Traditional and Contemporary
Gas and Electric Stoves and Fires
A Natural Warmth

From our humble origins over 25 years ago on a farm near Dartmoor, renowned for its cold winters, Yeoman has grown to become one of the UK’s leading stove and fireplace manufacturers. Today, Yeoman offers an increasingly diverse range of technically advanced gas and electric stoves and fires in both traditional and contemporary designs alongside the broad selection of solid fuel products with which we started the journey.
The Yeoman Range

Gas Fires and Stoves

Inset Gas Fires ................................................................. 06 - 15
An Inset fire offers the impact of a freestanding stove with the benefit of saving space in the room. Featuring either a traditional or a more contemporary front, each fire in the Inset range has a highly realistic fuel effect and in the case of the CL 530 & CL 670, a stunning glowing ember feature!

Traditional Gas Stoves .......................................................... 16 - 21
When you want to combine the allure of a log or coal fire with the appeal of an instantly controllable source of heat, Yeoman offers a range of expertly crafted, traditionally styled gas stoves that can offer you instant warmth at the flick of a switch. What’s more, opt for a programmable remote control and your stove can be set to automatically turn on or off at times that suit your lifestyle!

Double-Sided Stoves .............................................................. 22 - 23
For a truly impressive centre-piece, the Devon double-sided gas stove brings two rooms together. Providing plenty of ambient warmth, the stove is sure to be a natural gathering point for friends and family. Choose from a number of styling options including four colour finishes to complement your home’s decor.

CL Gas Stoves ........................................................................... 24 - 33
With their subtle curving form, CL Gas stoves offer a stylish contemporary look with the inviting atmosphere of a log fire. These stoves also benefit from having the option of a programmable thermostatic remote control system that allows complete control from the comfort of your sofa.

Electric Stoves

Traditional Electric Stoves .......................................................... 34 - 39
Incorporating our unique VeriFlame™ technology, the Yeoman Electric models boast a choice of glow & flame effects, individually hand-painted logs and full remote control. With superior realism and up to 2kW of heat output, a Yeoman Electric stove will always be a pleasure to come home to.

CL Electric Stoves ....................................................................... 40 - 49
CL Electric stoves have the same cast iron construction and stylish curving form as their gas equivalents but are suitable for virtually any room in the home. Offered in five sizes, a CL Electric stove offers fantastic flame visuals with or without the heat, all at the press of a button on the remote control.
Gas Stoves
All Yeoman gas stoves are available with natural gas or LPG and, depending on model, feature a highly realistic coal or log effect fire. Most of these highly efficient stoves are available as manual operation and have the option to upgrade to either a standard remote, allowing heat regulation once the pilot light has been lit manually, or a programmable thermostatic remote with additional timer and thermostatic controls, giving you control of your stove from the comfort of your armchair!

Inset Gas Fires
Available with either natural gas or LPG and for a conventional or balanced flue installation, Yeoman’s range of Inset gas fires offers outstanding efficiency rates. Designed to be hearth mounted for a traditional fireplace aesthetic, each model in the range is available with a remote control handset. The modern traditional styling of the CL 530 & 670 Inset fires give you a choice of linings, each complementing the highly realistic log fuel effect while the Dartmouth and CL7 Inset fires feature a highly realistic coal fuel effect and elegant Black Reeded lining. The CL7 also has the option of a Slide control located along the top of the fires front - for even easier heat control adjustment.

Electric Stoves
A Yeoman can be as easy to install as plugging in and switching on! Featuring our unique VeriFlame™ technology with low energy LED illumination and hand painted fuel bed. With the heater discreetly located underneath, the remote control allows you to adjust the heat between off, 1kW and 2kW in addition to the VeriFlame™ effects.

Selecting your Stove or Fire
Before you choose your new stove or fire you will need to know what type of chimney (if you have one) or flue you have. Please turn to page 58 to identify your chimney type.
We take great care to ensure that our fires and stoves are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your fire.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements, both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home.

They will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

A Wealth of Styling Options...

**Styling options**

The look of your stove is very important. That is why Yeoman offers you the opportunity to personalise your stove with a variety of styling options. According to model, these include flat top and high or low canopies, panoramic single doors, double doors with removable window crosses, brass handles and, for the new CL Inset gas fires, a choice of linings.

**Colour options**

Colour is another option, with a choice of 4 paint finishes available for most stoves: Matt Black, Metallic Blue, Metallic Brown or Metallic Green. CL Stoves & Fires are finished in Metallic Black.

