

Deebridge Electrical Engineers

## Customer focused, service driven.

Your leading electrical services provider for the Oil & Gas and industrial sectors

## ABOUT DEEBRIDGE

We are a customer focused, service driven business, with leading electrical solutions for the industries we serve. Deebridge is one of the oldest established businesses in Aberdeen, Scotland, serving the following sectors;

Our product & service offerings cover motors, generators, alternators, control systems, gear boxes, pumps, HVAC systems, ROV's and skid packages. The Deebridge technical team is made up of highly skilled engineers and technicians, with a number of key managers having over 30 years experience in the industry.

## PRODUCTS & SERVICES

The products we supply or manufacture in our Aberdeen workshop are suitable for safe and hazardous area environments. This includes motors, control systems, alternator sets and all related components. Solutions can be tailor made for your specific project requirements and detail drawings are available.

Deebridge onsite & workshop services include installation, maintenance, inspection, fault finding and repair for all electrical equipment. Providing our clients with an efficient, time saving service is our top priority, so we guarantee a quote for any product or service in less than 5 days (excluding specialist long lead items). We ensure complete turnaround for motor rewinds in no more than 5 days from the point of work authorization.

"Deebridge did an excellent job when faced with a difficult task. The fact the job was completed is a credit to your team. We look forward to working with you again."

## TESTING & CERTIFICATION

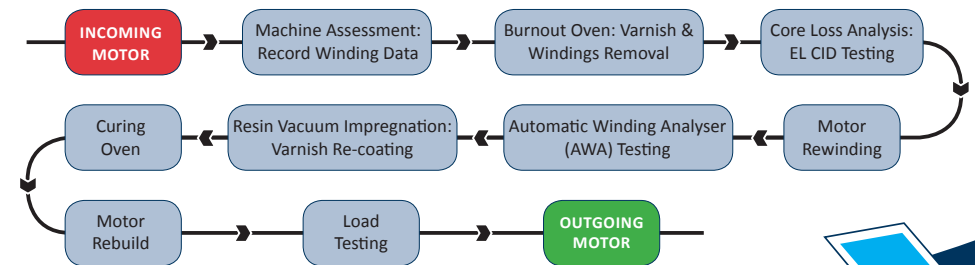

Our testing & certification services are fully EX compliant, with onsite services available. Deebridge can provide comprehensive inspection and fault analysis reports for your industrial electrical equipment. SELECT certified engineers are available for PAT Testing and Electrical Inspection Certification of your facilities fixed wire circuits, which are legally required every 3 years.

We offer the only temperature controlled burnout oven and resin vacuum impregnation facilities in Aberdeen, ensuring our motor rewinding services are strictly EX compliant and of the very highest quality. We can also provide framework agreements for motor overhauls and rewinds on typical 5 year maintenance periods.

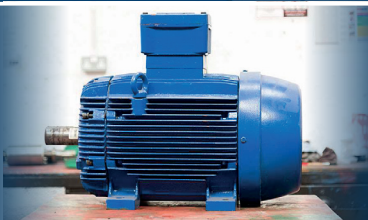

"Our project had a tough timescale, which Deebridge adhered to, with men and equipment in place promptly in spite of short notice. We were delighted with the service provided, knowledge and understanding of all staff involved."
