A warm family welcome...

BRITISH MADE

Town and Country Fires was founded back in 1977 by Alan and Ruth Thurlow as a way to diversify from farming. The original premises was an old Cow shed on their farm in a valley called Great Fryup Dale in the heart of the beautiful North Yorkshire Moors. When the business grew they decided to relocate to Pickering so that they would be in a central location for their customers. A few years later the neighbouring villages started to get a mains gas line installed which meant the Wood Burning sales started to drop. Alan was frustrated that the Gas fires didn't look realistic enough, so a plan was hatched! Everything was very low tech back in the 1980's, with his thoughts drawn out on cornflake packets and stuck together. Once he was confident they were what he wanted, they were then made out of steel. The Gas fires and Stoves made a big impact within the industry and several of Alan's designs were sold onto other Gas fire companies.

The business has grown throughout the years and now employs over 20 local men and women. Alan and Ruth's children Nina and Philip, are heavily involved in the business. Nina is the Quality Manager and runs the accounts. Philip has taken over from his Dad and now runs the factory and designs/develops new stoves. Town and Country Fires manufacture and develop all their stoves in their factory in Pickering. The manufacturing process has changed over the years.

The factory now boasts four robotic welders, a state of the art laser cutter, and a 85 ton precision Press brake, all of which need our highly trained members of staff. We have a computer system that can generate prototype models, control the laser and press brake with lights out capability. The process of making a stove starts with a flat piece of steel and from the moment the steel enters the factory, the journey begins. From laser cutting, to precision bending, to welding the list is endless but the stove goes through a number of stages to get it to its final destination. We take a huge amount of time, effort and pride to make, assemble and pack the stoves so they arrive in the same condition that they left us. We only use the best British steel and best quality components to create beautifully manufactured stoves. We have a highly skilled work force, some of them have been with us for over 25 years. We are so lucky to have very dedicated members of staff both in the factory and the showroom who turn their hands to all sorts to help the business. There are some exciting times ahead with great innovative designs coming in the future. Thank you to all our past and present customers for all your continued support, we really do appreciate it x

Quality products...

The full range of solid fuel and wood burning stoves all carry certified efficiency ratings and comply with BS EN 13240 : 2001+ A2 : 2004 and BS EN 13229 : 2001 + A1: 2003 + A2 : 2004. They are also Hetas approved and C.E. marked.

All our stoves have an air wash to the glass, which works extremely well. Most have tertiary air at the rear of the fire box too, which burns off gases at the back of the fire that do not normally ignite, thus giving a very clean burn, causing less pollution in the atmosphere. Town and Country Fires are one of the very few stove people who actually make the stoves from start to finish.

We design and perfect the combustion in the stoves, so that they out-perform some of the very best stoves across the world. We buy best British steel, cut it accurately with a laser cutter, then bend it with a C.N.C. press. The metal formed shapes are then passed to our robot welder which produces high penetration and extremely accurate joints. Once the bodies have been produced in this way, they are finished by hand, which includes shot blasting to enable a good penetration of paint. Some of the stoves are completely hand made, by staff who have worked for us for many years. The smoke control Little Thurlow for burning wood in smokeless areas, has been put through stringent testing and has been approved with slight modifications, which shows how clean burning all of the Town and Country stoves are.

town & country fires

BRITISH MADE

Our stoves...

Cast Iron Or Steel Stoves? Steel is stronger and more durable as the seams are welded together, whereas cast iron stoves are bolted and sealed together with fire cement or rope. In time the bolts corrode and the stove is not airtight and not usable. Also cast iron is very brittle and may crack if heated up too quickly. The Town and Country stoves will expand and contract through operation and should last for 50 years or more. In the past bridges were all built of cast iron, but for the same reasons, they are not any more.

A Town and Country stove is one of the most efficient stoves on the market, up to 85% efficient as you can see by reading our brochure, so you can be assured you are buying a top quality stove at a reasonable price, which will keep your family and home warm for many years to come.

Burning Wood Wood ought not to be burnt on a stove if it is not seasoned and dry, you pollute the atmosphere, tar up your chimney, and chimney fires are caused. Wood needs to be no more than 20% moisture content, and when buying wood straight from a local log supplier, they will not usually be dried and seasoned. Logs don't dry in a garage, they need to be out in the open, preferably with just a roof or cover over them. When seasoned wood is burnt on a very efficient stove, you can produce over 5kW of heat per hour using only 1.5kg of wood - which is the equivalent of two hard wood logs, roughly 6" long x 3" diameter.

