ULTRA **REALISTIC**, NATURAL FLAME PICTURE.

The ability to control fire was a dramatic change in the development of humanity. Among many things, it provided warmth, light and security, allowing us the freedom to pursue our dreams and passions.

We believe that this base connection still exists and is the reason why we still desire to use a fireplace as the central focal point of our living space.

The Vision Trimline range has been designed with the specific purpose of recreating that instinctive connectivity with nature.

Our innovative fires are skilfully engineered to allow a true trimless aspect. This means no distracting frames or visible mechanical workings - just fire.

Furthermore, meticulous attention has been paid to the realisation of our fuel bed and flame patterns to ensure a perfect recreation of a natural, living fire.

Authenticity is everything.
Accept nothing else.

INSPIRED
& RECREATED

NO CHIMNEY? **NO** PROBLEM.

One of the most innovative aspects of all Vision Trimline fires is that there is no need for an existing chimney to be present. This is all down to the clever features of our balanced flue system.

A balanced flue gas fire is fully room sealed. Not only does this make for a highly efficient and safe appliance, but when combined with our concentric flue components, our fires can be positioned in virtually any part of your home with a relatively simple 'chimney column' built around it.

This may be a typically styled chimney breast positioned against a wall, or a floating pillar in the centre of your room.

We can supply all of the necessary components required to build your chimney - just consult your dealer for further information.

We like to keep things simple. Your toughest decision will be deciding what colour to paint it!

LET THE **FLAMES** BEGIN...

Many Vision Trimline fires are available with a variety of alternative fuel beds and chamber linings. More details of these can be found on page 44.

...AND IF YOU **WANT** TO TRIM...

Vision Trimline fires offer a sense of true minimalist beauty. However, if your home style dictates, there can sometimes be a requirement for a little more flare - even extravagance!

To address this, we have created a range of frames and fireplaces that have a certain synergy with our fires. Sharing the same design ethos and manufactured to the same high standards, we have crafted a range that includes a variety of materials with a wonderful, natural beauty.

The theme here is ‘Harmony’.

From Brazilian slate to Portuguese limestone, each material choice was carefully selected to complement the design whilst not detracting from the visual element of the fire itself.

...DO IT IN **STYLE**.

NATURAL ITALIAN SLATE HEARTH- BRUSHED STEEL PLATE WITH NATURAL ITALIAN SLATE INNER HEARTH (MANTEL NOT INCLUDED)

Custom design your own Vision Trimline TL73h Fireplace

The TL73h trimless with its large glass front allows unrestricted views of the beautiful flames. Its easy to create a unique custom fireplace, the only limitation is your imagination! Create your perfect fireplace in 2 easy steps:

Step 1 - Pick your Mantel
Your mantel impacts the ambiance of your room, this is where your unique style can shine through. There are many options to consider in a variety of materials and designs. Any standard* mantel can be used, please ask your retailer for information.

Step 2 - Pick your hearth and slip set material
Available in natural Agean limestone, natural Portuguese limestone, natural black granite and natural slate as well a stylish brushed steel plate option, complete with natural slate inner step.

NATURAL BLACK GRANITE SLIP SET AND NATURAL BLACK GRANITE HEARTH

NATURAL AGEAN LIMESTONE SLIP SET AND NATURAL AGEAN LIMESTONE HEARTH

* A standard mantel opening should measure 915mm width from inside leg to inside leg and 915mm height from the ground to the underside of the header (leg length). Maximum width allowed: 920mm, Minimum width allowed: 800mm. Maximum height allowed: 930mm, Minimum height allowed: 810mm. Note that the images shown on these pages show mantels with a standard opening. Any mantel used within the allowed range of measurements that differs from a standard opening may result in an altered aesthetic proportion.

TL73h OPTIONAL CHAMBER LININGS

Available as an optional extra for all TL73h fires including TL73h Linear, TL73h Thirlmere and TL73h Torino and TL73h Custom Slip Sets.

DECO BRAZILIAN SLATE FRAME

EVERYTHING YOU NEED IN ONE PACKAGE.

We know the importance of keeping things simple. That's why every Vision Trimline fire comes complete with 'included extras' to help make your purchase as easy as possible.

As standard, all fires come complete with:

- Ecomax remote control - this sleek designed handset features thermostatic control, countdown timer to automatically turn off the fire, and an Ecomax button, allowing random high-low adjustment of the flames to regulate room temperature resulting in 40% energy saving.
- Adjustable legs - allowing you to easily install the fire at your desired height without the need for further, unnecessary building work.
- Control access door - a neat, gloss finish, access system to allow access to the manual fire controls.
- Convection vents - two of these are supplied with each fire to allow convected hot air from the chimney into your room.

NEW DOUBLE BURNER FEATURE

With the exception of the TL38 and TL46 models, all other Vision Trimline fires are equipped with an innovative **double burner** system. This clever feature staggers the flame pattern in two rows and gives an extra sense of depth and realism whilst offering a more economical way to use your fire. At the touch of a button the front burner row remains active whilst the rear burner row diminishes, giving unparalleled visual effect with a reduction of 40% of the heat output. Used in combination with the Ecomax remote control can result in the benefit of reduced running costs of up to 60%.

OPTIONAL **EXTRAS**.
SOMETHING A LITTLE DIFFERENT?

If burning logs are not what you are looking for, then perhaps you would be more interested in an alternative fuel bed for your fire. Below you can see what we have to offer. For that extra WOW factor, why not choose to upgrade to a black mirrored glass lining for your fire chamber and add a reflection to the fuel bed and flames to give a remarkable effect of added depth and detail. Exclusive to the TL73h and TL100 models is option of Anti Reflective Glass. This premium feature cleverly gives the illusion that there is no glass between the fire and you, creating an even more authentic experience. The table opposite shows the options available for each Vision Trimline fire.

GO WiFi FOR MAXIMUM CONTROL

Introducing the latest upgrade option for Vision Trimline fires - the Myfire app. Using wireless technology that connects the fire to your home wifi network, you can now take control using your smartphone or tablet with features such as:

- Temperature adjustment and thermostatic control
- Flame pattern adjustment and animated wave profiles
- Individual user profiles
- Countdown timer
- Weekly programming

The wifi package is available as an optional upgrade for all fires in the Vision Trimline range.

FLUE SYSTEMS

All Vision Trimline fires use a specialised double wall concentric flue system. The THC-CC system is an obligatory and integral part of the complete combustion system and must be used when installing the fire.

THC-CC is made of high quality 0.5mm thick stainless steel AISI 316 inner and AISI 304 outer-liner. A wide range of flue/chimney components allows for easy installation when terminating through the wall or the roof - in an existing chimney or a dedicated fabrication. Please consult your nearest dealer for more details.

The THC-CC system is approved according to CE in combination with all Vision Trimline balanced flue gas fires.
