Roof Coating

TILEFLEX®
Enhanced with Surface Cleaning Nano Technology!

Paint your roof with TILEFLEX® from NUTECH and it will keep its good looks for years to come.

You'll be adding considerable aesthetic and financial value to your home or commercial building.

The secret of TILEFLEX® is simply this... TILEFLEX® offers a scientific blend of active ingredients designed for specific purposes.

To repel dirt and contamination – a surface impregnated with an ENHANCED "SURFACE CLEANING NANO TECHNOLOGY"®

To prevent discolouration and the growth of moss and lichen – highly effective polymer preservatives.

To prevent fading of colour or loss of surface gloss due to moisture, temperature, and UV light – proven UV light resistant, high quality non-fading pigments.

To provide total waterproof protection and to stop peeling or cracking – tough, flexible 100% acrylic polymers.

TILEFLEX® is also environmentally friendly, because unlike many other coatings, it does not contain harmful preservatives. In fact, tiles coated with TILEFLEX® are safe for the collection of rain water.

The remarkable performance of TILEFLEX® has even been proven by independent CSIRO testing.*

*CSIRO Report DBCE Doc96/168(M) available for inspection at Nutech.