A Carbon Neutral Fuel When trees grow they absorb carbon dioxide and generate oxygen. When wood is burnt in a stove or left to rot, it will release the same amount of carbon dioxide.

Internet Policy Town and Country Fires recommend that customers buy Town and Country Stoves only from a local, recognised stockist. If products are purchased from a non-approved source, we cannot guarantee that the product purchased is an up-to-date model with the latest features, nor can we be sure that the potential customer will have been given the best advice regarding suitability and installation. We point out that there is no contract between Town and Country Fires and the customer, their contract is with the supplier and our contract is with the dealer only. A customer buying through the internet or out of serviceable area can have no redress via us and will be passed back through the chain if necessary.

5kW

Whisperdale

town & country fires

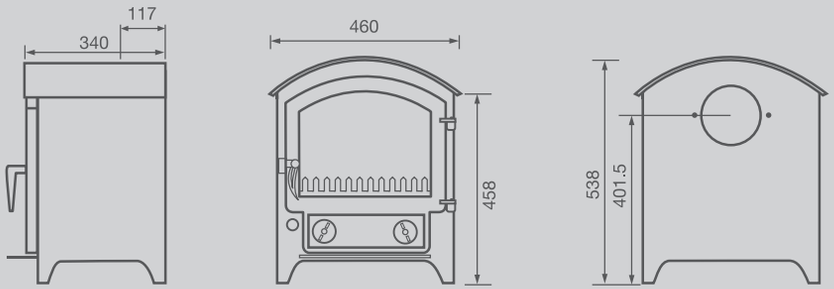
- 5kW output
- Multifuel
- British Made
- 78.9% Efficient on Wood
- 79.6% Efficient on Solid Fuel
- 6" Diameter Flue
- Max. Log Length 350mm
- Tertiary Air
- Riddling Grate
- Brass or St/Steel Fittings
- Weight 61kg

The Whisperdale is suitable for a small to medium room, with an attractive curved top. There is a good air wash facility and an additional turbo burner, burning off gases towards the rear of the stove which normally do not ignite. This means more efficiency, excellent combustion and a very clean burning stove.

UP TO 79.6% EFFICIENT

There is a heat shield supplied with this free standing stove, which fits on the back panel.

If this is fitted, allow an additional 30mm to the depth shown on this diagram.



Whisperdale Whisperdale is a beautiful valley near Scarborough, but a world away from the hustle and bustle of the town. A picturesque valley with wonderful views and fantastic walks.

5kW

Dalby SC With or without Log Store

town & country fires

- 5kW output
- Multifuel
- British Made
- Optional Outside Air Kit
- Built in Tertiary Air
- Suitable for 12mm hearth
- 78.9% Efficient on Wood
- 79.6% Efficient on Solid Fuel
- Maximum log length 350mm
- 5" diameter flue (top flue only)
- Brass or St/Steel Fittings
- Weight 61 kg

The Dalby multi-fuel stove is the smallest of our new range of stoves at 5kW. The Dalby is controlled by two simple levers which are below the door, these levers take the place of the spin wheels. One lever controls the primary air and the second lever controls the secondary and tertiary air. Once the fire is established, there is no need to use the primary air lever except with smokeless fuel, even when re-fuelling.

Dalby Outside Air Kit The Dalby can be supplied with an outside air kit, which is now a requirement in a lot of new build properties.

Both versions of the Dalby are suitable for a 12mm hearth.

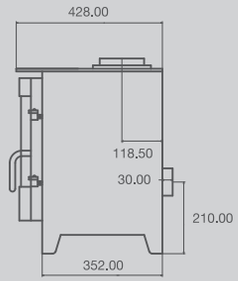
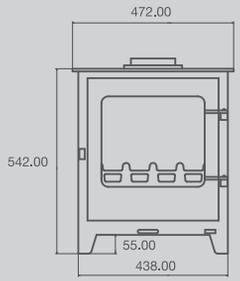
Dalby with Log Store

Dalby Low





Dalby Forest The Dalby is named after the Great Yorkshire forest 'Dalby Forest'. The forest is situated on the edge of the North Yorkshire moors and a few miles from Pickering. The forest is full of wildlife and has a large variation of tree species. The forest is also used for leisure activities like mountain biking and walking.

