

SkillMatch VIDEO

Skill Match srl has developed a specific methodology for mapping and evaluating professional competences.

With reference to this methodology counselors, trainers and assessors need to show competences.

SkillMatch VIDEO

What is the video show of a competence?

It is a video-clip collection that shows competences in a methodologically consistent manner.

SkillMatch

- Each competence is represented by one or more professionals in real time and real environments;
- Each competence is introduced and commented;
- Each competence stresses the elements of competence linked to knowledge, skills and behaviours.

SkillMatch

- You can see input, tasks and output of the showed competence in each video-clip.
- The video representation of each expertise highlights the specific actions to be taken to ensure the quality of the competence itself.
