

## IMPORTANT COVID-19 (CORONAVIRUS) MESSAGE

Interventional Pain Management & Ortho Spine Center would like to assure you that as we closely monitor the latest developments of COVID-19 with public health officials, **we will continue to operate with our normal hours of operation.**

Our medical staff are fully trained in safety procedures and protocols and will follow the most current guidelines in the prevention of the spread of COVID-19. We have implemented rigorous cleaning procedures and have set up extra hygiene stations in our reception areas and exam rooms for you to use when you come in for your appointment.

The safety of our patients, staff, associates, and the general public is our top priority. As a reminder, the best prevention you can take includes washing your hands frequently, using hand sanitizer and limit unnecessary travel.

Please find our practice screening questionnaire that you can quickly go through to see if you are at risk. The most common symptoms of COVID-19 are fever, cough, shortness of breath and breathing difficulties. If you are experiencing these symptoms, have a concern regarding international travel in the last month, or you have been in contact with someone who tested positive for COVID-19; please contact your primary care physician or the health department.

Thank you for choosing Interventional Pain Management & Ortho Spine Center for your interventional pain management needs. We are committed to providing the highest quality of care at our offices.