CAFÉ
MUSEE

Ryedale

5kW

town & country fires

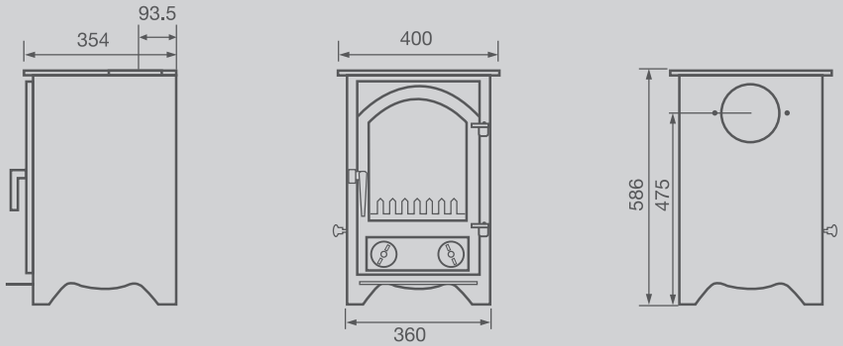
- 5kW output
- Multifuel
- British Made
- 78.9% Efficient on Wood
- 79.6% Efficient on Solid Fuel
- 5" Diameter Flue
- Max. Log Length 290mm
- Riddling Grate
- Brass or St/Steel Fittings
- Weight 67kg
- Tertiary Air

The Ryedale is the smallest multi-fuel stove from Town and Country Fires, ideal for a small room. The flue outlet can be top or rear, and although the stove is compact, the output is still 5kW. The main air is controlled by two spin wheels near the bottom of the door and the two top spin wheels allow air into each side of the stove where it is warmed. Then the warm air comes out of a vent behind the glass, thus keeping the glass beautifully clean.

UP TO 79.6% EFFICIENT

There is a heat shield supplied with this free standing stove, which fits on the back panel.

If this is fitted, allow an additional 30mm to the depth shown on this diagram.



Ryedale Ryedale is a beautiful green area in North Yorkshire. Towns within Ryedale include Helmsley, Malton, Pickering. The area is also a very popular holiday retreat for visitors far and wide.

LIVE TO RIDE
RIDE TO LIVE

Farndale

5kW

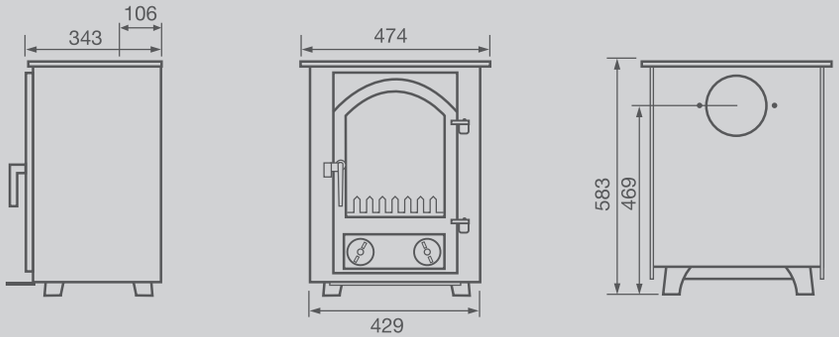
- 5kW output
- Multifuel
- British Made
- 81.1% Efficient on Wood
- 83.7% Efficient on Solid Fuel
- 6" Diameter Flue
- Max. Log Length 350mm
- Tertiary Air
- Riddling Grate
- Brass or St/Steel Fittings
- Weight 68kg

The Farndale is a robust stove, compact but with a deceptively roomy firebox, and an output of 5kW. There is a strong cast iron door, and the fire is kept safe behind a large glass area. There is a multi-fuel grate which riddles from the outside, and like all Town and Country clean burning stoves, there is a good sized ash pan to make ash removal easy.

UP TO 83.7% EFFICIENT

There is a heat shield supplied with this free standing stove, which fits on the back panel.

If this is fitted, allow an additional 30mm to the depth shown on this diagram.



Farndale Farndale is a valley situated in the heart of the North Yorkshire Moors. Farndale is famous for their display of wild daffodils that can be seen around Easter time each year. Farndale is mainly made up of an agricultural community and miles of beautiful Yorkshire dry stone walls.