*A - Vent not normally required where the air permeability is greater than 5.0m³/hr/m². Ventilation normally required is 550mm². Please discuss in full with your local retailer. ∆ - Requirements in the Republic of Ireland are different.

---

**Yeoman Extended Warranty**

If you have purchased your stove or fire from an authorised stockist within our Expert Retailer Network, then your product will automatically carry a 2 year warranty as standard. The 2 year warranty can be further extended to a total warranty period of 5 years by registering your Yeoman stove or fire within one month of the later of the purchase date or installation date. Accordingly, the start date for the warranty period is the date of purchase. During the registration process, the Expert Retailer details will be required for your Extended Warranty to be activated. Any product purchased outside of our Expert Retailer Network will carry a standard 12 month, non-extendable warranty. Full warranty terms & conditions are available to view at [www.yeomanstoves.co.uk](http://www.yeomanstoves.co.uk).

**Expert Retailer Network**

We take great care to ensure that our fires and stoves are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your fire.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements, both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home.

They will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Furthermore, Yeoman fires and stoves purchased from within our Expert Retailer Network will have the additional benefit of a greatly extended warranty period, subject to terms and conditions. Full details can be found at [www.yeomanstoves.co.uk](http://www.yeomanstoves.co.uk).
Inset Gas Fires

All fires in our Inset gas range offer efficient and effective heat to create welcoming warmth to combat the long, cold winters. A space saving option for the room, an Inset fire offers a stylish solution for smaller homes as well as a straightforward installation even if you don’t have a chimney! The CL Inset fires also come with a selection of lining options to further personalise your fire to your home.

CL 530 & 670 Inset

Designed for hearth mounted installations, the new CL Inset gas fires feature a cast iron front beautifully crafted into smooth, curved lines to give a sophisticated modern-traditional style that is at home in a number of interiors. Available for both conventional and balanced flue installations, the CL Inset has an output of up to 5.6kW and an efficiency of up to 84%. The highly realistic log fuel bed is complemented by an enticing glowing ember feature and a choice of three striking and distinctive lining options as shown below.

Lining Options

Our CL Inset gas fires come with a choice of smart lining options, each offering an entirely different aesthetic that will not only complement the enticing flames and glowing ember effect but enable you to tailor your fire to your very own interior decor. Choose from warming Vermiculite with its smooth, light coloured surfaces, the classic style of the striking Black Reeded, the reflective qualities of Black Glass or the timeless Brick Effect lining, reminiscent of traditional fireplace inglenooks.

State of the Art Remote Control

Supplied as standard with your CL 530 or 670, the multi-function Programmable Thermostatic remote control allows you to control all functions of your fire from ignition, through all the settings available to extinguish. The remote facilitates a number of programming options so you can set a daily or weekly schedule or instruct your fire to maintain your preferred room temperature, all from the comfort of your sofa! You may decide to set your fire to come on before you wake up in the morning or return home in the evening to ensure a welcoming and warm home exactly when you need it.
Ease of Installation

The new CL Inset is compatible with our optional linerless flue kit. The kit comprises a specifically designed terminal and a short piece of flexible, stainless steel flue pipe and has been specifically created to be slotted into your masonry chimney in place of a full liner. This reduces the need for building work and any associated labour, facilitating a simpler and more cost effective installation.

CL7 & Dartmouth Inset

With a look that takes inspiration from our traditional, solid fuel stove aesthetic, the Dartmouth has a cast iron front complete with rose motif. A truly advanced fire, the Dartmouth has the convenience of either manual or remote control operation, allowing you to enjoy the functions of your fire from the comfort of your sofa. With its modern-traditional style, the cast iron CL7 Inset sits comfortably alongside the existing CL Inset range. With your choice of either manual, remote control or slide control operation, the CL7 offers versatility and complete ease of use.

Both the Dartmouth and the CL7 Inset models are available with a coal effect fuel bed and Black Reeded lining, with the flames providing an enticing view and generous heat outputs of up to 4.5kW. With high efficiencies of up to 89%, both models give instant and effective warmth for your home.
CL 530
Inset Gas Fires

With portrait dimensions, the CL 530 Inset is a stylish gas fire offering a versatile aesthetic that will blend effortlessly into both traditional and contemporary interiors. The subtly curving front is beautifully crafted from cast iron into a sophisticated design. Available with a choice of four linings, Vermiculite, Black Reeded, Black Glass and Brick Effect, the CL 530 has a hand painted log effect fuel bed complete with glowing ember effect. A stunning flame picture completes the look and provides convenient, effective heat and a highly efficient output that can be fully controlled from the comfort of your sofa with the Programmable Thermostatic remote control handset.

