Who we are

Goodger Design Associates started practicing in September 1999 based in the historic town of Windsor. Our practice offers the full range of professional services related to landscape architecture, and project management.

We provide expertise in landscape planning, detailing and urban design. We specialise in finding design solutions for transport corridors, residential, healthcare, commercial and educational environments. The practice draws upon the skills that its proprietor, Toby Goodger, has gained following over 20 years of professional service with leading private practices and local authority organisations. We are a registered practice of the UK Landscape Institute.

We employ chartered landscape architects with experience of large UK infrastructure projects such as the Greenwich Peninsula Millennium development and the West London Rail Welcome Initiative as well as other commercial and community orientated projects.

Our team members have collected several prestigious awards such as the premier award for the Ladbroke Grove canal towpath restoration from the Royal Borough of Kensington and Chelsea in 1996. Other awards featured innovative projects in hospital grounds and land restoration schemes. Our practice won the premier award in the 2003 Spelthorne Borough Council environment awards for the enhancements carried out to Orchard Meadow in Sunbury-On-Thames.

What we do

We offer professional design and project management services. Sound business planning and financial management ensure the presence of a competitive and well resourced service responsive to client's agendas and timescales.

The practice works with other associated professionals to provide services such as building design, land remediation, and town planning so that integrated and successful initiatives will result. We offer a responsive service for any size of site from a major landscape restoration or infrastructure project to a school playground or private garden development. We also facilitate the design and management of historic gardens and provide advice on identifying the best funding regimes for commercial and community organisations. We provide arboricultural and building surveys, landscape and visual assessments and are also trained in writing proofs of evidence and expert witness procedures.

As well as within Great Britain, we have experience in Europe, the Middle East, the Persian Gulf, semi arid and tropical African environments and offer professional services for projects in these regions. We are competent in a range of major languages.

Summary of four services

- Feasibility studies and advice on interpretation of historic landscapes.
 - Sketch designs and cost estimates. End user design participation and interaction.
 - Landscape assessment for policy formulation and plotting of zones of visual influence for new building proposals.
 - Detailed designs, working drawings for construction, and planting for external and interior works.
 - Landscape management and maintenance plans and site inspections. Specification writing using NBS landscape with reference to British/European standards and legislation.
 - Tree condition surveys to BS 5837(2005), topographical and building surveys.
 - Professional advice and preparation of planning applications and appeals.
 - Bills of quantity to RICS standards and project financial management with outline and detailed project costings.
 - Procurement of contractors, quality plants, hard materials and inspection of works on site to completion.
 - Quality graphics and displays with digital walk through presentations of proposed and existing landscapes.
 - Advice on the securing of grants for funding projects or organisations. Formulation of heritage lottery and other funding applications.
- We work on the design and visualisation of all types of external space - large or small, urban or rural, and with 'hard' or 'soft' materials. For example:
- The form, scale and siting of new developments.
 - Front and rear private gardens and estates.
 - The space around schools, universities, hospitals and hotels.
 - Public parks, golf courses, theme parks and sports facilities.
 - Children's play areas and sensory gardens.
 - Housing areas, industrial parks and commercial developments.
 - Highways and transport corridors.
 - Town and city squares and pedestrian schemes.
 - Large or small urban regeneration schemes.
 - Forest, tourist or historic landscapes and landscape appraisal or conservation studies.
 - Reservoirs, power stations, extractive industry applications or major industrial projects.
 - Environmental assessment, planning advice and land management proposals.

01 Gerrards Cross Railway Station Landscape Enhancement in Gerrards Cross Buckinghamshire for Chiltern Railways.

02 Pound Mill Townscape Enhancement along Wraysbury Road in Staines Middlesex for Spelthorne Borough Council.

03 Purley Chase Golf Course Leisure Development Proposed Scheme in Nuneaton Warwickshire for Bugler Investments Ltd.

04 Milton Road New Nursing Home and Residential Development Proposed Scheme in the City of Cambridge for Rockley Dene Homes Ltd.

Project Profile:

Orchard Meadow
Sunbury-On-Thames Middlesex

Client: Spelthorne Borough Council with Lower Sunbury Residents Association
Approximate Overall Value: £185,000
Services provided: Site Investigation/Landscape Design/ Landscape Specification/ Quantity Surveying/Planning Supervisor/Contract Administration/Clerk of Works/ Public Consultation and Signage
Landscape Contractor: Wyevale Landscapes

We were appointed to act on a community participation exercise and drew up detailed designs and specification to create a new village green on a previously inaccessible and derelict area in the town centre of Sunbury-On-Thames. The establishment of Orchard Meadow as a new public park was the final jigsaw in an effort to link Sunbury Park and Sunbury Walled Garden with Sunbury's town centre thoroughfares of Thames Street and the Avenue.

The new meadow areas are now established for the enjoyment of the local residents who hold a community festival here each year. Features included decorative metalwork with a new access gate to the nearby walled garden, the planting of a mature avenue of Lime and Cherry trees and the redesign of the access car park that also serves Sunbury Park. Orchard Meadow is celebrated in a Millennium tapestry housed in the adjacent walled garden. The area's history is further celebrated in a rope sculpture that we designed attached to the iron archway access to the meadow from Old Rope Walk.