Little Thurlow Standard

Little Thurlow

* Standard or Smoke Control
* With or without Log Store
* With or without Curved Door

5kW

town & country fires

- 5kW output
- Multifuel
- British Made
- 78.9% Efficient on Wood
- 79.6% Efficient on Solid Fuel
- 6" Diameter Flue
- Suitable for 12mm hearth
- Max. Log Length 350mm
- Tertiary Air
- Riddling Grate
- Brass or St/Steel Fittings
- Weight 61kg

This stove is designed specially for the lower fire opening, being only 516mm high but with a good sized glass giving a wonderful view of the fire. The turbo burner (tertiary air) brings air into the stove towards the back of the fire, allowing plenty of oxygen into the rear and top of the stove, thus burning off gases which normally do not ignite. This give the Little Thurlow more efficiency, better combustion and less pollution. There is also a heat shield supplied with this free standing stove, which fits on the back panel. If this is fitted, allow an additional 30mm to the depth shown on this diagram.

Smoke Control Little Thurlow This efficient stove has been developed as an exceptionally clean burning stove so that it is approved by DEFRA to burn wood in a smoke control area.

Saltburn With or without Log Store

5kW

High Efficiency Stove 85.6%

BRITISH MADE

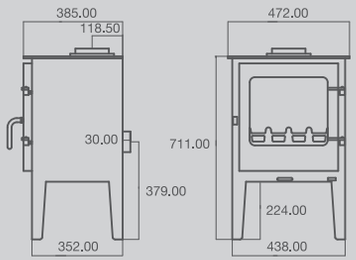
- Smoke Control
- Multifuel
- 5" flue
- 5kW
- 85.6 % Efficient
- Tertiary Air
- Optional Remote Control
- Suitable for a 12mm Hearth
- Suitable for both inside and outside air
- Brass or Stainless Steel Handle
- Stainless Steel Ashpan
- Distance from combustible material: Back 500mm // Side 650mm
- Max log length - 350mm
- Weight 70kg

The Saltburn is a great new addition to our range, it boasts modern looks and has a beautiful retro feel whilst using highly advanced technology. The stove comes with the option of using the air from within your room or you can connect to the outside of your house with the "outside air kit". The Saltburn is designed and engineered by our highly skilled work force in our factory in Pickering like the whole range from Town and Country Fires. The Saltburn has very discreet air controls located under the door which are very responsive and highly effective. We have worked long and hard to make the glass viewing area as large as possible on this stove without compromise. The low version of the stove will fit into most fireplaces, traditional or contemporary. The taller version lends itself to a more contemporary room setting. Both are available as a Defra Approved Smoke Control stove.

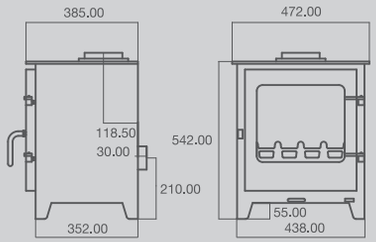
Smoke Control Saltburn This efficient stove has been developed as an exceptionally clean burning stove so that it is approved by DEFRA to burn wood in a smoke control area.

UP TO 85.6% EFFICIENT

Saltburn with Log Store



Saltburn Low



Saltburn Saltburn is a seaside resort in the region of Redcar and Cleveland, but is still a part of North Yorkshire. Saltburn is known for having one of the world's oldest water-powered cliff lifts and of course the Saltburn pier that opened in 1869.

Caedmon

town & country fires

7.5kW

- 7.5kW output
- Multifuel
- British Made
- Optional Remote Control
- Optional Outside Air Kit
- Built in Tertiary Air
- Suitable for 12mm Hearth
- 76.2% Efficient on Wood
- 78.3% Efficient on Solid Fuel
- Maximum log length 380mm
- Riddling Grate
- 6" diameter flue (top flue only)
- Brass or St/Steel Fittings
- Weight 92 kg

The Caedmon multi-fuel stove is an award-winning design, with up to the minute technology. The controls have been simplified, there are two levers below the door, one controls the primary air and the other controls the secondary and tertiary air. These take the place of spin wheels, once the fire is established, there is no need to use the primary air except with smokeless fuel, even on re-fuelling. The **Caedmon Option** has all of the same features, it also has a wider top plate with air vents at the sides and convection panels, therefore reducing the distance to combustibles at the sides to 300mm.

