One of Google's main guiding principles is to "focus on the user".

Making your site as user friendly as possible can be the key to success.

Benefits:

- Shortens the amount of clicks a customer uses to accomplish a task.
- Keep customers on your site and reduces your website bounce rate.¹
- Create easy user-friendly one-click interactions.
- Encourage more customers to contact your business or take action online.
- Convert visitors into users, leads, or customers.

^{1.} Bounce rate represents the percentage of visitors who enter the site and then leave ("bounce") rather than continuing to view other pages within the same site. ©2020 Thryv, Inc. All rights reserved. THRY103_0820

Thryv widgets are compatible with most popular website builders/host and many more!

Adding Thryv Website Widgets to your website is simple:

- 1. Inside Thryv left navigation pane, click on Online Presence > Website Widget.
- 2. Click on Add to website under the Client Portal Widget option.
- 3. Copy Code and Paste code to the bottom of HTML Page.

Note: Adding the HTML code to the Header/Footer of your site ensures the presence of the widgets on all pages with proper floating/movement of widgets with the pages. Some site builders may have limitations to how and where widgets can be added pending the package/subscriptions. Customer may need to reach out to their specific site support department for more assistance.