CL7 Inset – Up to 89% efficiency with a choice of three control options
The CL7 Inset offers the exceptionally high efficiency and modern-traditional elegance as the CL freestanding stoves. Designed to fit a standard 16” fireplace opening, the CL7 Inset features a highly realistic, coal effect fire and produces a beautiful flame picture with a warming heat output of up to 4.5kW. An innovative slider control option allows the fire’s hearth-level controls to be operated from the top of the fire, making them even easier to reach. Alternatively the CL7 can be upgraded with a remote control for heat adjustment from the comfort of your sofa. The balanced flue version has a slimline firebox that offers a simplified and more versatile installation option.

- Manual, Remote or Slide control options
- Conventional and balanced flue options
- Highly realistic coal effect fire
- Convected and radiant heat to quickly warm your room
- Variable heat output 2.1 - 4.5kW
- Up to 89% efficient
- Flue - conventional flue class 1 or 2 127mm (5”); balanced flue 153mm (6”)
- Natural gas or LPG
- Virtually invisible glass front
- Fits into standard 410 x 560 x 250mm (w x h x d) fireplace opening
- Slimmer depth of Balanced Flue fire allows installation into inner wall of home without the need of a false chimney breast.

Dartmouth Inset

Gas Fires

Offering the familiar ‘family look’ of the Yeoman traditional stoves range and the latest high-efficiency heating, the Dartmouth is an inset convector gas fire that very much blends traditional appeal with modern convenience. At its heart is the latest high efficiency gas combustion system that has been specially developed to combine the exceptional heat output with much improved fuel economy (gas consumption is lower so saving you money). In fact, the conventional flue version is an outstanding 89% efficient.

- Manual or remote control option
- Conventional and balanced flue options
- Highly realistic coal effect fire
- Convec ted and radiant heat to quickly warm your room
- Variable heat output 2.1 - 4.5kW
- Up to 89% efficient

Dartmouth Inset Gas – with high efficiency technology
Exmoor
Gas Stoves

This popular model combines traditional charm with modern technology to bring you a gas stove that can be installed into almost any room - even one without a chimney. Furthermore, its highly realistic fire provides up to 2.6kW of adjustable heat, whether you opt for manual or remote controls, so it’s ideal to take the chill away from those long winter days and nights.

- Conventional and balanced options
- Radiant heat to quickly warm your room
- Highly realistic log-effect fire
- Manual or remote control options
- Variable heat output 1.50 – 2.62kW
- Up to 82% efficient
- Optional brass handle
- Top or rear flue (conventional class 1 or 2) - 128mm (5”) Rear flue only (balanced) - 153mm (6”)
- Natural gas or LPG
- Electric model also available, see pages 34 - 35
- Woodburning & multi-fuel models also available (see separate brochure)

Dartmoor Gas – outstanding log effect for increased realism
Devon Double-Sided  - the warming heart of your home
For a truly enticing focal point in your home, the Devon is a double-sided gas stove that offers a practical solution to heating a large open plan space effectively, or, two adjacent rooms at once. Made from traditional cast iron that allows heat to be diffused slowly and steadily, the Devon double-sided has a realistic log fuel effect for the ultimate traditional stove ambiance. The flames may be controlled with your choice of Standard or Programmable Thermostatic remote handset, allowing you to ignite, vary the flame height and extinguish your fire from the comfort of an armchair. The Programmable remote control has additional features that enable you to set a daily or weekly programme to suit your lifestyle.

**Double-Sided Devon Gas Stove**

- Conventional top flue - 128mm (5”)
- Highly realistic log effect fire
- Variable heat output
- Up to 72% efficient
- Manual or remote control options
- Natural gas or LPG

CL3 Gas - highly realistic log effect
The CL3 is the smallest of the contemporary gas stoves from Yeoman. Despite its compact dimensions, underneath the smooth, modern lines of the CL3 lies a powerful, high efficiency stove with a highly realistic log effect fuel bed and the additional option of the state of the art Programmable Thermostatic upgradeable remote control system. Fully programmable, the optional remote upgrade allows the CL3 to be set to automatically switch on or off and change temperature according to your exact requirements.

Metallic Black
CL5 Gas - with high efficiency technology
New to the CL gas stove range is the CL5 Midline. Displaying all the handsome features of the standard CL5, the Midline features an integral log store which helps to achieve the real-fire look and raises this impressive stove to a higher level. Together with the same efficiencies and heat output as the CL5, the Midline model makes for a striking focal point in any interior setting.