Caedmon Outside Air Kit The Caedmon can be supplied with an outside air kit, which is now a requirement in a lot of new build properties and this version is also available with remote control if required. Both versions of the Caedmon are suitable for a 12mm hearth.

Langdale With or without Log Store

7.5kW

SOLID FUEL UP TO 80.9% EFFICIENT

WOOD UP TO 79.6% EFFICIENT

- 7.5kW output
- Multifuel
- 6" flue
- Bespoke Engineered Handle
- View from 3 sides
- Tertiary Air
- Discreet Convection Chambers
- Stainless Steel Ashpan
- Suitable for both inside and outside air
- Optional Remote Control
- Low and High model available
- Max log length - 400mm
- Weight - 100kg

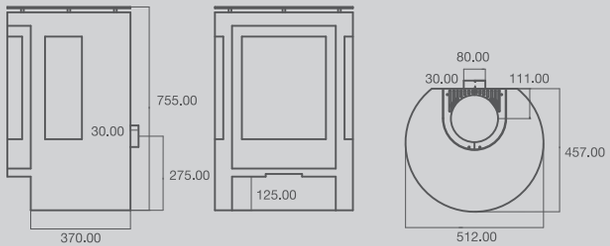
The Langdale is a new innovative stove that really brings something new to the Town and Country Fires range. Designed in house by our own designer and built and engineered in our factory in Pickering. This is a fantastic quality stove and as usual up to our high standards. We have designed two different heights of the Langdale to enable the stove to fit into either an open plan room or a smaller fireplace. The overall look of the stove lends itself to either a modern contemporary room setting or a traditional Inglenook. The stove is very controllable with a great clean burn system and as an added bonus, the flames can be viewed from three sides. Unlike most stoves in this sector, Town and Country Fires have developed the Langdale to burn as a Multi fuel Stove, which offers you more flexibility if your dry log supply runs out. The stove works great as a log burner and offers you the chance to put solid fuel on to increase the burn times. The Langdale is available as a Defra Approved Smoke Control stove.

Langdale Outside Air Kit The Langdale can be supplied with an outside air kit, which is now a requirement in a lot of new build properties and this version is also available with remote control if required.

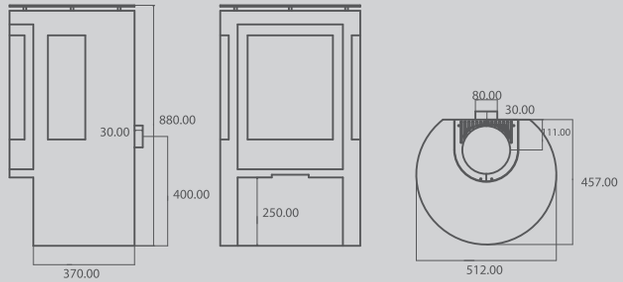
Smoke Control Langdale This efficient stove has been developed as an exceptionally clean burning stove so that it is approved by DEFRA to burn wood in a smoke control area.

BRITISH MADE

Langdale Low



Langdale with Log Store



Langdale Langdale is named after a valley called Langdale End. It is set within the North York Moors National Park and is on the edge of Dalby Forest. Langdale End has a small cluster of buildings, one being The Moorcock Inn, which has been owned by the same family for over 100 years.

8kW

Bransdale

town & country fires

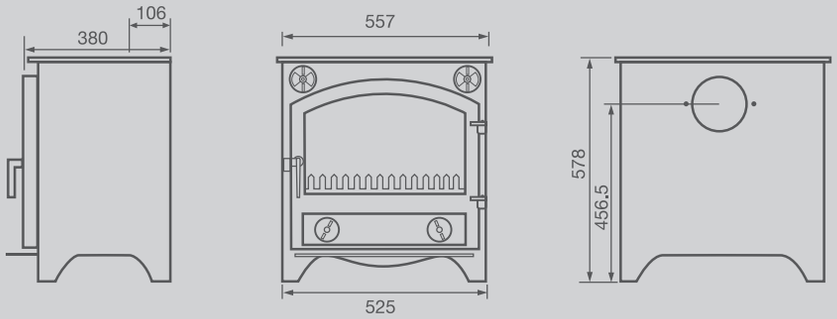
- 8kW output
- Multifuel
- British Made
- 74.4% Efficient on Wood
- 79.3% Efficient on Solid Fuel
- 6" Diameter Flue
- Max. Log Length 440mm
- Brass or St/Steel Fittings
- Weight 100kg

