There's so much to love about the CardPointe Platform.

With live transaction data at your fingertips, CardPointe will become a critical tool in running and growing your business.

Virtual Terminal | CardPointe Terminal | CardPointe Mobile App

Powerful Processing
Easily process transactions and perform actions against completed transactions - including void, refund, re-process and emailing receipts

Real-Time Reporting
Seamlessly manage processed payments and view full transaction lifecycle reports in real-time

Integration
Enhance any software or business application with secure payment acceptance via our APIs, SDKs and out-of-box integrations
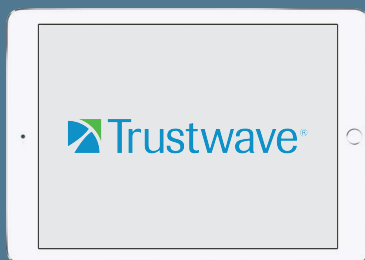

Tokenization
The CardSecure security solution uses patented tokenization methods to protect cardholder data, resulting in a significant PCI scope reduction

Trustwave
Single Sign On

Now you have one less username and password to remember.

CardPointe provides a direct avenue to your Trustwave account, making it simple to access your annual PCI questionnaire or complete your PCI initiatives.

PCI Wizard

Custom security policies

TrustKeeper Agent for compliance monitoring

Vulnerability scanning

To access Trustwave, simply click any of the PCI links found in the *My Account* section of CardPointe — it's that easy!

Securely process payments - anywhere, anytime.

Transform your computer into a powerful terminal with CardPointe's Virtual Terminal.

Accept credit/debit cards and eChecks by keying in cardholder data or using a variety of device options.

Recurring Billing

Configure bill plans with a few clicks of the mouse. Select intervals of days, weeks, months or years based on cancellation, date or number of payments.

Customer Profiles

Customize customer profile fields so you can save the information you need. You can even store one or more cards for future transactions.

Interchange Optimization

The Virtual Terminal automatically processes Level II and Level III data to ensure you receive the lowest possible rate for each transaction, guaranteed.

Additional Security

Point-to-Point Encryption is the only way to truly protect in-store transactions. All sensitive data is instantly encrypted upon swipe/dip, making it possible for you to accept payments with ease of mind.

To order the CardPointe Terminal, visit shop.cardconnect.com.

Live transaction data, directly from your pocket.

Extend the benefits of the CardPointe platform to your mobile device.

Processing and managing payments is a breeze with CardPointe Mobile.

Payment Acceptance

Use the Virtual Terminal screen to securely accept all major credit cards via key entry or a connected device.

Reporting On Demand

Take advantage of the Reporting dashboard to obtain key sales and transaction data, or access any transaction to drill into the details of a particular payment.

Transaction Management

View transaction statuses and perform actions against any completed transaction. Even better, you can access transaction trends, such as batches by card type, authorized vs. captured and previous day sales by card type.

Expert Tip

Add the CardPointe Mobile Device to your payments arsenal for the ultimate on-the-go experience - complete with fingerprint signature!

> **To access CardPointe on your mobile device,** *download the app right from the Apple® or Google Play® stores.*

THE TOP FIVE

things you can accomplish with CardPointe -
both on the mobile app or any browser!

◉

1. View live sales data for that day, filter by location or sales channel **(Batch Report)**

2. Check when funds are deposited in your bank account **(Funding Report)**

3. Save a customer profile for future billing or marketing initiatives **(Transaction Report)**

4. Void or refund a transaction **(Transaction Report)**

5. Set email alerts for chargebacks, declines, statements and much more **(Settings)**

Your One-Stop CardPointe Shop

You're Safe With Us

With our patented tokenization and P2PE

CardSecure safely stores your customers' sensitive data, removing all risk of being hacked.

That way, the burden and cost associated with PCI compliance is reduced to its lowest possible level.

CardSecure is also omni-channel,

so you can feel safe knowing that all of your transactions receive the same level of security, no matter the sales channel.