- Conventional and balanced flue options
- Highly realistic log effect
- Radiant heat to quickly warm up your room
- Manual or remote control options
- Variable heat output 1.9 - 3.5kW
- Up to 81% efficient
- Integral log store and curved top plate

CL5 Midline Gas - featuring an integrated log store for that real fire look
A further addition to the CL range is the CL5 Highline. Maintaining the same high efficiency and impressive heat output of other CL5 models, the Highline gives an impressive focal point due to its taller, integral log store base. With its smooth curves and stunning Metallic Black finish, the CL5 Highline lends itself to a wide array of interior styles and gives your living space the finish it deserves.

CL5 Highline Gas - a finish deserving of any living space
CL8
Gas Stoves

The largest in our family of CL gas stoves, the CL8 has the same gently curving lines, control options and sophisticated stainless steel features as its smaller counterparts but, with a heat output of up to 5.5kW, the CL8 is capable of providing ambient heat to larger rooms for the whole family to enjoy. With hand-painted logs and an enticing glowing ember effect, the CL8’s inviting flame picture is extended by the mirror-like qualities of the sides of the stainless steel fire lining, creating a bright and mesmerizing effect which friends and family are sure to gather around.

CL8 Gas - an outstanding focal point for your living space
Exmoor Electric – complete operation by remote control
Available in traditional Matt Black, the ever popular Exmoor stove perfectly combines the classic good looks of a woodburner with the ease of an electric stove. At its heart is the unique VeriFlame™ technology which allows you to choose from 3 brightness levels and blue or orange flame setting to match your mood exactly – and everything is operated from the remote control to save you kneeling down! Furthermore, you can select fire effect only, fire effect + 1kW heat, and fire effect + 2kW heat according to your heating needs.

- Realistic hand-painted log effect
- VeriFlame™ technology
- Flame visuals can be enjoyed without the heat
- Low energy LED illumination
- Remote control
- Optional brass handle
- Thermostatic option
- 99% Efficient
- 13 amp socket needed
- Heat output 1.0 - 2.0kW
- No flue, chimney or air vent required
- Gas versions also available, see pages 16-17
- Woodburning & multi-fuel models also available (see separate brochure)
Exe

Electric Stove

The Exe’s subtle styling and refined detailing fits effortlessly into both traditional and contemporary homes alike, adding an easy to install centrepiece that can provide instant heat. The stove’s two heat settings can be thermostatically controlled, allowing the stove to constantly maintain a pre-set temperature.

Featuring Gazco’s VeriFlame™ technology, this versatile model offers three flame brightness levels, including an orange and blue flame effect, which can all be controlled with the supplied handset. With the Exe’s realistic hand painted fuel bed, the flame visuals easily create the ambience of a traditional woodburning fire and can even be displayed without the heat, allowing you to enjoy the stove all year round.

- Realistic hand-painted log effect
- VeriFlame™ technology
- Flame visuals can be enjoyed without the heat
- Low energy LED illumination
- Remote control
- Optional brass handle
- Thermostatic option
- 99% Efficient
- 13 amp socket needed
- Heat output 1.0 - 2.0kW
- No flue, chimney or air vent required
- Gas versions also available, see pages 18 - 19
- Woodburning & multi-fuel models also available (see separate brochure)
Exe Electric  - traditional woodburning ambience
Using the same cast iron door and heavy gauge steel body as the Gas Dartmoor, the electric versions are brought alive with VeriFlame™ technology. This means you will enjoy a choice of flame and glow effects from a remarkably authentic log-effect fire that creates a superb focal point in your room. All this and a choice of single or double doors to suit your exact styling requirements!

The heater is discreetly located under the stove but, as all functions can be operated from the complementary remote control there is no stooping or crouching. In fact you can alter the VeriFlame™ effect or adjust the heat output whilst relaxing in your favourite chair!