The Bransdale has exceptionally good combustion and is instantly controllable. Once a good fire is established, the stove can be controlled by the two air vents near the top of the stove, making it easy to operate. The Bransdale is beautifully proportioned and the only way to appreciate this remarkable stove is to see it working. The multi-fuel grate will burn wood or solid fuel without any alterations to the grate. As well as the flat top version, there are two optional slide on canopies available for the Bransdale, both available as either a top or rear flue outlet. With a high canopy on a Bransdale, the overall height including stove measures 940mm, and with a low canopy 805mm.

UP TO 79.3% EFFICIENT

There is a heat shield supplied with this free standing stove, which fits on the back panel.

If this is fitted, allow an additional 30mm to the depth shown on this diagram.



Bransdale Bransdale is a beautiful valley set within the North Yorkshire Moors, North of Helmsley. Much of the dale is owned by the National Trust and is said to be one of the most isolated dales in the moors.

- 70.7% Efficient on Solid Fuel
- 6" Diameter Flue
- Max. Log Length 400mm
- Tertiary Air
- Riddling Grate
- Brass or St/Steel Fittings
- Weight 116kg

The Welburn is one of the new and exciting range of contemporary wood and solid fuel burning stoves from Town and Country Fires. It is available in two styles, one low version and one higher design with a built-in log store. The door has a magnificent curved glass giving an amazing view of the fire, this is certainly a focal point for any room.

There is a heat shield supplied with this free standing stove, which fits on the back panel. If this is fitted, allow an additional 30mm to the depth shown on this diagram.

Byland

town & country fires

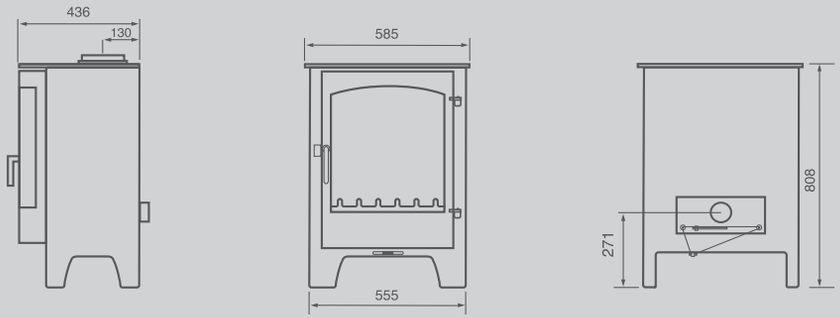
10-14kW

- Up to 14kW output
- Multifuel
- British Made
- Optional Remote Control
- Optional Outside Air Kit
- Built in Tertiary Air
- 77.2% Efficient on Wood
- 70.7% Efficient on Solid Fuel
- Maximum log length 400mm
- Riddling Grate
- 6" diameter flue (top flue only)
- Brass or St/Steel Fittings
- Weight 120 kg

A truly remarkable stove which will be a talking point for years to come. The large curved glass gives a wonderful view of the fire and with the air wash the glass will stay exceptionally clean. The Byland is capable of up to 14kW output, but is so controllable it will run happily at 5kW. As with all our new range of stoves, the Byland is controlled by two simple levers which are below the door, and these levers take the place of the spin wheels. One lever controls the primary air, and the second lever controls the secondary and tertiary air. Once the fire is established, there is no need to use the primary air lever except with smokeless fuel, even when re-fuelling.

Byland Outside Air Kit The Byland can be supplied with an outside air kit, which is now a requirement in a lot of new build properties and this version is also available with remote control if required.

UP TO 77.2% EFFICIENT



Byland Byland Abbey is a small village in Ryedale. Within the village there is a ruined abbey and many of the remains of the abbey can still be seen. The abbey is now cared for by English Heritage.

