

279 Rosendale Road

When a property developer was looking to convert a disused old dairy into a 34 unit residential development, the project architect contacted us to help with both the pre-application and planning application for the scheme.

Mesh reviewed the application and made suggestions for suitable sustainable measures to be implemented and prepared a supporting statement for initially pre-app and then planning submission.

We have successfully completed

- Sample SAP calculations
- Pre application sustainability statement
- Planning application sustainability statement