- Realistic hand-painted log effect
- VeriFlame™ technology
- Low energy LED illumination
- Remote control
- Single or double doors
- Flame visuals can be enjoyed without the heat
- Removable Tudor rose door crosses**
- Optional brass handle◊
- 13 amp socket needed
- Thermostatic option
- 99% Efficient
- Heat output 1.0 - 2.0kW
- No flue, chimney or air vent required
- Gas version also available, see pages 20 - 21

** Double door only
◊ Single door only
Dartmoor Electric - authentic log effect for ultimate realism
CL3 Electric - neat and compact for the smaller room
A wonderful solution for areas that require additional warmth during the colder weather, the smooth, curved lines of the CL3 Electric stove can be enjoyed in all rooms including conservatories, hallways and studys. The CL3 has two heat settings of 1kW and 2kW and provides instant warmth exactly when you need it. You can even enjoy the enticing flame visuals without the heat! Finished in Metallic Black with subtle stainless steel detailing, the CL3 exudes style and functionality in equal measure.

- Realistic hand-painted log effect
- VeriFlame™ technology
- Low energy LED illumination
- 3 Brightness levels with blue boost setting
- Flame visuals can be enjoyed without the heat
- Remote control
- Integral cast iron top plate
- 13 amp socket needed
- Thermostatic option
- 99% Efficient
- Heat output 1.0 - 2.0kW
- No flue, chimney or air vent required
- Gas versions also available, see pages 24 - 25
- Woodburning & multi-fuel models also available (see separate brochure)
The CL5 Electric has the versatility to be placed virtually anywhere in the home. With a smart exterior and alluring internal visuals, this sophisticated electric stove combines the very best in comfort, convenience and style. Complete with VeriFlame™ technology, the enticing flame effect and realistic hand-painted fuel bed can be enjoyed with or without the heat output of up to 2kW.

As with its smaller CL3 counterpart, each flame brightness level of the CL5 may be operated from the easy to use remote control. The stove is finished in Metallic Black with an integral cast iron top plate and subtle detailing including a stainless steel handle that lends itself to a number of interiors, both traditional and contemporary.

- Realistic hand-painted log effect
- VeriFlame™ technology
- Low energy LED illumination
- 3 Brightness levels with blue boost setting
- Flame visuals can be enjoyed without the heat
- Remote control
- Integral cast iron top plate
- 13 amp socket needed
- Thermostatic option
- 99% Efficient
- Heat output 1.0 - 2.0kW
- No flue, chimney or air vent required
- Gas versions also available, see pages 26 - 27
- Woodburning & multi-fuel models also available (see separate brochure)
CL5 Electric - perfect for bedrooms, studys, conservatories and hallways!
Increasing the CL5 electric family is the CL5 Electric Midline. With the same stunning flame visuals and realistic hand-painted log effect as the CL5, the Midline model combines the smooth, curving firebox with an integral log store for added real-fire authenticity.
CL5 Midline Electric - versatile and authentic
Rounding off the CL5 electric family is the impressive Highline model. As with its CL5 electric counterparts, the Highline model gives an extended and sophisticated finish with its tall, integrated log store base.

The realistic hand-painted log effect combines with the reflective internal lining to give unequalled flame visuals using VeriFlame™ technology.

- Realistic hand-painted log effect
- VeriFlame™ technology
- Low energy LED illumination
- 3 Brightness levels with blue boost setting
- Flame visuals can be enjoyed without the heat
- Remote control
- Integral cast iron top plate
- 13 amp socket needed

- Heat output 1.0 - 2.0kW
- No flue, chimney or air vent required
- Gas versions also available, see pages 30 - 31
- Woodburning & multi-fuel models also available (see separate brochure)
CL5 Highline Electric - a tall and sophisticated finish
CL8
Electric Stove

Instant glow, instant heat and instant impact - that’s the promise of the CL8 Electric, the largest stove in the family. Like its smaller siblings the CL8 offers three different flame brightness levels including an additional blue flame effect on the high setting. There are even reflective side panels to ensure that the remarkable VeriFlame™ visuals can be enjoyed from all angles of your living space whether it’s your lounge, study, hallway, bedroom or even conservatory!

- Realistic hand-painted log effect
- VeriFlame™ technology
- Low energy LED illumination
- 3 Brightness levels with blue boost setting
- Flame visuals can be enjoyed without the heat
- Remote control
- Integral cast iron top plate
- 13 amp socket needed

The above information is to assist in your choice of a suitable Yeoman stove. This is not intended to be all the information required to install your stove. This can be obtained from your local Yeoman retailer or you can download the full installation instructions from the Yeoman website: www.yeomanstoves.co.uk
Yeoman’s sister company, Gazco, have specifically developed a range of flue system components to complement your balanced flue Yeoman gas stove or fire. Crafted from 304 grade stainless steel and aluminium with some items additionally offered in anthracite paint finish. Designed with ease of installation and flexibility in mind, these flue systems simply push together without the requirement for locking bands or screws. Both the inner and outer pipes are secured with easy fit, self locking, high temperature silicone seals. For further information, please speak to your retailer or visit www.gazco.com.