Runswick Mk III

Runswick Inset - Mk I, Mk II & Mk III

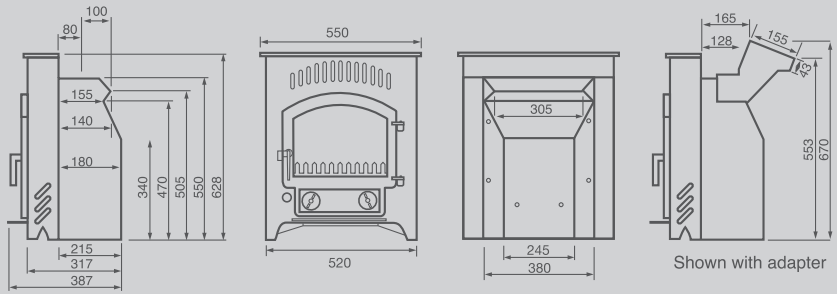
town & country fires

- 4kW output
- Multifuel
- British Made
- 79.9% Efficient on Wood
- 74.8% Efficient on Solid Fuel
- Suitable for a standard chimney, or with a 6" adaptor to flue liner
- Max. Log Length 300mm
- Riddling Grate
- Brass or St/Steel Fittings
- Weight 72kg

The Runswick is an inset stove, designed so that it is usually possible to install the stove without removing the existing fire back or boiler, without a lot of building work or alterations to the existing fireplace. The Runswick will transform a room by bringing the advantages of a stove, with the minimum upheaval. There will be a marked improvement in efficiency, together with the peace of mind and safety of a stove. As well as radiant heat from the front of the stove, the Runswick draws in cold air from the room at each side of the front frame, this air is then warmed and convected out through the vents above the door, total output being 4kW.

UP TO 79.9% EFFICIENT

	WILL FIT AN OPENING		
	Width		Height
Min:	390mm	x	555mm
Max:	470mm	x	600mm



Please note: The Mk III lid and door is 45mm deeper than other models (Not Shown)

Runswick Runswick Bay is a pretty coastal village sandwiched inbetween Whitby and Staithes. The picturesque village has a beautiful sweeping sandy beach and is overlooked by a mixture of cottages. The village is a haven for artists and holiday makers who spend their time fossil hunting, building sand castles and walking.

Rosedale Inset - Standard or Smoke Control

town & country fires

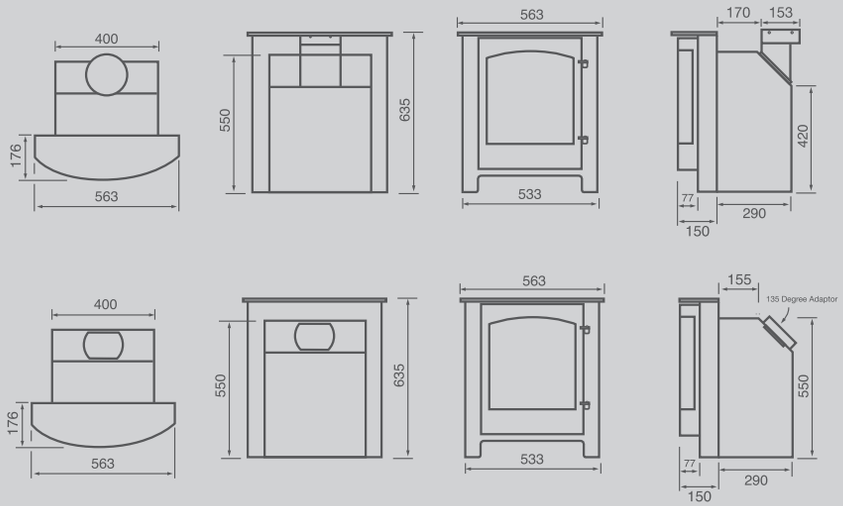
41kW Inset

- 5kW output
- Multifuel
- British made
- 78.4% efficient on wood
- 77.2% efficient on solid fuel
- Suitable for a standard chimney, if a liner is necessary 150mm diameter
- Max. log length 300mm
- Brass or st./steel fittings
- Weight 80 kg

The Rosedale inset stove is a smart, contemporary inset stove with a big curved glass for a good view of the fire. It has been designed to fit into a standard fire opening with a chair brick removed. This provides a good sized firebox which is suitable for logs as well as solid fuel. In addition to the radiant heat, there is a convection system bringing warm air out through the vents above the door, giving a total heat output of 5kW.

	WILL FIT AN OPENING		
	Width		Height
Min:	400mm	x	570mm
Max:	470mm	x	600mm

Shown below with optional adaptor for flue liner.



