

Australian Marine and Civil

We are an agile workforce with a reputation for getting the job done – and done right. We adapt. We solve problems. No fuss. Guaranteed.

We started AM&C to bring a simple and ethical approach to marine and civil projects. Put simply, we do what we say we will do. On time. On budget. No surprises.

You can rely on us to deliver your most difficult and unusual projects.

Our family values enhance our relationships with clients, communities, and the environments we work within.

Belonging

We care about our people and the communities in which we work.

Integrity

We form enduring partnerships with our people, commercial partners, and communities. We act with integrity, honesty, and transparency.

Agility

Our agile workforce meets the needs of our partners in a changing marketplace and exceeds expectations.

Our simple, ethical approach to projects improves all areas of our business.

Our relationships

We believe that we are only as good as our last job. The foundation of our long-term client relationships is built on integrity, honesty and transparency. Our clients always comment on our great attitude, how nothing is too much trouble and that we go above and beyond.

When you work with us, you can expect:

- Powerful capacity to perform
- We build certainty
- We will get it done
- If we're going to do it, it will be done right
- We will inspire confidence
- We will outperform expectations.

Our health & safety

Our team, clients and the communities are central to the work we do, and that's why we have always maintained a strong commitment to Health and Safety standards.

We regularly deliver difficult and unusual projects and our team is fully trained and licenced to perform high-risk works, working from ropes, working at heights and working within confined spaces.

We implement site specific management systems, safety management plans and adhere to stringent project guidelines supplied by principal contractors.

Our own Health and Safety Program focuses on continual improvement while meeting industry standards.

Our environmental management

We regularly deliver projects in sensitive environments with protected flora and fauna. We are dedicated to minimising our impact on every project site.

Our proven techniques including innovative sequencing, thorough and careful planning and use of specialist and strategic plant and equipment, ensures we reduce our construction carbon footprint and deliver exceptional environmental outcomes.

We implement site specific environmental management systems and continually develop and implement environmentally friendly practices.

Our quality

We have built our reputation on delivering quality outcomes.

Our expertise and ability to adhere to the highest standards is trusted by Queensland Government organisations, local councils and tier one and two principal contractors.

We own and maintain a fleet of specialised plant and equipment. We even develop attachments and innovations to improve safety, time and quality.

Excavators

15+ excavators ranging from 3T to 40T
Includes zero swing and long reach excavators

Drill Rigs for Anchoring

Two purpose built down the hole hammers for soil nail and rock bolt installation

Construction Barge

24m x 8m suitable for river and ocean environments

Crawler Cranes

Maeda 10T Crawler Crane
Kobelco 10T Crawler Crane converted to a telescopic boom for soil nail installation

Sheet Piling & Drilling Attachments

Auger Drills, Core Drills, and Vibratory Hammers
Compatible and available to be utilised with the excavators

Compressors

3 x 400 CFM
1 x 250 CFM
Compatible and available to be utilised with the excavators

An aerial photograph showing a curved retaining wall made of stone or concrete blocks. Behind the wall is a grassy area with some trees and a small structure. In front of the wall is a paved road with white lane markings and a white arrow pointing right. The road is bordered by a grassy verge on the left.

We deliver high quality projects and services that you can rely on. No surprises.

Structural Retaining and Anchoring Solutions

We specialise in delivering drilling and shotcrete retention works in confined environments with limited access.

Our innovative sequencing of works, supported by our specialist equipment that delivers efficiencies, accuracy and improved safety outcomes, ensures we get the job done even in the hardest to reach locations.

Our structural retaining and anchoring solutions experience include:

- Bank retention and stabilisation
- Abutment protection
- Retaining walls
- Cliff face remediations
- Rock bolting
- Soil nail installation
- Rock fall netting
- Gabion basket installation

Railway infrastructure

We are highly experienced at working within the unique requirements of railway corridors.

Whether it is staging works during weekend closures, managing works in an operating train station or working adjacent to live overhead lines, we have a track record of delivering safely, on-time and to the highest standard.

With our QR-approved specialist equipment and certified team, we are a delivery partner who is ready to hit the ground running.

Our railway infrastructure experience includes:

- Civil and structural concrete for train station accessibility upgrades
- Structural concrete elevator shafts across multiple platforms
- Soil nail and shotcrete for railway batters
- Rock nails and rock fall netting
- Concrete platforms and stairs for upgraded train stations
- Excavation and installation of bored piers, reinforcement and concrete installation
- Concrete drainage and culvert construction
- Train platform coping stone installation

Marine infrastructure

We deliver the full range of marine infrastructure services; from land via a long reach excavator or on the water via a barge.

