PRODUCT PROPERTIES:

Specific Gravity:	1.28
pH:	6.8– 7.8
Appearance:	clear nearly colorless
Odor:	no odor, or mild ammonia

GENERAL PRODUCT INFORMATION:

NACHURS P-Focus is manufactured by utilizing quality raw materials including ammonia, urea, phosphoric acid and potassium hydroxide to provide a very agronomically efficient source of N-P-K. The quality of the raw materials used to formulate NACHURS P-Focus:

- maximizes plant nutrient solubility
- minimizes salt index
- minimizes equipment corrosion
- allows good cold weather storage
- is plant safe at recommended rates

One hundred percent of the phosphate is present in the orthophosphate form that is immediately available for plant absorption and metabolism. During times of limited phosphate and potassium availability (eg: cold and wet spring soil conditions present at planting), NACHURS P-Focus provides a phosphate and potassium source that is positionally and nutritionally available.

FIRST AID: Please see MSDS sheet for more information.