Installing Your Yeoman Stove

A Gas Safe Register (UK) or Bord Gais (Republic of Ireland) approved installer should undertake a site survey prior to purchase and must install your Yeoman Stove for you. Your Yeoman retailer will be able to offer advice on this. You may also view or download installation instructions at our website – www.yeomanstoves.co.uk.

The following diagrams cover some of the basic requirements. All fires and stoves consume air as they burn. To comply with UK Building Regulations (Document J), therefore, if you are purchasing a stove with a maximum heat output in excess of 5.0kW, you will need to install a fixed air vent to ensure adequate ventilation. Outputs below this will not normally require a vent.

Balanced Flue Gas Stove Systems

The Yeoman Balanced Flue system means having no chimney is not a problem if you opt for either an Exmoor, Exe, Devon, Dartmoor, CL 530, CL 670, CL7 Inset, Dartmouth Inset or CL gas stove, as it draws combustion air from outside through its concentric pipe system. A full range of optional flue components is available to suit the configurations shown to the right.

Please note that these are diagrammatic representations only and vary according to model. Full installation information can be downloaded from www.yeomanstoves.co.uk.

Extended Warranty

Your Yeoman Expert Retailer will provide you with a Two Year Warranty for your new stove or fire. For gas appliances, this can be further extended to a Five Year Warranty, provided you register your product with Yeoman. Stoves and fires purchased outside of Yeoman’s Expert Retailer Network will carry a standard One Year Non-Extendable Warranty. Please note, these warranties exclude certain consumable parts and are dependant on your appliance being serviced by an appropriately qualified person 12 months after installation and annually thereafter. Full warranty terms & conditions are available to view at www.yeomanstoves.co.uk.
Flue Requirements

The type of chimney or flue you have usually dictates your choice of stove or fire. Once you have identified your chimney (or confirmed you do not have one), take note of the symbol that represents this, as this has been used throughout the brochure to represent the stoves or fires that are suitable for installation in your home.

Conventional Flue

Conventional flue systems are easily recognisable as either a conventional brick or stone chimney, pre-fabricated or pre-cast chimney system. Should your home have none of these at present, it is usually possible to have a pre-fabricated system installed in your home if required.

Brick or Stone Chimney
(Class 1)

The chimney stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

Pre-Fabricated Flues
(Class 1 & 2)

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

Pre-Cast flues
(Class 2)

Many modern homes have been built with such flues. You can readily identify them by either a metal flue cowl or a raised ridge terminal on your roof. Again, the natural circulation of heated air expels the products of combustion. This option is only available on the small stoves.

Balanced Flue

With Balanced Flue installations the appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall. Please see page 57 for further details.

Balanced Flue
(No chimney required)

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Depending on the stove selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. Gazco offers a comprehensive range of balanced flue components. Please refer to Gazco’s dedicated Concentric Flue System brochure which can be requested from your retailer or viewed online at www.gazco.com.

Electric Stoves
(No chimney required)

Yeoman produce an selection of electric Exe, Exmoor, Dartmoor, CL3, CL5 and CL8 stoves which do not, of course, require a chimney or flue of any kind.

No Air Vent required
(UK)

All fires and stoves shown with this symbol, boast the advantage of not normally requiring an air vent* where the air permeability is greater than 5.0m3/hr/m2. Please discuss this in full with your local Yeoman retailer.

*Requirements in the Republic Of Ireland are different.

This above information is to assist in your choice of a suitable Yeoman stove or fire. This is not intended to be all the information required to install your appliance. Further information can be obtained from your local Yeoman retailer or you can download full installation instructions from the Yeoman website at www.yeomanstoves.co.uk.
Relax in the irresistible ambience that a real woodburning stove creates! Yeoman also offer a number of the stoves in this brochure as woodburning and multi-fuel models. Expertly crafted designs range from contemporary to traditional, to suit a wide range of interior styles. Synonymous with quality and efficiency these extraordinary stoves will really make a statement that friends and family will instantly warm to.

Furthermore, it is possible to achieve complete home heating with a Yeoman boiler stove. There are five boiler models in the Yeoman range which not only heat the room they are in, but can supply hot water to up to 19 radiators throughout the rest of the house.

For more information please speak to your local Yeoman retailer, or alternatively you can view and download the brochure online at www.yeomanstoves.co.uk.