We have managed works in sensitive marine environments including the Great Barrier Reef, Moreton Bay and Gold Coast Broadwater with exceptional environmental, safety and quality standards.

Our marine infrastructure experience includes:

- Foreshore and riverbank stabilisation
- Flood remediation and mitigation
- Erosion control
- Landslip rectification
- Boat ramps
- Piling
- Floating walkways
- Gabion walls
- Stone pitching
- Revetment walls
- Breakwater construction
- Rock groyne reconstruction
- Abutment protection

Civil and Drainage infrastructure

With our extensive range of plant and specialist equipment we deliver the full range of civil construction services.

We use a fleet of construction equipment to service our projects and offer wet hire arrangements for our clients including long reach excavators.

We specialise in rejuvenating drainage structures including installation of bored piers, reinforcement and steel fixing, structural concrete, stone pitching and shotcreting.

Our civil and drainage infrastructure experience also includes:

- Bulk earthworks
- Detailed excavation
- Pavements
- Retaining walls
- Minor demolition works
- Road construction

Structural retaining and anchoring projects

Windsor Cliffs Remediation

Brisbane City Council

Overview
Windsor, Brisbane
\$650k | Schedule of rates
December 2015
–February 2016

Features
Created a centrepiece in Windsor
18m high, 55m long cliff face
Specialist AM&C equipment
Geobruigg rockfall protection
Bluey GFR bar

Services
Civil construction
Cliff descailing
Piling
Rock anchors
Rockfall netting
Shotcrete
Vegetation removal

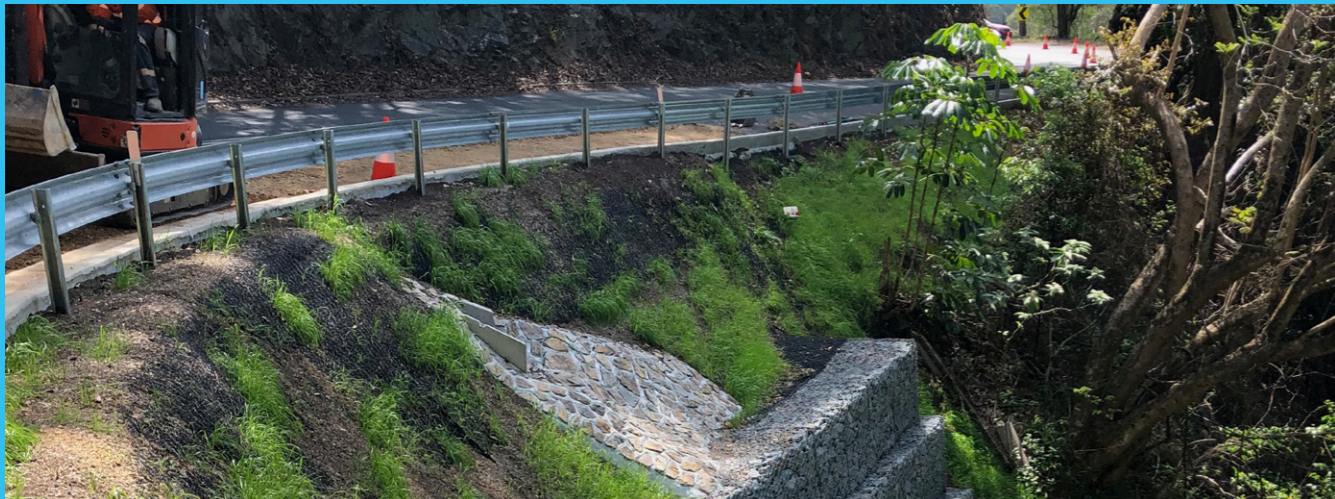

Mt Coot-tha Lookout Stone Pitching

Brisbane City Council

Overview
Mt Coot-tha, Brisbane
\$227k | Schedule of rates
July–September 2017

Features
76m long,
9m high stone wall
High profile, constrained site
No community complaints

Services
Civil construction
Erosion control
Excavation
Landscaping
Stone pitching
Vegetation removal

Tweed Landslip Rectification

Tweed Shire Council

Overview
Tweed Heads, NSW
\$1.4m | Lump sum
July–September 2017

Features
Reconstruction works
Identified delivery improvements
Community consultation

Services
Civil construction
Concreting
Drilling
Gabion walls
Landslip rectification
Shotcrete

Logan Motorway Stabilisation Works

Queensland Bridge and Civil and Transurban

Overview
Drewvale, Brisbane
\$1.5m | Schedule of rates
November 2016
–February 2017

Features
Working adjacent a motorway
Specialist AM&C equipment
RMS specification

Services
Drilling
Civil construction
Landscaping
Soil anchors
Vegetation removal
