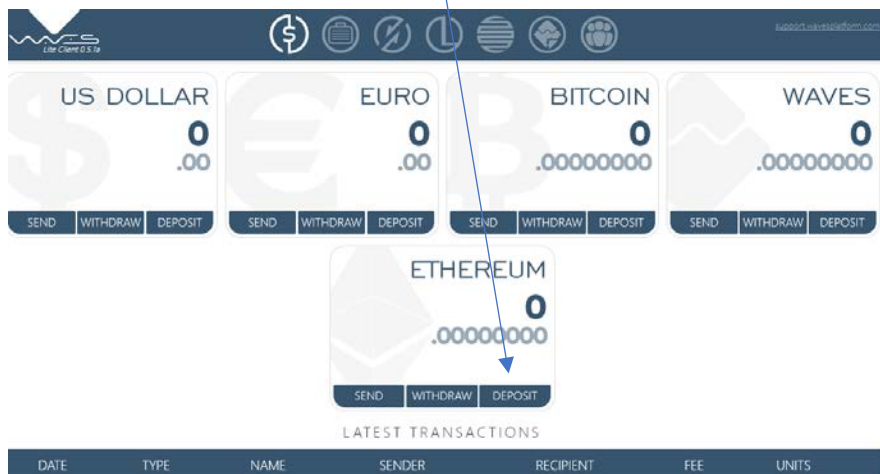

7. Read the text carefully. IT IS ABSOLUTELY ESSENTIAL THAT YOU KEEP YOUR WALLET SEED SAFE AND CONFIDENTIAL. THE WALLET SEED GIVES ACCESS TO YOUR WALLET SO DO NOT LOSE IT. When you are ready click “I UNDERSTAND”

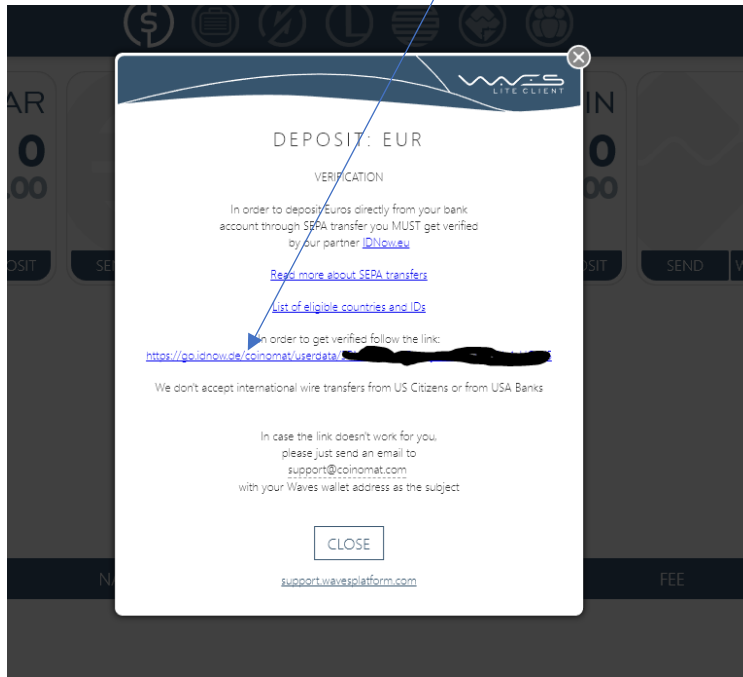

8. You will be presented with the “REGISTER ACCOUNT” screen as below. As this is a real person’s account, we have redacted the WALLET SEED and ADDRESS. Make a careful note of both and then complete the NAME & PASSWORD fields. Click “REGISTER”

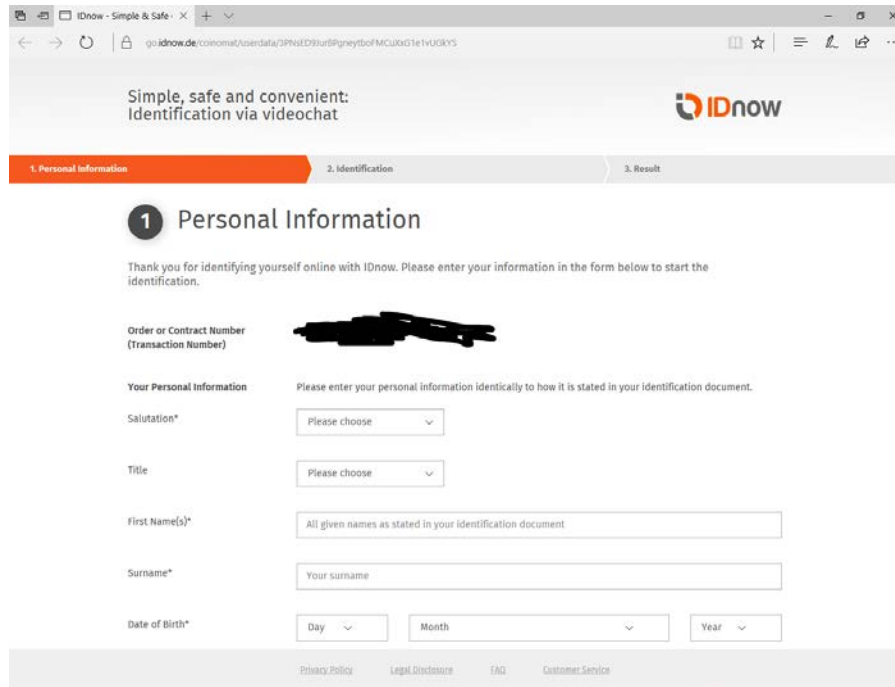

9. You will now see the following screen and your account is setup. Next you will need to add some assets such as USD or EUR. Now click deposit

10. You will see the following screen. Provided you are in one of the supported countries (which is visible from the link) you may now click the verification link.

11. A browser window will open and you will be at www.idnow.de who are a Waves partner responsible for ID verification. The screen will look as below:

12. Complete the online form which is self-explanatory and then follow the instructions on the screen to either use your Android/Apple smart phone or computer/webcam to complete the ID verification.

13. Once the verification process has been completed you will receive an email with the bank wire transfer instructions to credit your new WavesLiteApp wallet. This can be done using your normal online banking. It will take approximately 3 days for the money to arrive in your waves wallet.

14. Due to international anti-money laundering regulations, www.idnow.de may ask you to upload a pdf of the last bank statement of the account which you wired the money from so please bear this in mind when deciding what bank account to credit your Waves account from.