UP TO 77.4% EFFICIENT

Rosedale Smoke Control Inset This efficient stove has been developed as an exceptionally clean burning stove so that it is approved by DEFRA to burn wood in a smoke control area. Outer appearances are the same as the standard Rosedale.

Rosedale Rosedale is a beautiful valley full of history situated within the North York Moors. Famous for its bustling industry from 1850s to 1920 which brought 5000 miners into the valley. Nowadays the valley is farmed and is great for walking, cycling and enjoying the spectacular views of the valley.

Stove Colour Options

Pewter	Rich Brown	Honey Glow
Sky Blue	Charcoal	Metallic Blue
Moss Green	Mojave Red	Shimmering Rose

Our Stoves come as standard in black but the whole range is available in the colours shown (left) at a small extra charge. The special paint we use is extremely resistant to high temperatures.

Please note that the colour chart is intended as a guide only

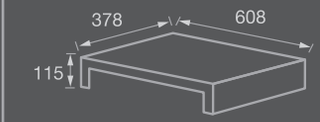
10 YEAR Guarantee

Free 10 Year Guarantee

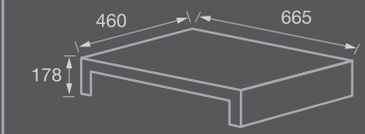
Town and Country Fires recommend that stoves are purchased only through a local, approved stockist, and installation must be undertaken by a qualified fitter. There is a Guarantee form with every stove, this covers the workmanship of the stove for 12 months, but as long as the guarantee form is completed and returned to us and the above conditions have been complied with, then the guarantee is upgraded to ten years. Your local approved stockist will be able to advise you on suitability and installation. They will also be able to supply you with any spares in the future.

Log Store Plinth

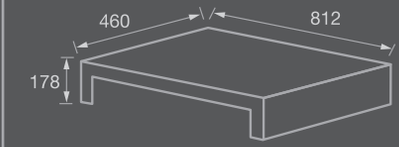
Small Plinth



Medium Plinth



Large Plinth



These log store plinths are designed for Town & Country stoves and are available in three sizes

Remote Control

Remote Control

Remote Control Air Intake Box

The Remote Control is currently an option on three of our stoves and doesn't require mains power, as it is battery operated by a 9V and 4 x AA batteries (supplied).

The handset is the size of a small TV remote and controls the amount of air entering the stove, allowing you to easily adjust the flames and heat from the comfort of your sofa or favourite armchair.

The air intake is positioned on the outside wall of your home where it is cool, away from the heat of the stove.

It is possible to adjust the air intake anywhere between closed and fully open. The remote sensor is a small, unobtrusive black box which can be positioned near the stove.

The remote control is available on the following stoves:

BRITISH MADE

Whitby

UP TO 80% EFFICIENT

- Natural gas
- Driftwood or coal effect
- Manual or remote control option
- 80% efficiency
- British made
- Hidden front control
- Brushed steel or brass fittings
- Class1 or Class2 (5" diameter or pre-cast)
- Top flue outlet or rear closure plate version
- Variable heat output, up to 5.4kW
- Safety features fitted

The Whitby natural gas stove combines the appeal of a real fire with the control and convenience of gas, giving instant warmth from realistic coal or log effect fire. The large glass door gives a wonderful view of the new fuel beds, the coals are random, mixed coals. A very efficient stove with built in safety features, including an oxygen depletion sensor and a thermal cut-out. Although a larger stove, the input is 6.8kW, so there is normally no need for any extra air vent, but still a good output of 5.4kW, giving an amazing 80% efficiency.

Kirkdale

UP TO 80% EFFICIENT

- Natural gas
- Driftwood or coal effect
- Manual or remote control option
- 80% efficiency
- British made
- Hidden front control
- Brushed steel or brass fittings
- Class1 or Class2 (5" diameter or pre-cast)
- Top flue outlet or rear closure plate version
- Variable heat output, up to 5.4kW
- Safety features fitted

The Kirkdale is a natural gas stove which will look at home in a traditional or contemporary room. Made to suit either Class1 or Class2 flues, the flue outlet can be from the top (5" diameter), or from the rectangular spigot from the rear, for use in pre-cast flue blocks with the closure plate supplied.

The Kirkdale is fitted with a thermal cut-out for your safety in down draft situations, along with an oxygen depletion sensor.