The quality of the completed Orchard Meadow project was recognized when our practice was presented with the 2003 Spelthorne Environment Award by the Mayor of Spelthorne during a ceremony at the Spelthorne Civic Centre in October 2003.

01 Orchard Meadow looking towards the steel archway at the pedestrian entrance from Old Rope Walk in the direction of the walled garden.

02 Orchard Meadow looking south towards Thames Street after enhancement work showing wildflower meadows, the central open space and mature trees.

03 View looking east along new Lime Avenue away from Walled Garden after completion of new access to walled garden.

04 View of New Walled Garden Gates towards Orchard Meadow in 2006.

05 View looking south towards Thames Street of Semi Mature Cherry Trees as focal point in meadow and welcoming space at car park entrance.

06 Orchard Meadow Spelthorne Borough Council Design Award Certificate presented by the Mayor of Spelthorne.

Project Profile:

Beaconsfield Town Hall Green

Client: Beaconsfield Town Council
Approximate Value: £51,500
Services provided: Site Investigation/Landscape Design/ Landscape Specification/ Quantity Surveying/Planning Supervisor/Contract Administration/Clerk of Works/ Public Consultation/Specialist artist's commissioning
Landscape Contractor: Geoff Alsford Landscape and Engineering Ltd

The Town Hall Green is located in the heart of Beaconsfield New Town next to the railway station. We were commissioned by the town council to redesign the Town Hall Green and to project manage the construction and planting works to completion.

We selected a theme of celebrating the rich links that the town has with its literary past, fine metal work detail evident in the Old Town and historic modes of transport. We designed a clay cobbled seating area with an Armillary sundial as a focus. We also designed the wrought iron work displays arrayed around the seating area. Famous people remembered included GK Chesterton and Enid Blyton. The displays also celebrate the 700 year town street fair, a 1600 wall painting of a Lute player, a coach and horses, the local railway and Bekonscot model village. We commissioned the artist, Steffi Goddard, to paint the laser cut images of the lute player and the Noddy characters. The green is richly planted with an array of new trees, shrubs and bulbs making it much lush and welcoming than before. Shoppers take advantage of attractive new seats designed in keeping with the original Edwardian concept.

The project's success was recorded extensively in the local press. The town hall green is now enjoyed as a backdrop for numerous weddings, the annual Christmas festival of lights and the Summer Beaconsfield awareness day. It is also enjoyed every day by the inhabitants of Beaconsfield as an attractive seating and relaxation area.

01 View of seating area with wrought iron trellis panels and bronze armillary sundial as focal point. Local residents and shoppers are enjoying the new space.

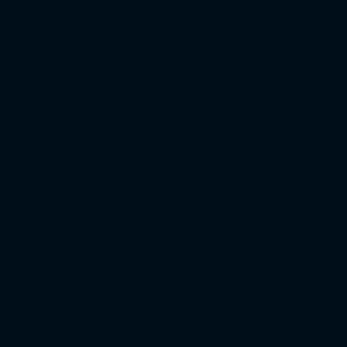

02 View looking south of newly planted green with armillary sundial and trellis panels dedicated to the 700 year old Beaconsfield street fair in the distance.

03 Project designer, Toby Goodger, with artist Steffi Goddard, who painted the laser cut images, in front of the trellis panel dedicated to Enid Blyton's Noddy characters.

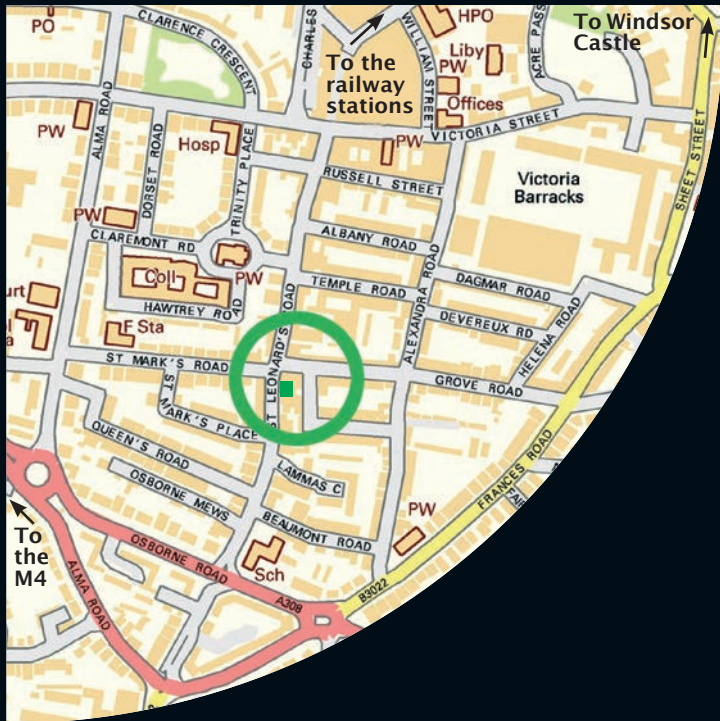

04 The laser cut image of the mediaeval Lute player discovered behind a plaster wall in Old Beaconsfield reproduced here in a trellis panel framed by climbing plants.

05 The project's contractor laying the four leaf clover design in the cobbled seating area during construction. We project managed all the construction & planting works.

06 The Mayor of Beaconsfield opening the enhanced space at a celebration event with local dignitaries, councillors, residents, project designers and contractors.
