

# Vertical Sliding Windows

Traditional and elegant  
sash windows

Vertical sliding windows benefit from both...

# classical design and modern technology

Vertical Sliding windows can really enhance the look of your home. They combine the elegance of traditional sash windows with the benefits of modern materials.

Manufactured from PVCu they are strong, will not rot, warp or require repainting; ensuring that they retain their colour and shape throughout the years with the minimum of maintenance.

Suitable for both replacing existing timber sliders in period buildings and adding character to any development, vertical sliding windows retain all the traditional features of their familiar counterpart but with the enhanced benefits that modern PVCu systems provide.

Energy Index (kWh/m <sup>2</sup> /year) (Energy Index certified by BIFRC and based on UK standard window. The actual energy consumption for a specific application will depend on the building, the local climate and the indoor temperatures)	6
The climate zone is:	UK
Thermal Transmittance (U <sub>frame</sub> )	1.4 W/m <sup>2</sup> .K
Solar Factor (g <sub>frame</sub> )	0.48
Effective Air Leakage (L <sub>frame</sub> )	0.02 W/m <sup>2</sup> .K
Reg. No.: 4013 M123 Expiry Date: 02/2013 www.bifrc.org	
This label is not a mandatory requirement. It is a voluntary label provided as a customer service to allow consumers to make informed decisions on the energy performance of competing products	

Our energy efficient window system brings together market leading components to deliver exceptional performance. Choosing our windows to replace single glazed or older double glazed units saves money. In fact, it could reduce your heating costs by up to 20%.

- Reduce wasted energy and cut bills.
- Reduce condensation and noise.
- Energy efficient windows – at the right price.

## Using less energy means less CO<sub>2</sub>

Science suggests man-made emissions play a major role in global warming and, in turn, influence climate change. Home energy use alone accounts for 27% of UK carbon dioxide (CO<sub>2</sub>) emissions which contribute to climate change.

## Design options to enhance your home

**Mock Horn (far left)** – Our Mock Horn feature enhances the aesthetics of your windows by achieving the appearance of a traditional vertical sliding window.

**Georgian Bars (left centre)** – This style option allows you to tailor your window glazing to create a personal finish for your home. This is achieved by inserting a shaped bar in between the glass panes.

**Astrical Bar (left)** – Similar to Georgian bars but offers a more traditional finish by planting shaped bars on top of the glass panes thus creating depth to the design and the look of individual glass units.

## Glazing

A range of clear, obscure and patterned glazing is available to suit your requirements.

## Add a splash of colour

The range is available in variety of finishes including: white, cream, oak and rosewood, plus a selection of special finishes.

Why choose between elegance and practicality when you can have both? After all, the right window can make all the difference to a room, so it's important for it to look the part – and be reliable and cost-effective, too.

Cream

Oak

Rosewood

## Making more of ambient heat

In winter, the energy efficient coated glass used in our windows retains warmth within the home. It's also designed to exploit radiant heat energy from the sun. These properties result in significant fuel savings compared to a single glazed dwelling. These two images show just how effective fitting energy efficient windows to your property can be.
